<u>Micro-X-ray computer tomography in archaeology: analyses of a Bronze Age sword,</u> <i>by M Mödler</i>	323
<u>Volume and surface measurements of flaws in polymeric insulators using X-ray computed tomography,</u> <i>by W C Godoi, K de Geus, V Swinka-Filho and R R da Silva</i>	554

COMPUTED TOMOGRAPHY continued

- Digital radiography-based 3D-CT imaging for the NDE of solid rocket propellant systems,
by V R Ravindran, C Sreelakshmi and S Vibinkumar564

DATA FUSION

- Data fusion in automated robotic inspection systems,
by M Friedrich, S G Pierce, W Galbraith and G Hayward88

ELECTRICAL METHODS

- Depth profiling of defects in stainless steel using electric potential sensors and a non-contact AC potential drop method,
by R Prance, W Gebrial and C Antrobus95
- Crack growth monitoring on industrial plant using established electrical resistance 'scanner' technology,
by D M Farrell, B J Robbins, J Stallings, S Cardoso and W Bakker690

GUIDED WAVES

- Estimation of adhesive bond strength in laminated safety glass using guided mechanical waves: Part I. An energy velocity approach,
by S Huo and H Reis146
- Estimation of adhesive bond strength in laminated safety glass using guided mechanical waves: Part II. An attenuation approach,
by S Huo and H Reis202

IMAGE PROCESSING

- Image processing of radiographs of tube-to-tubesheet weld joints for enhanced detectability of defects,
by K Arunmuthu, P Arun kumar, T Saravanan, John Philip, T Jayakumar and Baldev Raj298

IMAGING

- A near infrared technique for non-destructive evaluation,
by P Pallav, G Diamond, D Hutchins and T H Gan244
- Miniaturised computational imaging system design for super-resolution, large field-of-view and extended depth-of-field with applications to surveillance, medical imaging, and condition-based maintenance,
by N K Bose304

LEAK TESTING

- The body is the sensor,
by M Thompson and M L Harper98

MATERIALS CHARACTERISATION

- Characterisation of metallic powder impregnated pastes using polychromatic X-radiography,
by J C Austin, C R Day, A T Kearon, S Valussi and P W Haycock550

MODELLING

- Ultrasonic inspection of tilted defects using the 'corner effect' – modelling and experimental validation,
by R K Chapman, S F Burch, N J Collett and L J Fradkin66
- Integrating flaw-response modelling tools used for inspection qualification into a Multi-Agent System software platform,
by J P McKenna, N McLean, A Gachagan, S D J McArthur and G Hayward70
- Sound field modelling using SimulUS,
by C Nageswaran, C R A Schneider and C R Bird258

OPTICAL METHODS

- Reflective fringe pattern technique for non-destructive subsurface flaw detection,

PIPING AND PIPELINE INSPECTION

- Advances in defect characterisation using long-range ultrasonic testing of pipes,
by P Catton, P Mudge and W Balachandran480
- Computer modelling of the computed radiographic inspection of wall loss flaws in pipes for image simulation and POD prediction,
by S F Burch and B A Stow485

RADIOGRAPHY including DIGITAL RADIOGRAPHY

- Automatic weld bead extraction from digitised radiographs using grey level intensity profiles and least-squares fitting,
by T Y Lim, M M Ratnam and M A Khalid8
- Digital imaging system for linac X-rays for NDE of case bonded solid rocket motors,
by B Ghose and S N Singh124
- Computed radiography deployed by a subsea remotely operated vehicle,
by J R McNab and B Steel138
- Segmentation of weld defects in radiographs using rank-levelling and background subtraction,
by S L Soo, M M Ratnam, Z Samad and M A Khalid188
- Fast neutron radiography and tomography of wood,
by K Osterloh, C Raedel, U Zscherpel, D Meinel, Uwe Ewert, T Buecherl and A Hasenstab307
- Enhanced sensitivity detection of defects in gas turbine blades of aero-engine and hairpin tubes of heavy water plant using microfocal radiography,
by T Saravanan, S Bagavathiappan, John Philip, T Jayakumar and Baldev Raj560
- Advanced controls for X-ray units: do they really help?
by P R Vaidya569

RAIL INSPECTION

- Data fusion for automating condition monitoring of wooden railway sleepers,
by S Yella, M S Dougherty and N K Gupta356
- Detection and quantification of rail contact fatigue cracks in rails using ACFM technology,
by M Ph Papaelias, C Roberts, C L Davis, M Lugg and M Smith364
- Ultrasonic detection of surface-breaking railhead defects,
by R S Edwards, C Holmes, Y Fan, M Papaelias, S Dixon, C L Davis, B W Drinkwater and C Roberts369

ROPE TESTING

- In-situ non-destructive assessment of a haulage rope in a monocable zigback passenger ropeway,
by D Basak, S Pal and D Chandra Patranabis136
- A connectionist model for lock coil rope fault prediction,
by D Basak, S Pal, P Basak, D Palit and D Chandra Patranabis501

SHEAROGRAPHY

- Benchmarking shearographic NDT for composites,
by J Gryzagoridis and D Findeis249

SIGNAL PROCESSING

- A comparative study of time-frequency analysis techniques in the case of signal processing for ultrasonic NDT,
by R Raišutis, O Tumšys, R Kažys and L Mažeika628

STRUCTURAL HEALTH MONITORING

- Health monitoring of an emblematic monument by terrestrial laser scanning,
by A Muñoz-Nieto, D Gonzalez-Aguilera, J Gomez-Lahoz and J Herrero-Pascual498
- Monitoring infrastructure using global navigation satellite systems,
by C J Brown and G W Roberts570
- An artificial intelligence approach for measurement and monitoring of pressure at the residual limb/socket interface – a clinical study,
by R Amali, S Noroozi, J Vinney, P Sewell and S Andrews374

THERMOGRAPHY

- Wavelength diversity based infrared super-resolution and condition-based maintenance,
by N K Bose, U Srinivas and R Lee Culver423
- Condition monitoring of exhaust system blowers using infrared thermography,
by S Bagavathiappan, T Saravanan, N P George, John Philip, T Jayakumar and Baldev Raj512

ULTRASONIC PROBES including ARRAYS

- A modular FPGA-based ultrasonic array system for applications including non-destructive testing,
by S Triger, J Wallace, L Wang, D R S Cumming, J-F Saillant, F Afroukh and S Cochran74
- Sampling phased array – a new technique for ultrasonic signal processing and imaging,
by J Verkoijen and A Boulavinov153
- Curved arrays for improved horizontal sizing in small pipe welds,
by M Moles and J Zhang253
- Development of a procedure for the ultrasonic examination of 9% nickel LNG storage tank welds using phased array technology,
by V Chardome and B Verhagen490
- Sizing in the phased array technique using diffraction and amplitude displacement,
by D Nardoni, P Nardoni, M Certo and G Nardoni574
- Immersion transmit-receive longitudinal phased array probe for stainless steel,
by C Nageswaran, C R Bird and A Whittle673
- Recent experiences using AIRIS as a platform for phased array ultrasonic and remote visual inspections,
by G R Elston685

ULTRASONIC TESTING

- Dispersion of guided waves in viscous liquid-filled pipes,
by D Ta, W Wang, Y Wang and L H Le14

- Ultrasonic detectability of potentially closed cracks from cold-worked holes under loaded conditions,
by L J Nelson, K Brown, A Young, L D Jones and R A Smith78

- An ultrasonic on-line test method for detecting remotely and automatically energised porcelain post insulators in high-voltage substations,
by Yang Enhui, Deng Qi, Mo Jinjiu, Liang Qinghua and Wang Shigang209

- Longitudinal wave attenuation measurements in ductile cast iron,
by T Seldis623

- Shear wave ultrasonic coupling performance of different adhesives,
by A M Chaston, C Edwards, S L Evans and K M Holford633

- Acoustic pulse signal diffraction from different reflectors in an elastic medium,
by D V Perov and A B Rinkevich216

- TOF-FS: a technique for detection and monitoring of wall loss defects in large areas of vessels and pipework,
by S Terpstra, F Hoeve, Z McCann and M Stone476

VIBRATION ANALYSIS

- Root cause and vibration signal analysis for gearbox condition monitoring,
by W Bartelmus195

VISUAL INSPECTION

- The development and application of a novel camera system for visual inspection of graphite fuel channels at Magnox nuclear power stations,
by A L Smith and P J Norman668

WELD INSPECTION

- Final results of the NESC-III non-destructive testing blind round robin trials on dissimilar metal welds,
by B Eriksen, A Eriksson and R Houghton616

- Evaluation of the phased array transmit-receive longitudinal and time-of-flight diffraction techniques for inspection of a dissimilar weld,
by C Nageswaran and Colin R Bird678
