

Insight, Non-Destructive Testing and Condition Monitoring incorporating the European Journal of NDT formerly the British Journal of Non-Destructive Testing

ISSN: 1354-2575

VOLUME 52 2010 – INDEXES

Key to issues

No 1	January	1-52	No 7	July	345-400
No 2	February	53-112	No 8	August	401-460
No 3	March	113-168	No 9	September	461-520
No 4	April	169-232	No 10	October	521-584
No 5	May	233-284	No 11	November	585-640
No 6	June	285-344	No 12	December	641-696

REGULAR FEATURES AND SHORT TITLES

Academia NDT International	
Meeting Report	468

SUBJECT INDEX

ACOUSTIC EMISSION METHODS

- Investigation on acoustic emission source of bridge crane,
by Gongtian Shen and Zhanwen Wu144
- Observation of time-frequency characteristics of the acoustic emission from defects in rolling element bearings,
by Yongyong He, Xinming Zhang and M I Friswell412

CONDITION MONITORING

- Development of an intelligent system for detection of exhaust gas temperature anomalies in gas turbines,
by A D Kenyon, V M Catterson and S D J McArthur419
- Handling sparse data problems in the context of monitoring multiple parameters in complex systems,
by S King, P Flint and S Sundaram424
- Anomaly detection of the tapered roller bearings with statistical data-driven approaches,
by S L Chen, L Wang, R J K Wood, R Callan and H E G Powrie428
- Local damage diagnosis in gearboxes using novel wavelet technology,
by K C Gryllias, L Gelman, B Shaw and M Vaidhianathasamy437
- Intelligent fault classification of a tractor starter motor using vibration monitoring and adaptive neuro-fuzzy inference system,
by E Ebrahimi and K Mollazade561
- Monitoring variation of surface residual stresses in shot peened steel components by the magnetic Barkhausen noise method,
by S Savas and C Hakan Gür672

ELECTROMAGNETIC METHODS

- Applications of adaptive fuzzy lifting wavelet transform in MFL signal processing,
by Fengzhu Ji, Shiyu Sun, Changlong Wang, Haipeng Zhang and Dongyan Liu16
- Improved detection performance using a multi-frequency method of eddy current testing for outside circumferential cracks near an expansion of heat exchanger tubes,
by S Narishige, A Nishimizu, M Koike, Y Abe, Y Narumi and T Tsuge298
- Computation of coil-induced voltage due to a defect-free plate using Stehfest's method for pulsed eddy current evaluation,
by Mengbao Fan, Binghua Cao and Yuqiao Wang302
- Studies on stress-magnetism coupling effect for 35 steel components,
by Ren Shang-kun, Ou Yang-chun, Fu Ren-zhen and Fu Yue-wen305
- Application of ACFM for inspection through metal coatings,
by B Blakeley and M Lugg310
- Lift-off influence analysis during the micromagnetic stress evaluation of flexible riser tensile armours,
by C O D Martins and A Reguly316
- Investigation of directional eddy current complex measurements for defect mapping,
by A Simm and G Y Tian320
- Further developments in high-speed detection of rail rolling contact fatigue using ACFM techniques,
by M Ph Papaalias, C Roberts, C L Davis, B Blakeley and M Lugg358
- Eddy current test method for early detection of rolling contact fatigue (RCF) in rails,
by H-M Thomas, A Dey and R Heyder361

GUIDED WAVES

- Guided wave inspection penetration power in viscoelastic coated pipes,
by Jia Hua and J L Rose195

IMAGE PROCESSING

- Reconstructing the back of a defect from its mirror image,
by T D Hutt and F Simonetti82

IMAGING

- Frequency modulated thermal wave imaging techniques for non-destructive testing,
by V S Ghali and R Mulaveesala475

INSPECTION QUALIFICATION AND RELIABILITY

- Experience with code cases,
by J R Lilley178
- Use of simulation in the NDE qualification process in France: application to the EPR RPV inspection,
by J C Fasham, R Toth, L Truchetti, Y Bouveret and O Sornique652
- Derivation and use of probability of detection curves in the nuclear industry,
by L Gandossi and K Simola657
- Artificial seeding of fatigue cracks in NDI reference coupons,
by M Yanishevsky, M Martinez, C Mandache, M Khan, A Fahr and D Backman664

LASER TECHNIQUES

- Applications of laser tapping and laser ultrasonics to aerospace composite structures,
by A Blouin, C Néron, B Campagne and J-P Monchalain130
- A study on laser-processed grinding burn simulation and analysis based on Barkhausen noise measurement,
by A Sorsa, K Leiviskä, S Santa-aho, M Vippola and T Lepistö293

OPTICAL METHODS

- Impact damage detection on composites using optical NDT techniques,
by J Gryzagoridis and D Findeis248
- Detection capabilities of state-of-the-art shearography systems,
by E Moser252
- An investigation on the application of a non-destructive optical strain measurement system to fracture toughness testing,
by T R S Lima, C O D Martins, A Reguly and J F Santos255
- Safety first with UV light,
by P Jackson258
- Bond monitoring in temperature-dependent applications by FBG spectra decomposition,
by S Sosamma, M Kasinathan, C Pandian, C Babu Rao, T Jayakumar, N Murali and Baldev Raj617

RADIOGRAPHY including DIGITAL RADIOGRAPHY

- Non-destructive evaluation – a tool to identify genuine shaligram,
by K V Rajkumar, S Bagavathiappan, G K Sharma, G S Kumar, John Philip, C Babu Rao and T Jayakumar13
- Automatic classification of weld defects in radiographic images,
by Qingming Shen, Jianmin Gao and Cheng Li134
- Comparison method to differentiate between painted objects using polychromatic X-rays,
by J C Austin, C R Day, A T Kearon, D L Evans and P W Haycock140
- Automated flaw detection in X-ray tomography of polymer insulators,
by W C Godoi, K de Geus, R R da Silva and V Swinka Filho533
- Automatic detection and sizing of pores from radiographic images using the Hough transform,
by K Arunmuthu, P Arun Kumar, T Saravanan, John Philip, T Jayakumar and Baldev Raj540

RAIL INSPECTION

- Dynamic properties of railway track and its components: recent findings and future research direction,
by S Kaewunruen and A M Remennikov20

SIGNAL PROCESSING

- High-resolution CT-based defect analysis and dimensional measurement,
by O Brunke91
- CUDA-based GPU computing for fast tomography visualisations,
by N Saxena, G L Baheti, D K Tripathi, K C Songara,
L R Meghwal and V L Meena262
- Improving the classification accuracy of the weld defect by chaos-search-based feature selection,
by Qingming Shen and Jianmin Gao530
- Flaw detection in aluminium die castings using simultaneous combination of multiple views,
by C Pieringer and D Mery548

STRUCTURAL HEALTH MONITORING

- Non-destructive methods for materials' state awareness monitoring,
by P B Nagy61
- Accurate measurement of drill pipe internal upset,
by K Hastings326
- Detection and assessment of wood decay in glulam beams using a decay rate approach,
by A Senalik, F C Beall and H Reis553

THERMOGRAPHY AND THERMAL METHODS

- Comparison of the defect detection capabilities of flash thermography and vibration excitation shearography,
by S G Pickering and D P Almond78
- Pulsed eddy current thermography: system development and evaluation,
by J Wilson, G Y Tian, I Z Abidin, Suixian Yang and D Almond87
- Comparing infrared thermography and ESPI for NDE of aircraft composites,
by D Findeis, J Gryzgoridis and C Lombe244
- Stress monitoring and analysis using lock-in thermography,
by S George, S Goravar, D Mishra, M T Shyamsunder, P Sharma,
G K Padmashree, P S Kumar, P Bremond and K Mukherjee470
- NDTE using flash thermography: numerical modelling and analysis of delaminations in GRP pipes,
by G K Vijayaraghavan, M C Majumder and K P Ramachandran481
- Reliable thermosonic inspection of aero engine turbine blades,
by G Bolu, A Gachagan, G Pierce and G Harvey488
- Application of flash thermography for crack identification in concrete materials,
by F C Sham, W T Xu and T Lo494

ULTRASONIC TESTING

- Non-destructive evaluation – a tool to identify genuine shaligram,
by K V Rajkumar, S Bagavathiappan, G K Sharma, G S Kumar, John Philip,
C Babu Rao and T Jayakumar13
- Optimisation of ultrasonic inspection to detect small transverse re-heat cracks on hydroprocessing reactors,
by G Zappavigna and C Pedrinzani23
- Application of ultrasonic iterative deconvolution technique to the case of internal defect detection in multi-layered PCB components,
by R Raišutis, O Tumšys, R Kažys and L Mažeika27
- The effect of probe oscillation (skew) on reflected signal amplitudes,
by J Zhang, E A Ginzel and M Moles34
- 3D ultrasonic inspection of anisotropic aerospace components,
by C J L Lane, T K Dunhill, B W Drinkwater and P D Wilcox72
- Trend analysis of acousto-ultrasonic signals for integrity evaluation of metallic aerostructures,
by L-K Shark, Y Zhang and C Boller124
- Ultrasonic condition monitoring using thin-film piezoelectric sensors,
by K J Kirk, J Elgoyhen, J P Hood, D Hutson, R S Dwyer-Joyce,
J Zhang and B W Drinkwater184
- Weld crack testing method using ultrasonic TOFD technique,
by Chi Dazhao, Gang Tie, Yao Yingxue and Yuan Yuan188
- DGS curve evaluation applied to ultrasonic phased array testing,
by M Certo, G Nardoni, P Nardoni, M Feroldi and D Nardoni192
- Three-dimensional visualisation and evaluation techniques for volumetrically scanned data of ultrasonic phased arrays,
by S Kitazawa, N Kono, A Baba, Y Adachi, M Odakura and O Kikuchi201
- Application of ultrasonic non-destructive characterisation on materials' quality evaluation,
by Xuemei Zhao, Tie Gang, Xuesong Liu and Shuqi Li206
- Towards automatic flaw sizing using ultrasonic time-of-flight diffraction,
by A Al-Ataby, W Al-Nuaimy and O Zahran366
- Coping with failed elements on an array: a modelling approach to the technical justification,
by C Nageswaran372
- Ultrasonic measurement of the temperature dependence of elastic moduli in light alloys,
by J Szelqżek, S Mackiewicz and P Gutkiewicz380
- Steel hardness evaluation based on ultrasound velocity measurements,
by T Łukomski and T Stepinski592
- Automatic detection and classification of weld flaws in TOFD data using wavelet transform and support vector machines,
by A Al-Ataby, W Al-Nuaimy, C R Brett and O Zahran597
- Acoustic and mechanical anisotropy in the testing of explosively welded joints,
by B Wronka603
- Corrosion detection in welded steel plates using Lamb waves,
by J P Sargent609
