

Insight, Non-Destructive Testing and Condition Monitoring

incorporating the European Journal of NDT

formerly the British Journal of Non-Destructive Testing

ISSN: 1354-2575

VOLUME 55 2013 – INDEXES

Key to issues

No 1	January	1-56
No 2	February	57-112
No 3	March	113-168
No 4	April	169-224
No 5	May	225-280
No 6	June	281-344

No 7	July	345-408
No 8	August	409-464
No 9	September	465-528
No 10	October	529-584
No 11	November	585-648
No 12	December	649-704

REGULAR FEATURES AND SHORT TITLES

Associate Members	56, 112, 168, 224, 280, 344, 408, 464, 528, 584, 648, 704
BINDT Awards.....	65, 121, 510
Comment.....	2, 58, 114, 170, 226, 282, 346, 410, 466, 530, 586, 650
Conference Reports	
NDT 2013 – The 52nd Annual British Conference on NDT	627
Features	
<u>BINDT encourages the professional recognition of technicians through registration</u>	473
Institute Membership	60, 175, 350, 468, 590
Institute News	175

SUBJECT INDEX	
ACOUSTIC EMISSION METHODS	
Study on the effect of adhesive thickness of single lap joints using acoustic emission and FEA, by K Mohamed Bak, K Kalaichelvan, G K Vijayaraghavan, M Dinesh and V Arumugam	35
High-frequency acoustic emission and single gas bubble burst, by S Husin, A Addali, D Hammond and D Mba	197
Acoustic emission behaviour during damage evolution in rolled Al-Zn-Mg alloy and its weld, by Ronghua Zhu and Tie Gang	202
Influence of increased injection pressure load on the captured acoustic emission signals and dimensional accuracies of polypropylene test specimens, by D Kusić, R Svečko, T Kek, A Hančić and J Grum	659
An experimental investigation of rolling contact fatigue of steels using acoustic emission method, by L Nohál, F Hort, J Dvořáček and P Mazal	665
COMPUTED TOMOGRAPHY	
Iterative reconstruction algorithm for half-cover dual helical cone-beam computed tomography, by Yunsong Zhao, Xiaobing Zou and Wei Yu	232
An accelerated RAMLA reconstruction algorithm for X-ray cone-beam CT, by Xing Zhao, Jing-jing Hu, Tao Yang and Feng Wang	237
Planar array 3D electrical capacitance tomography, by Z Ye, R Banasiak and M Soleimani	675
CONDITION MONITORING	
Monitoring and analysing oil condition to generate maintenance savings: a case study in a CNG engine powered urban transport fleet, by B Tormos, P Olmeda, Y Gómez and D Galar	84
Fault diagnosis of rolling element bearings based on complexity measure and v support vector machine, by Guofeng Wang and Chang Liu	142
Study on data fusion of multi-dimensional sensors for health monitoring of rolling bearings, by Zhixiong Li and Xinping Yan	147
Feature-level fusion based on wavelet transform and artificial neural network for fault diagnosis of planetary gearbox using acoustic and vibration signals, by M Khazaei, H Ahmadi, M Omid, A Banakar and A Moosavian	323
Gear tooth crack detection using dynamic response analysis, by O D Mohammed and M Rantatalo	417
Experimental investigation on the fault diagnosis of permanent magnet DC electromotors, by M Behzad, A Ebrahimi, M Heydari, M Asadi and A Alasti	422
Novel decision-making technique for damage diagnosis, by L Gelman, B Murray, T H Patel and A Thomson	428
Identification of wind turbine natural frequencies using narrow-band decomposition methods, by O Cardona-Morales, E F Sierra-Alonso and G Castellanos-Domínguez	433
Diagnosis of bearings by novel non-linear non-stationary higher order spectra, by L Gelman, B Murray, T H Patel and A Thomson	438
Using artificial neural networks and strain gauges for the determination of static loads on a thin square fully-constrained composite marine panel subjected to a large central displacement, by M R Ramazani, S Noroozi, P Sewell, R Khandan and B Cripps	442
Lateral contact forces estimation of locomotive wheelsets using a model-based filter for condition monitoring, by Bin Xu, Xiqiang Guan, Hao Zhou and Jianwu Zhang	614
Condition identification of the cylinder liner-piston ring in a marine diesel engine using bispectrum analysis and artificial neural networks, by Zhiwei Guo, Chengqing Yuan, Zhixiong Li, Zhongxiao Peng and Xinping Yan	621
Intelligent leak level recognition of gas pipeline valve using wavelet packet energy and support vector machine model, by HaiFeng Zhang, ZhenLin Li, ZhongLi Ji and ZhiQiang Bi	670
ELECTROMAGNETIC METHODS	
Performance evaluation of a haulage rope using two non-destructive testing instruments, by D Basak and B Das	21
Quantitative electro-mechanical impedance evaluation of tensile damage to austenitic stainless steel, by Zhongbing Luo, Li Lin, Huanqing Cao, Jicheng Li and Ximeng Li	24
An automatic magnetic particle inspection system for detecting defects in mooring chains, by Dai Xin, Mo Jinqui, Yin Bo, Hu Wen and Wang Shigang	29
Applying micromagnetic methods for the non-destructive metallurgical characterisation of AISI 4140 steel materials, by C O D Martins, A Altenhofen, T G R Clarke and A Reguly	123
Broken wire detection in coated steel belts using the magnetic flux leakage method, by Hua-Ming Lei and Gui-Yun Tian	126
Prediction of interlamellar pearlite spacing of tyre bead wires after patenting using electromagnetic techniques, by S Balamurugan, T Bhattacharyya, D Gudhae, L Zhou, C L Davis, A J Peyton and S Chandra	132
Real-time pre-processing of the pulsed eddy current signal from continuous casting slabs, by Xuanding Qiu, Chao Wei, Xiaochao Cui and Jilin Wei	136
Investigation of signal features of pulsed eddy current testing technique by experiments, by Yu Yating and Guan Jia	487
Dipole modelling of metal magnetic memory for V-notched plates, by J C Leng, H Y Xing, G Q Zhou and Y T Gao	498
Optimum frequency variations with coil geometry and defects in tone burst eddy current thermography (TBET), by N Biju, N Ganesan, C V Krishnamurthy and K Balasubramaniam	504

Comparative study of E-shaped coil and evolution of new methodology for crack detection using eddy current testing, by D Roy, R Chakraborty and B K Kaushik	553
Interacting effects of clustering defects on MFL signals using FEA, by Qiang Song	558
The influence of a bobbin probe's radial offset on eddy current testing of tubes, by Mengbao Fan, Binghua Cao, Wei Li and Fangqin Liu	561
GENERAL & REVIEWS	
Observation of container liquid levels by dynamic heat conduction, by Minoru Aoyagi, Takefumi Hiraguri, Takahiro Ueno and Makoto Okuda	10
Hybrid modelling for leak detection of long-distance gas transport pipeline, by Wang Junru, Wang Tao and Wang Junzheng	372
Innovative method used to evaluate the effect of power washing on marine concrete – a UK site study, by P Hughes, D Fairhurst, I Sherrington, N Renievier and G Morton	382
Overview of NDT methods applied on an aero engine turbine rotor blade, by M R Vijaya Lakshmi, A K Mondal, C K Jadhav, B V Ravi Dutta and S Sreedhar	482
IMAGE PROCESSING	
3D image reconstruction algorithm for truncated projection data in a half-covered scanning configuration, by Xianchao Wang, Hongkui Liu, Bin Yan, Lei Li and Guoent Hu	243
INSPECTION QUALIFICATION AND RELIABILITY	
Inspection sampling of pitting corrosion, by M Khalifa, F Khan and M Haddara	290
OPTICAL METHODS	
Modal frequency versus shearography in detecting and locating voids/delaminations in sandwich composites, by J Gryzgoridis, G Oliver and D Findeis	249
Strain-free optical fibre temperature sensor using Brillouin optical time domain analyser, by M Kasinathan, A Wosniok, K Krebber, C Babu Rao, N Murali and T Jayakumar	387
RADIOGRAPHY including DIGITAL RADIOGRAPHY	
Detection of regular objects in baggage using multiple X-ray views, by D Mery, G Mondragon, V Riffio and I Zuccar	16
A novel online defect detection method based on X-ray images of railway castings, by Kuan Shen and Yufang Cai	360
Simulation of beam hardening in X-ray tomography and its correction using linearisation and pre-filtering approaches, by K Arumuthu, M Ashish, T Saravanan, John Philip, B P C Rao and T Jayakumar	540
Effect of exposure and scattering on signal-to-noise ratio for improved defect sensitivity in X-ray radiography, by T Saravanan, K Arumuthu, John Philip, B Purna Chandra Rao and T Jayakumar	548
SIGNAL PROCESSING	
Visual algorithms for automatic detection of squat flaws in railway rails, by P Bojarczak	353
Detection of flaws in aluminium castings: a comparative study between generative and discriminant approaches, by F Ramírez and H Allende	366
Automatic classification approach to weld defects based on PCA and SVM, by Weilei Mu, Jianmin Gao, Hongquan Jiang, Zhao Wang, Fumin Chen and Changying Dang	535
Application of variant least mean squares adaptive algorithms for filtering material grain noise, by M S Mohammed and Kim Ki-Seong	593
STRESS AND STRAIN	
Strain gauge measurements of the precast concrete lining of a shield-driven tunnel, by K Schotte, H De Backer, T Nuttens, A De Wulf and P Van Bogaert	88
Forward to residual stress measurement by using pulsed eddy current technique, by A Habibalahi and M S Safizadeh	492
Hot-spot stress determination of tubular arch bridge joints using strain gauges, by D Stael, H De Backer and P Van Bogaert	681
THERMOGRAPHY AND THERMAL METHODS	
Quantitative study of water ingress in pulsed thermography, by Dapeng Chen, Zhi Zeng, Cunlin Zhang, Xueyuan Jin and Zheng Zhang	257
ULTRASONIC TESTING	
Sequential hypothesis testing for reflected signal recognition of time-of-flight estimation in ultrasonic defect detection, by Hanxin Chen, Yunfei Shang and Kui Sun	66
Macro-fibre composite actuators for the transduction of Lamb and horizontal shear ultrasonic guided waves, by A G Haig, R M Sanderson, P J Mudge and W Balachandran	72
Resolution enhancement of ultrasonic B-mode images, by S A Mosey, P C Charlton and I Wells	78
Issues to be considered when measuring ultrasonic wave attenuation in austenitic cladding material, by T Seldis	177
Investigation of ultrasonic inspection of the inner radius of a nozzle, by E Jasienienė, L Mažeika and O Tumšys	182
Guided wave testing performance studies: comparison with ultrasonic and magnetic flux leakage pigs, by R Wagner, O Goncalves, A Demma and M Lowe	187
Development of high-precision ultrasonic microscopy measurement system and measurement of the surface wave velocities of (100) silicon wafer, by Song Guorong, Lu Yan, Gao Zhongyang, Liu Yanli, Guo Yinghui, He Cunfu and Wu Bin	253
Full matrix capture with time-efficient auto-focusing of unknown geometry through dual-layered media, by M Sutcliffe, M Weston, P Charlton, K Donne, B Wright and I Cooper	297
Development of sputtered AlN thin-film ultrasonic transducers for durable high-temperature applications, by R Hou, D Hutson and K J Kirk	302
An automatic flaw classification method for ultrasonic phased array inspection of pipeline girth welds, by Jian Li, Xianglin Zhan and Shijiu Jin	308
Simulation studies for optimisation of phased array parameters for examination of roll-joints in pressurised heavy water reactor coolant channels, by P P Nanekar, N Jothilakshmi and T Jayakumar	316
Ultrasonic imaging of full matrix capture acquired data for carbon fibre-reinforced polymer, by D Yan, M Sutcliffe, B Wright and I Cooper	477
Characterisation of oxidative ageing in asphalt concrete – Part 1: Ultrasonic velocity and attenuation measurements and acoustic emission response under thermal cooling, by M E McGovern, B Behnia, W G Buttlar and H Reis	596
Characterisation of oxidative ageing in asphalt concrete – Part 2: Estimation of complex moduli, by M E McGovern, B Behnia, W G Buttlar and H Reis	605
A varied window imaging algorithm for ultrasound backscatter signals of tissue-mimicking materials, by Haijiang Zhu, Mengwei Yang, Mingsheng Han and Jian Song	610
