PSL/42 – ISSUE 6 REV A

PRE-CERTIFICATION EMPLOYMENT, ON-THE-JOB TRAINING & EXPERIENCE

The provisions regarding training contained within this document are intended to reflect those published in PCN General Requirements and, in the event of conflict between the two documents, only PCN General Requirements will apply.

General

On-the-job training in the applicable NDT method and field of application can be carried out to supplement classroom and practical training provided by a PCN approved organisation. Personnel gaining experience to meet the PCN requirement for certification must do so under the supervision of appropriately certificated personnel. Such training and experience must be documented and authenticated.

Training: levels 1 and 2

To be eligible for Level 1 or Level 2 examination, candidates must have successfully completed, prior to making application for examination, a British Institute of NDT validated course of training, at an Approved Training Establishment, which covers the relevant PCN syllabus. Approved training establishments will provide trainees and their employers with documentary proof of successful (or unsuccessful) completion of training.

The minimum duration of any training and experience in order to satisfy the PCN certification requirements is provided in the applicable PCN qualification and certification requirements (e.g., PCN/GEN or PCN/AERO) document.

Where there is a shortfall between the duration of approved training and the training required within a second party certification standard, i.e., EN 4179, the employer is responsible for making up for that shortfall before authorising or approving the employee to carry out NDT on his behalf. Employers should maintain records of on the job training, and may use the form provided within this document to record additional training.

The British Institute of Non-Destructive Testing is an approved certification body offering personnel and quality management systems assessment and certification against criteria set out in international and European standards through the PCN Certification Scheme.

DETAILS OF PRE-CERTIFICATION EMPLOYMENT

(to be maintained for each NDT method for which certification is to be sought)

Title and family name	
Other names	
National Insurance number	
Normal address, including post code	
PCN number (if known)
