1 Introduction

The board recognises the global nature of the aerospace industry and that many prime aerospace and maintenance organisations have their head offices here in the UK with manufacturing and operating bases overseas. Conversely foreign owned organisations with their head offices overseas may also have operations here in the UK.

The Boards position is that UK based organisations would come under the control of the UK NANDTB and overseas operations to come under the control of that country's National Aerospace NDT Board.

However the Board also recognises that not all countries have a national aerospace board and may wish to come under the control of the UK NANDTB to meet regulatory, i.e. EASA part 145 or certification requirements, i.e. EN4179.

An overseas organisation should not assume that by using a UK based qualification scheme or UK based Outside Agencies for training and examinations that this brings them under the control of the UK NANDTB.

2 Policy

This policy outlines the Boards position with overseas organisation or competent authorities wishing to affiliate to the UK NANDTB.

Any country or organisation based outside the UK that wishes to come under the control of the UK NANDTB needs to submit a request in writing to the Board Secretary (address above).

This request should be:-

- (1) Supported with justification for not using their own national aerospace board and
- (2) Acknowledgment from their own competent authority to seek this affiliation.

Agreement is subject to formal response by the UK NANDTB who will consider any requests at the next scheduled Board meeting. Any subsequent agreement shall be conditional upon the overseas organisation or competent authority utilising BINDT accredited AQB's or UK based accredited Outside Agencies.
