

UK National Aerospace NDT Board – Document Control

The NAndtB Secretariat originates, publishes and controls the documentation approved by the Board for publication. The following are the stages of the process:

1. draft documents at the request of the Board, or receive drafts from members' nominees;
2. progress through committee to final approval by the Board (no logo or issue date indicates draft in progress);
3. publish and distribute, recording status in this document;
4. review and revise after defined period (usually 2 years), then
5. resubmit for approval by the Board (or the same body as originally approved the document).

Please note a change of address for The British Institute of NDT, Midsummer House, Riverside Way, Bedford, Northampton, NN1 5NX – all documents will be amended as and when they are reviewed
