

CP17 ISSUE 10 DATED 1ST APRIL 2017

IMPLEMENTATION DATE: 1ST APRIL 2017

RENEWAL AND RECERTIFICATION OF PCN LEVEL 3 CERTIFICATES (EXCEPTING AEROSPACE CERTIFICATES)

This issue supersedes all previous issues and is binding upon all holders of PCN level 3 certification, with the exception of those issued covering the aerospace sector, regardless of certificate issue date, with effect from 1 July 2013. All preparation, up to and including the date of 31 March 2008, for recertification under previous CP17 credit systems is accepted as fulfilling the criteria within this document.

IMPORTANT UPDATE - IMPLEMENTATION 1st January 2017

From 1st January 2017 complete & correct renewal applications must be submitted to PCN **no sooner than 6 months and no later 6 weeks** prior to the expiry date. The renewed/*recertified certificate will be issued from the previous expiry date and will expire 5 years less a day from the original expiry date, unless the **deferral** rule applies (see **deferral approval** process PSL28).

1. If the CP16/CP17 has not been submitted in accordance to the 6 week rule then clause 3.1 (below) will apply. A deferred approval from BINDT is required then the candidate must apply to an AQB for a recertification exam. This does not extend the certificate.
2. If the renewal application has been submitted in accordance with clause 3.2 (below) but the application is not complete by the expiry date of the certificate, then the candidate must apply for a late approval using form PSL28 and shall incur the financial penalty. Refer to PSL35 for certification fees.

Example. A candidate whose certificate expires on 18 Aug 2016 must submit their renewal application (CP16/CP17) to PCN by 7 July 2016, this is the latest date (or the 6 week point prior to expiry).

3. Renewal/recertification applications submitted to PCN after this 'latest date' (i.e. within the 6 weeks prior to certificate expiry) will be rejected and the candidate shall;
 - i. Apply to PCN for a **deferred approval** and
 - ii. Apply to an AQB for a recertification by written exam and the candidate will lose time on the certificate (as per the current PSL28 rule).

**recertification – in this instance refers to recertification via the structured credit system.*

BINDT
THE BRITISH INSTITUTE OF
NON-DESTRUCTIVE TESTING

VISION REQUIREMENTS (PSL/44 – issue 15 dated 1st October)

All PCN candidates and holders of PCN certification shall have natural or corrected vision satisfying the following minimum requirement:

PCN will recognise the Tumbling E Chart as a satisfactory near vision test please refer to NANDTB 24. (Existing documentation or Tumbling E vision test charts that continue to state NANDTB/24 remain valid but ISO 18490:2015 is the standard that must be adhered to.)

The candidate shall provide documented evidence of satisfactory vision in accordance with the following requirements:

- A. Corrected or uncorrected near-vision acuity shall permit reading **a minimum of Times Roman N4.5 or equivalent letters** (having a vertical height of not more than 1.6 mm – see note 1) at not less than 30 cm.
- B. Colour vision (see note 2) shall be sufficient that the candidate can distinguish contrast between the colours or shades used in the NDT method concerned as specified by the employer.

Subsequently to certification, the tests of visual acuity shall be carried out at least annually. Records of tests shall be retained by the employer or responsible agency and provided to PCN upon request. Failure to do so will invalidate all PCN certification.

NOTE 1. Laminated hand held vision test charts are available from a number of suppliers, including the Institute of Optometry*. Further information may be obtained from the Certification Services Division of the British Institute of NDT.
*<http://www.ioosales.co.uk/html/practice/eye06B.html>

NOTE 2. All candidates and holders of PCN certification will be required to have had colour perception assessed by the Ishihara 24 plate test. The test is required every five years. **In the event that a colour perception deficiency, indicated by misreading any of the first 17 plates, is detected during the Ishihara test, a further 'trade test' is to be carried out by the employer to ascertain whether the detected colour perception deficiency affects the individual's ability to perform the NDT for which he is certificated.** This trade test is to be documented and the record of the test made available to BINDT upon request.

In such cases as a new medical issue arises candidates are required to undergo further eye examinations as some medical conditions such as diabetes or a major medical condition can affect both near vision and colour perception.

Forms overleaf may be used to record the results of near vision, colour perception and contrast tests.

BINDT accepts that a *nominated official of an Authorised Qualifying Body, a PCN Level 3 certificate holder **or other medical professional**, having documented proof of satisfactory training in the administration of the test, **and** is medically recognised as competent to conduct such tests for candidates and holders of PCN certification.

**nominated officials must provide proof of appropriate training upon request by BINDT.*

The British Institute of Non-Destructive Testing is an accredited certification body offering personnel and quality management systems assessment and certification against criteria set out in international and European standards through the PCN Certification Scheme.
