

Governance

A management committee, elected by members at the ISCM Annual General Meeting, will be responsible for ensuring that the ISCM pursues its aims effectively.

A report to members will be published annually. This will include information on the past year's activities as well as plans for the future. Members will be encouraged to contribute to the strategic direction of the Society.

Administration

This will be provided by the full-time secretariat of The British Institute of Non-Destructive Testing, which already has a substantial CM community within its membership as well as experience in organising CM conferences and producing CM publications. The ISCM will be financed through membership subscriptions. Annual accounts will be produced and presented to members.

Advisory Board

The Management Committee will be supported by an Advisory Board consisting of people representing Liaison Members who have a strong interest in condition monitoring or related technologies.

The ISCM will achieve its aims through:

- A worldwide network for interchange of knowledge
- Encouraging and supporting national and international seminars and conferences
- A high-level online journal
- Providing input into the development of training and qualification programmes
- Contributing to the development of international standards
- Encouraging and supporting publishing initiatives
- Liaison with other national and international bodies.

The ISCM Secretariat, c/o BINDT,
Midsummer House, Riverside Way, Bedford Road,
Northampton NN1 5NX, United Kingdom.

I S C M
The International Society
for Condition Monitoring

The ISCM is an international forum for professional engineers and scientists engaged in research, development and best practice in condition monitoring.

Its purpose is to bring together an international community with the common aim of achieving excellence in the development and practice of condition monitoring and related diagnostic technologies.

Benefits of Membership

Individual, Corporate and Liaison Members

- Being part of an influential international community of condition monitoring engineers and scientists
- The *International Journal of Condition Monitoring*
- Access to a worldwide knowledge exchange network
- Participation in international conferences and seminars at a lower cost
- Discounts on books and other technical publications
- A membership certificate
- Membership of ISCM committees
- Member listing and link via the ISCM website

Corporate Members also receive:

- Discounted advertising rates in the *International Journal of Condition Monitoring*
- Discounted advertising on the ISCM website
- Discounted rates for exhibiting at ISCM events
- Free individual membership for two nominated members
