Application for Fellow

Entry is limited to candidates who have long experience of a high calibre and responsibility. No specific qualifications are laid down and each application is assessed on the overall merits of the candidate. Typically, candidates would be of at least five years standing as a member, with at least ten years high calibre experience and achieved a position of high responsibility.

Chartered Engineers of at least five years standing and scientists of comparable status and seniority may also qualify. In addition candidates would normally have made (or be making) a significant contribution to the NDT, condition monitoring or associated industry and/or the Institute (for example, involvement with BINDT committees or branches, participation on external committees/working groups).

It is the candidate's responsibility to supply sufficient information to allow BINDT to arrive at a decision on the application.

Please complete all sections as comprehensively as possible (**'See CV' or similar wording or an incomplete application is not acceptable and will result in rejection of this application**).

All candidates must provide names and addresses of two referees (page 6)

Check list (tick when enclosed)	
CV <input type="checkbox"/>	Photo ID <input type="checkbox"/>
Training/CPD Record <input type="checkbox"/>	Copies of academic and training certificates <input type="checkbox"/>

6. Institute groups

The Institute has a number of groups, which cater for the specialist needs of its members. Membership of these groups, which are listed below, is available to you at no extra cost.

Please indicate if you wish to join any of the groups below.

Aerospace Group:

The Aerospace Group is open to anyone with an interest in NDT as applicable to the aerospace industry.

COMADIT:

The Condition Monitoring and Diagnostic Technology Group is for those members interested in determining the condition of machinery systems and structures in order to provide data for diagnostics and prognostics.

UKTA:

The UK Thermography Authority is a special interest group of BINDT for all those involved in infrared thermography.

If UKTA, please indicate your area of interest:

Building

Mechanical

Electrical

Other (*Please specify*)

Entrance survey

Application for **Fellow**

Name:

Email:

The Membership, Qualification and Education (MQ&E) Committee welcomes your application to become a member of BINDT. We appreciate how busy you may be but it would help BINDT, and this committee in particular, to focus on your potential needs and how BINDT could assist you in your career path. Therefore, we would like to ask you to complete this questionnaire. Any information you provide will assist us to focus on the key issues that affect our membership at large.

Has your employer sponsored your application? Yes No

How did you hear about BINDT?

Why have you applied to join the Institute? (tick all that apply)

Access to the jobs market Networking
Journals/newsletters etc Engineering registration
Events/conferences Professional development opportunities
Other – please define _____

Do you hold NDT/CM certification? (tick all that apply)

ASNT BGAS/CSWIP
CSWIP PCN
ICorr Other – please define _____

Which of the following information provided on our website (in order of importance) is likely to assist you?

Job search Being able to upload your CV to send out to prospective employers
Technical articles at an advanced level To record your continuing professional development
Technical articles at a basic level Access via the web to companies related to the NDT industry,
Technical information on equipment ie training, certification, consultancy, equipment manufacturers
Access to standards, ie EN/ISO

Do you feel joining one of the BINDT Branches will be of interest to you?

Yes No

Would you be interested to know more about the degree in NDT (distance learning) programme?

Yes No

Do you feel you need to understand more about working in NDT worldwide?

Yes No

Would it help you if the Institute provided guidance on issues to deal with self-employment, ie tax, insurance, setting up a limited company and so on?

Yes No

If BINDT could provide table-top exhibitions/seminars in your locality, would this interest you?

Yes No

Are you interested in the Institute's social media activities on Facebook, LinkedIn, Twitter and so on?

Yes No

What services are you likely to use, or would you like to see BINDT offer access to? (tick all that apply) Examples include:

BINDT Apps Book store Branded Institute credit card
Free legal services helpline Medical insurance Personal insurances
Professional insurances Purchase of standards
Other – please define _____

Do you see any benefit related to the BINDT Benevolent Fund by being a member of BINDT? Yes No

Would you be interested in joining a BINDT committee in order to have some involvement with the work of the Institute

Yes No

Thank you for your input so far. If you feel there are other issues with which BINDT might assist you and your future in NDT/CM inspection, please give details:

The British Institute of Non-Destructive Testing, Midsummer House,

Statement of Ethical Principles and Code of Conduct

The Engineering Council and the Royal Academy of Engineering have jointly created a Statement of Ethical Principles for all engineering professionals. The British Institute of Non-Destructive Testing (BINDT) has adopted these principles and has also included values that are specific to BINDT.

Engineering professionals work to enhance the wellbeing of society. In doing so, they are required to maintain and promote high ethical standards and challenge unethical behaviour. There are four fundamental principles for ethical behaviour and decision-making. These are set out below, together with examples of how each should be applied.

Members of the British Institute of Non-Destructive Testing, in recognition of the importance of the engineering profession in affecting the quality of life, should accept personal obligations to act with integrity in the public interest and maintain and improve their competence.

For PCN certificate holders, additional ethical principles are specified in the document CP27, which can be located at <http://www.bindt.org/downloads/CP27.pdf>. Members of BINDT who are also PCN certificate holders should therefore comply with this document and CP27 'Code of Ethics for PCN Certificate Holders'.

Honesty and Integrity:

Engineering professionals have a duty to uphold the highest standards of professional conduct, including openness, fairness, honesty and integrity. They should:

- Act in a reliable and trustworthy manner
- Be alert to the ways in which their work and behaviour might affect others and respect the privacy, rights and reputations of other parties and individuals
- Respect confidentiality
- Declare conflicts of interest
- Avoid deception and take steps to prevent or report corrupt practices or professional misconduct
- Reject bribery and improper influence
- Notify the CEO of the British Institute of Non-Destructive Testing on receiving a civil or criminal conviction, becoming bankrupt or disqualified under the Company Directors' Disqualification Act, 1986.

Respect for Life, Law, the Environment and Public Good:

Engineering professionals have a duty to obey all applicable laws and regulations and give due weight to facts, published standards and guidance in the wider public interest. They should:

- Hold paramount the health and safety of others and draw attention to hazards
- Ensure their work is lawful and justified
- Recognise the importance of physical and cyber security and data protection
- Respect and protect personal information and intellectual property
- Protect, and where possible improve, the quality of the built and natural environments
- Maximise the public good and minimise both actual and potential adverse effects for their own and succeeding generations
- Take due account of the limited availability of natural resources
- Uphold the reputation and standing of the profession.

Title	Ref no	Issue no	Issue date	Authorised by
Application for Fellow	FF074 (A)	1	01.11.18	D Gilbert

Accuracy and rigour:

Engineering professionals have a duty to acquire and use wisely the understanding, knowledge and skills needed to perform their role. They should:

- Always act with care
- Perform services only in areas in which they are currently competent or under competent supervision
- Keep their knowledge and skills up-to-date
- Assist the development of engineering knowledge and skills in others
- Undertake continuing professional development to maintain professional standards
- Present and review theory, evidence and interpretation honestly, accurately, objectively and without bias, while respecting reasoned alternative views
- Identify, evaluate, quantify, mitigate and manage risks
- Not knowingly mislead or allow others to be misled
- Report any violations of this code by another member to the CEO of the British Institute of Non-Destructive Testing.

Leadership and Communication:

Engineering professionals have a duty to abide by and promote high standards of leadership and communication. They should:

- Be aware of the issues that engineering and technology raise for society and listen to the aspirations and concerns of others
- Accept responsibility for work carried out under their supervision, treat subordinates fairly and without bias and advance their learning and competence
- Encourage others to advance their learning and competence
- Promote equality, diversity and inclusion
- Promote public awareness and understanding of the impact and benefits of engineering achievements
- Be objective and truthful in any statement made in their professional capacity
- Raise concerns about danger, risk, malpractice or wrongdoing that affects others ('blow the whistle') and support a colleague or any other person to whom they have a duty of care who, in good faith, raises any such concern
- Challenge statements or policies that cause them professional concern.

The decisions and actions of NDT and CM personnel have a profound impact on the world we live in and society at large. Making a clear and public commitment to operating with integrity and honesty is essential to create a greater level of trust and confidence and a positive perception of the non-destructive testing and condition monitoring professions.

All members, across all grades of membership, undertake to advance the objects of the Institute and to be governed by the Bye-Laws. The above is the Code of Conduct, which members are required to embrace. Any failure to do so can be dealt with by expulsion from Institute membership and consequent loss of Engineering Registration, if applicable.
