Insight, Non-Destructive Testing and Condition Monitoring
incorporating the European Journal of NDT
formerly the British Journal of Non-Destructive Testing

ISSN: 1354-2575

VOLUME 46 2004 - INDEXES

Key to issues

No 1 January ................................................. 1-64
No 2 February .............................................. 65-120
No 3 March .................................................. 121-184
No 4 April ..................................................... 185-248
No 5 May ....................................................... 249-312
No 6 June ...................................................... 313-384
No 7 July ...................................................... 385-440
No 8 August .................................................. 441-504
No 9 September ............................................ 505-584
No 10 October ............................................... 585-640
No 11 November .......................................... 641-712
No 12 December .......................................... 713-784

REGULAR FEATURES AND SHORT TITLES

Aerospace Group .................................................. 162, 349
Back to Basics - NDT Fundamentals .................. 279, 364, 414, 480, 650, 762
BINDT Awards ................................................... 59, 203, 484
BINDT Council/Strategy ....................................... 4
BINDT Training .................................................. 100, 429, 689
Book reviews ...................................................... 174, 238, 430
Comment ......................................................... 2, 66, 124, 186, 250, 314, 386, 442, 508, 586, 642, 714
Conference Proceedings .................................... 110, 622, 688, 766, 768
EFNDT ............................................................... 368, 486
Engineering Council ............................................ 299
Institute News ................................................... 102, 229, 299, 322, 417, 486, 567, 700, 765
Membership ....................................................... 102, 299, 417, 486, 700
NDT INFO .......................................................... 52, 111, 175, 239, 301, 375, 431, 494, 573, 630, 702, 774
Obituaries .......................................................... 6
Newsdesk ........................................................... 68, 68, 126, 188, 253, 317, 388, 444, 510, 588, 644, 716
Personality Profiles ............................................... 6
Product Showcase ....... 61, 118, 182, 246, 308, 381, 438, 501, 580, 636, 708, 780
Special Features .................................................
Conference Papers ............................................. 65
NDT in the Aerospace Industry .............................. 121
Thermal and Optical NDT Methods ...................... 193
Electromagnetic NDT .......................................... 256
NDT in the Rail Industry ...................................... 323
Condition Monitoring ........................................... 451
NDT in Power Generation ..................................... 516
Radiography ....................................................... 590
Ultrasound ....................................................... 650
NDT in Argentina ............................................... 723
Technical Literature ........................................... 110, 174, 233, 300, 430, 701

AUTHOR INDEX

Acuna G (see Carvajal K) .................................... 399
Ahmed T (see Shepard S M) ................................ 210
Al-Ghamdi A M, Cole P, Such R and Mba D ....... Estimation of bearing defect size with acoustic emission testing 758
Allan M .............................................................. 612
Almond D (see Avdelidis N P) ............................. 200
Al-Nuaimy W (see Zahran O) .............................. 338

Amaro M (with Santos J B, Cirne J S) 
Comparative study of different NDT techniques in the characterisation and quantification of the damage effects in carbon-epoxy laminates 559
Avdelidis N P (with Almond D P) 
Transient thermography as a through-skin imaging technique for aircraft assembly ........................................... 200
Avdelidis N P (with Moropoulou A) 
Detection of moisture in stonework and the effectiveness of conservation methods in historic structures 360
Balasubramaniam T (see Sony Baby) ........................ 26
Balasubramaniam K (see Baskaran G) ..................... 537
Baldev Raj (see Sony Baby) ................................. 26
Baldev Raj (see Kalyanasundaram P) ..................... 37
Baldev Raj (see Thirumavukarasu S) .................... 533
Baskaran G (with Balasubramaniam K, Krishnamuthy C V, Rao C L) 
Ultrasonic TOFD flaw sizing and imaging in thin plates using embedded identification technique (ESIT) ................................. 537
Belinco C 
AAENDE - The Argentine Association of NDE and Structural Evaluation 727
Belinco C (with others) 
Vibration developments at ENDE-CNEA 731
Bird C R (with Smith R A, Scruby C B, Jones L D) 
Improved ultrasonic spectroscopy procedure for roughness measurement of hidden corrosion surfaces 151
Bird C R (see Kleiner D) ........................................ 85
Birt E A (with Smith R A, Scruby C B, Jones L D) 
Improved ultrasonic spectroscopy procedure for roughness measurement of hidden corrosion surfaces 151
Birt E A (with Smith R A) 
A review of NDE methods for porosity measurement in fibre-reinforced polymer composites 681
Blakeley B 
Digital radiography - is it for you? 403
Boonsang S (with Zainal J, Dewhurst R J) 
A review of NDE methods for porosity measurement in fibre-reinforced polymer composites 681
Booth J A 
Synthetic aperture focusing techniques in time and frequency domains for photoacoustic imaging 196
Bouhadjer A 
An improved design of an ultrasonic apparatus for characterising material samples ........................................ 554
Boyce B R (see Honlet M) ..................................... 193
Bradley M
HSE UPDATE: Size isn’t everything - when is a transportable load not a transportable load? 666

Buckley J (see Smith R A) ................................. 88

Buenfeld N R (see Pu S H) ................................. 350

Burch S F (with Collett N, Chapman R K, Toft M W)
Experimental validation of the TRANGLE and related NDT codes for modelling the ultrasonic inspection of rough cracks 74

Buttle J (with Dalzell W, Thayer P J)
Early warnings of the onset of rolling contact fatigue by inspecting the residual stress environment of the railhead 344

Calvert G C (see Honlet M) ............................... 193

Calvert G (with Smith G, Thomson B)
The use of thermoelastic stress analysis to identify defects in polymeric materials 550

Carrasco M F (see Miretti R) .............................. 748

Carvajal K (with Chacon M, Mery D, Acuna G)
Neural network method for failure detection with skewed class distribution 399

Cavaccini G (see Deng W) ................................. 157

Cawley P (see Pu S H) ........................................ 350

Cegla F (see Pu S H) ........................................... 350

Chacon M (see Carvajal K) ............................... 399

Chapman R K (see Burch S F) ............................ 74

Chan F W Y (with Tsang S W F)
Earth echo sounding technique for quality control of drilled shaft foundation 17

Cirne J S (see Amaro A M) ................................. 559

Clapham L (see Montgomery A) ......................... 260

Cochran S (see Marin-Franch P) ......................... 653

Cochran S (see Kirk K J) ................................. 662

Collett N (see Burch S F) ................................. 74

Cooper M A (see Johnston C) ............................ 606

Contain J
Underpinning plant condition and integrity by means of specialised NDT inspections 520

Crane R M (see Ratcliffe C P) ............................ 10

Crocker R
Ultrasonic vehicle-based rail inspection 323

Crowther P
Practical experience of phased array technology for power station applications 525

Crowther P
Non-destructive evaluation of coatings for land-based gas turbines using a multi-frequency eddy current technique 547

da Silva R R (see Ferreira D B B) ......................... 282

Dalzell W (see Buttle J) ................................. 344

Deng W (with Shark L-K, Matuszewski B J, Smith J P, Cavaccini G)
CAD model-based inspection and visualisation for 3D NDT of complex aerostuctures 157

Deprins E
Computed radiography in NDT applications 590

Dewhurst J R (see Boonsang S) ......................... 196

Dixon S (with Edwards R S, Jian X)
Inspection of rail track head surfaces using electromagnetic acoustic transducers (EMATs) 326

Dixon S (see Jian X) ........................................... 671

Drinkwater B W (see Poon W) ............................. 80

Drinkwater B W (with Dwyer-Joyce R S)
The on-line measurement of lubricant film thickness for condition monitoring 456

Drinkwater B (see Holmes C) ............................ 677

Drozdz M (see Pu S H) ........................................ 350

Dury J C
NDT FUNDAMENTALS: Ultrasonics.
Part 1. Basic principles of sound .......................... 650
Part 2. Properties of sound waves ......................... 762

Dwyer-Joyce R S (see Drinkwater B W) ............... 456

Edalati K (with Ranikhah N, Kermani A, Seiedi M, Movafeghi A)
In-service corrosion evaluation in pipelines using gamma radiography - a numerical approach 396

Edalati K (see Movafeghi A) ............................... 594

Edgar D (see Smith R A) ................................... 88

Edwards R S (see Dixon S) ................................. 326

Edwards R S (see Jian X) ................................. 671

Espejo H (with Ruch M)
A history of NDT in Argentina .......................... 723

Fah A (see Safizadeh M S) ................................. 355

Fateh M (see McNamara J D) ............................ 331

Fava J (Ruch M)
Design, construction and characterisation of ECT sensors with rectangular planar coils 268

Fei R (see Jiao J) .......................................................... 392

Fernandes B (see Miller G) ............................... 82

Ferreira D B B (with da Silva R R, Rebello J M A, Siqueira M H S)
Failure mechanism characterization in composite materials using spectral analysis and the wavelet transform of acoustic emission signals 282

Forsey D S (see Safizadeh M S) ......................... 355

Frigerio T (with others)
Development and application of computed tomography in the inspection of reinforced concrete 742

Fu Pan (with Hope A D)
An advanced fuzzy pattern recognition architecture for condition monitoring 409

Gachagan A (see Robertson D) ........................... 658

Gaydecki P (see Miller G) ................................. 82

Ghiselli A M (see Belinco C) ............................. 731

Gilbert D J
Insight goes online via Extenza .......................... 694

Gillespie Jr. J W (see Ratcliffe C P) ...................... 10

Grether R O (see Miretti R) ............................... 748

Hansen J (see Jenkins S A) ............................... 265

Hansen J
The eddy current inspection method
Part 1. History and electrical theory ...................... 279
Part 2. The impedance plane and probes 364
Part 3. Instrumentation and applications 414
Part 4. Applications, practical testing and advanced concepts 480

Harrison D J (see Smith R A) ............................. 142

Hayward G (see Robertson D) ........................... 658

He C (see Jiao J) ......................................................... 392

Henrich D J (see Hiliger W) ............................... 147

Hesketh G (see Moore T) ................................. 468
SUBJECT INDEX

ACOUSTIC EMISSION METHODS

Acoustic emission monitoring using a multimode optical fibre sensor
S Vandenhove, T S Van Huffel, P Cole, R Such, D Mba .............................219

Failure mechanism characterisation in composite materials using spectral analysis and the wavelet transform of acoustic emission signals
D B B Ferreira, R R da Silva, M Rebelo, M H S Quegra ................................282

A new technique for modal acoustic emission pipeline leak location with sensor
Jingjin Jiao, Cunfu He, Bin Wu, Renyuan Fei ............................................392

Acoustic emission testing of an acid sphere
M Peacock .................................................................................................461

The status of acoustic emission in Argentina
J E Ruzzante, M I Lopez Pumaraga, R Piotrkowski .................................733

Estimation of bearing defect size with acoustic emission testing
A M Al-Ghamdi, P Cole, R Such, D Mba ..................................................758

ACOUSTIC TESTING

Microscopic and acoustic testing of medium-voltage composite insulator carrying rods
P Ranachowski, Z Ranachowski, F Rejmund, J Stankiewicz ........................223

ACFM

ASTM standard practice produced for the examination of welds using the alternating current field measurement (ACFM) technique
A Raine ......................................................................................................44

Defect evaluation using the ACFM technique
C-K Low, B S Wong ..................................................................................598

AEROSPACE

CAD model based inspection and visualisation for 3D NDT of complex structures
W Deng, L-K Shark, B J Matuszewski, J P Smith, G Cavaccini .........................157

European Research Projects: advanced integrated NDT concepts for the aerospace industry
.................................................166

Transient thermography as a through-skin imaging technique for aircraft assembly
N P Avdelidis, D P Almond ........................................................................200

AEROSPACE

Direct 3D wholefield strain imaging to determine structural integrity and residual life
J Jones, L Lobo, R Roach, J Ibrahim, J Petting, J Tyner ..................................219

A hierarchical multi-stage data fusion approach to NDE of aero-engine components
T Moore, A Starr, G Hesketh .....................................................................468

BOND TESTING

Assessment of bond state in lap-shear joints by guided wave transmission monitoring
F Lanza di Scalea, P Rizzo, A Marzani ........................................................135

CERTIFICATION AND TRAINING

The development of Level 1 training courses in vibration analysis
A D Hope ....................................................................................................98

Condition monitoring with thermography: training, certification and accreditation
C Pearson .................................................................................................164

Condition monitoring: certification of condition monitoring and diagnostic personnel for lubrication management and analysis
M H Jones ..................................................................................................227

Nuclear field conversion to conventional activity in the development of qualification and certification systems of NdT and welding personnel
B D Kurchart .............................................................................................729

Certification ASNT Level 3: Changes to renewal programme
S J Lavender ............................................................................................366

COMPOSITES TESTING INCLUDING CFRP

Damage detection in large composite structures using a broadband vibration method
C P Ratcliffe, R M Crane, J W Gillespie Jr ................................................10

Inspection of CFRP components by ultrasonic imaging with air coupling
W Hillger, R Meier, R Henrich ......................................................................147

Microscopic and acoustic testing of medium-voltage composite insulator carrying rods
F Ranachowski, Z Ranachowski, F Rejmund, J Stankiewicz ..........................223

A review of NDE methods for porosity measurement in fibre-reinforced polymer composites
E A Birt, R A Smith ..................................................................................681

CONCRETE TESTING

A sensor for imaging steel in reinforced concrete structures and visualisation of surface corrosion: incorporating real-time DSP
S H Pu, F Ceglia, M Drodza, M J S Lowe, P Cavley, N R Buenfeld ...............350

Monitoring the setting and early hardening of concrete using an ultrasonic waveguide
S H Pu, F Ceglia, M Drodza, M J S Lowe, P Cavley, N R Buenfeld ...............350

Combined non-destructive methods applied to normal-weight and light-weight concrete
R Miretti, M F Carrasco, R O Grether, C R Passerino ....................................748

CONDITION MONITORING

Automatic monitoring of gas turbine air intakes using colour imaging techniques
P Wilkinson, L-K Shark ............................................................................94

The development of Level 1 training courses in vibration analysis
A D Hope ....................................................................................................98

Condition monitoring with thermography: training, certification and accreditation
C Pearson .................................................................................................164

Certification of condition monitoring and diagnostic personnel for lubrication management and analysis
M H Jones ..................................................................................................227

An advanced fuzzy pattern recognition architecture for condition monitoring
Pan Fu, A D Hope ....................................................................................409

Bearing fault diagnosis using multi-layer neural networks
L Wang, A D Hope ....................................................................................451

The in-line measurement of lubricant film thickness for condition monitoring
B W Drinkwater, R S Dwyer-Joyce ............................................................456

A hierarchical multi-stage data fusion approach to NDE of aerospace components
T Moore, A Starr, G Hesketh .................................................................468

Induction motor fault detection using vibration and stator current methods
W Li, C K Mechefske .................................................................................473

The development of condition monitoring tools for the power generation industry
R Lyon .......................................................................................................516

New techniques in analysis of dynamic parameters of rail fastening
J Smuty, I Pazderni ..................................................................................612

Electric motor fault diagnosis using artificial neural networks
Lingxin Li, C K Mechefske, Weidong Li ....................................................616
ULTRASONIC PROBES including ARRAYS
An improved design of an ultrasonic apparatus for characterising material samples .......................................................... 554
A Boshadjara ................................................................. 554
Piezocrystal polymer composites: new materials for transducers for ultrasonic NDT .......................................................... 653
P Marois-Franch and others ........................................... 653
Minimisation of mechanical cross-talk in periodic piezoelectric composite arrays ............................................................... 658
D Robertson, G Hayward, A Gaughan, P Reynolds .............................................. 658
Lithium niobate piezocomposite phased arrays operating at high temperature ................................................................. 662
K J Kirk, N Schmarje, S Cochran ......................................... 662
Modelling ultrasonic generation for Lorenz force EMATS ................................................................................................ 671
X Jian, S Dixon, R S Edwards .............................................. 671
Phaseless arrays - pansonic or gimmick? ................................................ 675
A C Whitehead .............................................................. 675
The post-processing of ultrasonic array data using the total focusing method .......................................................................................... 677
C Holmès, B Drinkwater, P Wilcox ........................................ 677
ULTRASONIC TESTING
Earth echo sounding technique for quality control of drilled shaft foundations ........................................................................ 17
Fiona W Y Chan, S W F Tsang ............................................. 17
Sizing of cracks embedded in sub-cladding using the ultrasonic synthetic aperture focusing technique (SAFT) .................................................. 26
Sony Baby and others ......................................................... 26
DMAC - a versatile tool for 1-D pattern analysis for ultrasonic signals ................................................................. 31
Kalyanansundaram, C Rajagopolan, Baldev Raj ...................... 37
Experimental validation of the TRIANGLE and related NDT codes for modelling the ultrasonic inspection of neck cracks .................. 320
S F Burch, N Collett, R K Chapman, M W Toft ............................ 74
Assessment of bond state in lap-shear joints by guided wave transmission monitoring ........................................................ 338
F Lanza di Scalea, P Rizzo, A Marzani ...................................... 135
An inspection robot for boiler tube using magnetic and ultrasonic methods ................................................................. 275
X C Song, X J Wu, Y H Kang ............................................... 275
Korean railways bake the bullet with USL ultrasonic system ................................................................. 318
Automatic segmentation of TOFD images using time-frequency techniques - application to rail track defect detection .................. 344
O Zahran, W Al-Nuaimy ..................................................... 344
Monitoring the setting and early hardening of concrete using an ultrasonic waveguide ........................................................ 338
S H Pu and others .............................................................. 338
Underpinning plant condition and integrity by means of specialised NDT inspections ................................................................. 520
J Costain ................................................................. 520
Ultrasound TOFD flaw sizing and imaging in thin plates using embedded signal identification technique (ESIT) .................................................. 537
G Baskaran and others ..................................................... 537
Practical application of ultrasonic testing in nuclear and conventional industry ................................................................. 754
Kutchadjan ................................................................. 754
NDT FUNDAMENTALS: Ultrasonics .................................................. 650
J C Drury
Part 1: Basic principles of sound .................................................. 650
Part 2: Properties of sound waves .................................................. 762
Evaluation of close cracks by analysis of subharmonic ultrasound .......................................................................................... 666
Kazuchu Yamanaoka, Toshiyuki Hibara, Toshioh Tsuchii .......................................................................................... 666
ULTRASONIC SPECTROSCOPY
Improved ultrasonic spectroscopy procedure for roughness measurement of hidden corrosion surfaces .................................................. 151
E A Birt, R A Smith, C B Scruby, L D Jones .................................................. 151
VIBRATION ANALYSIS
Damage detection in large composite structures using a broadband vibration method ................................................................. 10
C P Ratcliffe, R M Crane, J W Gillespie Jr .................................................. 10
The development of Level 1 training courses in vibration analysis .......................................................................................... 98
A D Hope ................................................................. 98
Vibration developments at ENDE-CNEA .................................................. 731
C Belinco and others ........................................................... 731
WELD INSPECTION
Radiography of thin wall stainless steel piping welds .................................................. 23
G Wilson, S Smalley ........................................................... 23
Ultrasonic phased array inspection technology for the evaluation of friction stir welds ................................................................. 31
C R Bird ................................................................. 31
ASTM standard practice produced for the examination of welds using the ACFM technique ................................................................. 44
A Raine ................................................................. 44
Signal processing for quality assurance in friction stir welds .......................................................................................... 85
D Kleiner, C R Bird ........................................................... 85
Defect charactisation using magnetic flux leakage inspection of tailor-welded blanks ................................................................. 260
A Montgomery, P Wild, L Clapham .................................................. 260
Modelling of a ‘Weld Scan’ eddy current probe .................................................. 265
A Jenkins, J Hansen ........................................................... 265
