

Insight, Non-Destructive Testing and Condition Monitoring incorporating the European Journal of NDT formerly the British Journal of Non-Destructive Testing

ISSN: 1354-2575

VOLUME 54 2012 – INDEXES

Key to issues

No 1	January	1-60	No 7	July	357-416
No 2	February	61-116	No 8	August	417-472
No 3	March	117-180	No 9	September	473-528
No 4	April	181-244	No 10	October	529-584
No 5	May	245-300	No 11	November	585-648
No 6	June	301-356	No 12	December	649-704

REGULAR FEATURES AND SHORT TITLES

Associate Members	60, 116, 180, 244, 300, 356, 416, 472, 528, 584, 648, 704
BINDT Awards	9, 425
Comment	2, 62, 118, 186, 246, 302, 358, 418, 474, 530, 588, 652
Conference Reports	
2012 Aerospace Symposium	399
NDT 2012 – The 51st Annual British Conference on NDT	628
WCNDT 2012 – 18th World Conference on NDT	479
Institute Membership	64, 190, 248, 420, 534
Institute News	120
Institute Notices	305
International Diary	45, 100, 160, 226, 284, 341, 402, 457, 513, 568, 633, 688
Membership	534
NDT Info	49, 104, 166, 232, 289, 344, 405, 461, 517, 571, 636, 692
Newsdesk	4, 64, 120, 188, 248, 304, 360, 420, 476, 533, 590, 654
Obituary	
Peter David Weedon	8
Product Showcase	57, 113, 174, 240, 296, 353, 412, 469, 525, 578, 645, 701
Profile	
Chris Scruby	96
Special Features	
Acoustic Emission	117, 649
Advanced Ultrasonics	357
Computed Tomography	529
Condition Monitoring	417
Conference Papers	61
Electromagnetics	117
In-Service Inspection	301
Novel Applications	1
Thermal Methods	473
Ultrasonics	181, 585

AUTHOR INDEX

SUBJECT INDEX

ACOUSTIC EMISSION METHODS

- Engine diagnosis method based on vibration and acoustic emission energy,
by M Muñoz, F Moreno, N Bernal, J Arroyo and L Paniagua.....149
- Crack damage recognition of a reinforced concrete beam using acoustic emission and non-linear independent component analysis,
by Yu Jiang, Chih-Hsiung Lee and Jingping Wu.....155
- Online monitoring of drop impact damage on WGFRC composite laminate by the damage tolerance method through the acoustic emission technique,
by P Ramasamy, S Sampathkumar and G Vignesh.....658
- Application of the Kaiser effect of acoustic emission to measure vertical stress in an underground mine,
by Xingdong Zhao662
- Acoustic detection of partial discharge using signal processing and pattern recognition techniques,
by A Swedan, A H El-Hag and K Assaleh667
- Predicting acoustic emission attenuation in small steel blocks using a ray tracing technique,
by M El-Shaib, R Reuben and T Lim673
- Improving the reliability of an ammonia tank AE test,
by M Peacock681

BARKHAUSEN NOISE

- A study on magnetic Barkhausen emission using Monte Carlo simulation,
by M K Sahai, B Sasi, C Babu Rao and T Jayakumar262
- A data-based modelling scheme for estimating residual stress from Barkhausen noise measurements,
by A Sorsa, K Leiviskä, S Santa-aho and T Lepistö278

COMPUTED TOMOGRAPHY

- Contour reconstruction directly from helical cone-beam projections for non-destructive evaluation application of X-ray CT,
by Jiqiang Guo, Li Zeng, Baodong Liu and Wei Yu536
- Segmentation of industrial CT image using local robust statistics and 3D C-V model,
by Linsheng Li, Li Zeng, Changjun Qiu, Linghui Liu and Hongmei Zhu544

CONDITION MONITORING

- Condition monitoring of pulsed electric field food processing systems,
by N Bastaki, A M Gaouda, A H El-Hag and S H Jayaram36
- Quantitative health monitoring of fatigue crack initiation and propagation in aluminium specimen based on electromechanical impedance technique,
by Jicheng Li, Zhongbing Luo, Li Lin, Ximeng Li and Mingkai Lei267
- A system for automated online oil analysis,
by G Peršin, J Salgueiro, J Vižintin and Đ Juričić428
- Novel anomaly detection technique based on the nearest neighbour and sequential methods,
by L Gelman and I Petrunin433
- Condition monitoring of SSE gas turbines using artificial neural networks,
by S Muthuraman, J Twiddle, M Singh and N Connolly436
- Integration of disparate data sources to perform maintenance prognosis and optimal decision making,
by D Galar, M Palo, A Van Horenbeek and L Pintelon440
- The evolution from e(lectronic)Maintenance to i(ntelligent)Maintenance,
by D Galar, K Wandt, R Karim and L Berges446
- Rolling stock condition monitoring using wheel/rail forces,
by M Palo, H Schunnesson, U Kumar, P-O Larsson-Kråk and D Galar451

ELECTROMAGNETIC METHODS

- Corrosion detection using low-frequency RFID technology,
by M Alamin, G Y Tian, A Andrews and P Jackson.....72

- Review of magnetic hysteresis-based NDE of creep damage in power plant steels,
by P Jain and M Godbole.....128

- Non-destructive examination using a flexible multi-coil eddy current probe for weld surfaces of core internal components of nuclear power plants,
by A Nishimizu, H Endo, M Tooma, K Otani, H Ouchi, I Yoshida and Y Nonaka134

- Reconstruction of 3D defect profiles from the MFLT signals by using a radial wavelet basis function neural network iterative model,
by Chao Xu, Changlong Wang, Xianzhang Zuo, Xichao Yuan and Fengzhu Ji138

- Condition monitoring of Koepe winder ropes by electromagnetic non-destructive inspection,
by Y A Onur144

- Automatic eddy current classification of signals delivered by flaws – application to nuclear fuel cladding,
by G Cosarinsky, M Ruch, G Rugirello, G Domizzi, R Grimberg, R Steigmann and A Savin316

- Alloy 800 steam generator tube stress corrosion cracks – detection and root cause,
by A Erhard, F Otremba, F Mohr and R Kilian322

- Investigations of the state-of-the-art methods for electromagnetic NDT and electrical condition monitoring,
by Xiandong Ma482

- Improving SNR of MFL detecting defect signal of drill pipe by using pole piece,
by Ma Yilai, Lin Li, Gao Po and Gao Xuan489

- Electromagnetic imaging for internal and external inspection of metallic pipes,
by L Ma and M Soleimani493

- Estimation of concentration of conductive dispersoids in a dielectric medium using eddy current testing,
by M M Narayanan, S Vaidyanathan, A Kumar, C Babu Rao and T Jayakumar.....496

- Study on the lift-off effect on MFL signals with magnetic circuit model and 3D FEM,
by Xueyu Wang, Xinjun Wu, Jiang Xu and Hong Ba.....505

GENERAL & REVIEWS

- Damage detection on laminated composite materials using several NDT techniques,
by A M Amaro, P N B Reis, M F S F de Moura and J B Santos14

- Evaluation of defects in panel paintings using infrared, optical and ultrasonic techniques,
by S Sfarra, P Theodorakeas, C Ibarra-Castaneda, N P Avdelidis, A Paoletti, D Paoletti, K Hrissagis, A Bendada, M Kouli and X Maldague21

- Review of inspection and quality control techniques for composite wind turbine blades,
by U I K Galappaththi, A K M De Silva, M Macdonald and O R Adewale82

- RCNDE industrial members' vision for the future requirements for NDE,
by P Thayer124

- EFNDT REPORT: Progress of EFNDT Working Group 5: NDT Technology for Public Safety and Security,
by K Osterloh165

- The influence of maintenance on the life cycle of above-ground storage tanks,
by N R Pearson, J S D Mason and R H Priewald311

IMAGE PROCESSING

- Predicting weld bead width and depth of penetration from infrared thermal image of weld pool using artificial neural network,
by S Chokkalingham, M Vasudevan, S Sudarsan and N Chandrasekhar272

- Virtual source aperture imaging for non-destructive testing,
by M Sutcliffe, M Weston, P Charlton, B Dutton and K Donne371

INSPECTION QUALIFICATION AND RELIABILITY

- Manufacturing of welded joints with realistic defects,
by *M Consonni, Chen Fun Wee and C Schneider*76
- Probability of detection as a function of multiple influencing parameters,
by *M Pavlović, K Takahashi and C Müller*606

LASER TECHNIQUES

- Developing procedures for post-earthquake structural evaluation by laser scanning techniques,
by *K T Chang and E H Wang*562

OPTICAL METHODS

- Buried object classification using holographic radar,
by *C Windsor, L Capineri and T D Bechtel*331
- Laser speckle roughness measurement of grit-blasted surfaces,
by *J P Sargent*551

RADIOGRAPHY including DIGITAL RADIOGRAPHY

- Active X-ray testing of complex objects,
by *V Rizzo and D Mery*28

SIGNAL PROCESSING

- The measurement of acoustic non-linearity parameter B/A in ethanol and milk,
by *Haijiang Zhu and Ping Yang*252
- Non-destructive testing of marine diesel engines using integration of ferrographic analysis and spectrum analysis,
by *Chenxing Sheng, Tonghai Wu and Yuelei Zhang*394

THERMOGRAPHY AND THERMAL METHODS

- Defect detection in pipe using tone-burst eddy current thermography,
by *N Biju, N Ganesan, C V Krishnamurthy and K Balasubramaniam*500
- Thermal wave thickness measurement of primer on grit-blasted steel,
by *J P Sargent*557

ULTRASONIC TESTING

- Texture analysis of low-carbon steel under annealing conditions using non-contact ultrasound,
by *M D G Potter and F M Shaban*10
- Investigation of thin-film ultrasonic transducers for high-temperature applications,
by *Ruozhou Hou, D Hutson and K J Kirk*68
- Real-time full matrix capture + total focusing and other novel imaging options using general purpose PC-based array instrumentation,
by *D I A Lines, J Wharrie and J Hottenroth*86
- Pulse-compression ultrasonic technique for the inspection of forged steel with high attenuation,
by *M Ricci, L Senni, P Burrascano, R Borgna, S Neri and M Calderini*91
- Time resolution improvement of ultrasonic TOFD testing by pulse compression technique,
by *T Gang, Z Y Sheng and W L Tian*193

- The significance of ultrasonic technology in the evaluation of the condition and mechanical properties of explosively welded joints,
by *B Wronka*198

- Study on crack detection in cast iron plates using the acousto-ultrasonic technique,
by *Li Li-fei, Shen Gong-tian, Zhang Zheng and Wu Zhan-wen*204

- A critical analysis of ultrasonic echoes coming from natural and artificial flaws and its implications in the derivation of probability of detection curves,
by *M Carboni*208

- Improvement in the signal strength of magnetostrictive ultrasonic guided wave transducers for pipe inspection using a soft magnetic ribbon-based flux concentrator,
by *K Sathish Kumar, V Satya Narayana Murthy and K Balasubramaniam*217

- Experimental determination of discrimination criteria between volumetric and planar defects by means of ultrasonic pulse-echo/phased array technique based on the ratio of diffracted echoes in welding examination,
by *G Nardoni, M Certo, P Nardoni, M Feroldi, D Nardoni, L Possenti, A Filosi, S Quetti and S Riva*221

- In-process ultrasound NDE of resistance spot welds,
by *A M Chertov, A C Karloff, W Perez, A Lui and R Gr Maev*257

- Ultrasonic inspections at elevated temperature,
by *A McLay and J Verkooijen*307

- Stud bolt corrosion inspection blind trials using ultrasonic techniques,
by *R J Lee, N J Collett and S F Burch*327

- Shift-invariant wavelet packet for signal de-noising in ultrasonic testing,
by *M S Mohammed and Kim Ki-Seong*366

- Experiments on non-destructive testing of grounding grids using SH0 guided wave,
by *Jiao Jingpin, Zhong Xi, He Cunfu and Wu Bin*375

- Ultrasonic phased array inspection using full matrix capture,
by *R Long, J Russell and P Cawley*380

- Development and implementation of a membrane-coupled conformable array transducer for use in the nuclear industry,
by *J Russell, R Long, D Duxbury and P Cawley*386

- Guided waves for NDT and permanently-installed monitoring,
by *P Cawley, F Cegla and A Galvagni*594

- Calibration of ultrasonic techniques using full matrix capture data for industrial inspection,
by *M Weston, C Nageswaran, M Sutcliffe, A Peyton, C Davis, P Mudge and P Wallace*602

- Evaluation of ultrasonic phased array and laser optical techniques for the intermediate inspection of the root and hot pass in girth welds for clad pipelines,
by *C Nageswaran, R Gooch and A Bourgeon*612

- Investigation of longitudinal angle beam ultrasonic testing with a circular array probe,
by *H Mizota and N Kono*619

- Synthetic aperture focusing technique with virtual transducer for immersion inspection of solid objects,
by *T Lukowski, T Stepinski and J Kowal*623
