Non-Destructive Testing (NDT) Apprenticeships – **Assessor's Competency Declaration and Job Description**

Apprenticeships

Document: AA204 • Issue 1 • Rev 1 • May 2018

Job Description

Because non-destructive testing is considered to be a highly-specialised engineering profession and is inextricably linked to international standards, UKAS accreditation, Engineering Council registration and certification, it is considered that the independent assessment organisation assessors should have extensive knowledge of NDT.

The independent assessment organisation will constitute an assessment panel, which will include two Engineering Council registrants at Incorporated Engineer (IEng) level or above, who are trained professional review interviewers. The independent assessment organisation assessment panel will not include anyone involved in an active apprenticeship from the same company or one of its subsidiaries or from the employing organisation or training providers.

One of the two assessors/interviewers will be identified as the lead assessor. In the event that the two assessors do not agree on the outcome of the assessment, the lead assessor will have the final say.

Statement of Competency

I have read the various documents that stipulate the professional requirements for the end-point assessment assessors and I can confirm that:

- I have extensive knowledge about NDT ☐
- I am registered with the Engineering Council as an IEng or CEng ☐
- I am a member of the end-point assessment organisation ☐
- I have undergone training as an assessor ☐
- I have undergone training as an interviewer ☐
- I have undergone training on the end-point assessment process ☐
- I have carried out Engineering Council professional review interviews (PRIs) ☐
- I would be aware of when I am conflicted and unable to take part in the end-point assessment ☐
