

Insight, Non-Destructive Testing and Condition Monitoring

incorporating the European Journal of NDT

formerly the British Journal of Non-Destructive Testing

ISSN: 1354-2575

VOLUME 59 2017 – INDEXES

Key to issues

No 1 January	1-56
No 2 February	57-112
No 3 March	113-168
No 4 April	169-224
No 5 May	225-288
No 6 June	289-344

No 7 July	345-400
No 8 August	401-456
No 9 September	457-520
No 10 October	521-572
No 11 November	573-628
No 12 December	629-688

REGULAR FEATURES AND SHORT TITLES

Comment.....	2, 58, 114, 170, 226, 290, 346, 402, 458, 522, 574, 630
Conference Reports	
Thirteenth International Conference on Condition Monitoring and Machinery Failure Prevention Technologies – CM / MFPT 2016.....	7
First World Congress on Condition Monitoring 2017	408
The 56th Annual Conference of the British Institute of NDT – NDT 2017.....	579
My experience of attending NDT 2017	584
Corporate Members	56, 112, 168, 224, 288, 344, 400, 456, 520, 572, 628, 688
Institute Awards.....	9, 466
Institute Notices	297, 407
International Diary	45, 100, 155, 211, 276, 330, 389, 445, 506, 559, 615, 674
NDT Info.....	47, 103, 158, 214, 279, 334, 391, 447, 510, 562, 618, 678
Newsdesk	4, 61, 117, 173, 228, 293, 348, 404, 461, 542, 576, 633
Obituaries	
Mr T Sonneveld.....	62
C Zanotelli.....	229
Professor D P Almond.....	464
Dr D Lovejoy	526
Product Showcase	54, 110, 165, 221, 286, 341, 398, 454, 517, 570, 626, 685
Special Features	
Condition Monitoring	401
Diagnostic Technologies	629
Guided Waves	57
NDT in Art & Cultural Heritage	225
Novel Applications.....	1
Steel, Concrete and Pipe Inspection.....	289
The Energy Industries	345
Thermography	457
Ultrasonics	573

SUBJECT INDEX

ACOUSTIC EMISSION METHODS

<u>Active crack evaluation in concrete beams using statistical analysis of acoustic emission data,</u> by S Shahidan, R Pullin, N M Bunnori and S S M Zuki	24
<u>Acoustic emission monitoring of micro-damage in wooden art objects to assess climate management strategies,</u> by M Lukomski, M Strojecki, B Pretzel, N Blades, V L Beltran and A Freeman	256
<u>Leakage analysis of pneumatic cylinders using acoustic emission,</u> by H Mahmoud, F Vlasic, P Mazal and M Jana	500
<u>Application of an acoustic emission quantitative method to evaluate oil tank bottom corrosion based on corrosion risk pace,</u> by F Qiu, G Dai and Y Zhang	653

CONDITION MONITORING AND SHM

<u>Adaptive control by multi-objective optimisation for drilling process with fuzzy inference system and neural predictive controller,</u> by J Susai Mary, U Sabura Banu, D Dinakaran and R S Nakandhrakumar	38
--	----

<u>Vibration response characterisation and fault-size estimation of spalled ball bearings,</u> by M A A Ismail and N Sawalhi	149
<u>Evaluation of the effect of speed and defect size on high-frequency acoustic emission and vibration condition monitoring of railway axle bearings,</u> by A Amini, Z Huang, M Entezami and M Papaelias	184
<u>Online tool wear condition monitoring using binocular vision,</u> by Aibin Zhu, Dayong He, Jianwei Zhao and Hongling Wu	203

<u>Evaluation of damage mechanics of industrial wind turbine gearboxes,</u> by V Jantara Junior, J Zhou, S Roshanmanesh, F Hayati, S Hajibady, X Y Li, H Dong and M Papaelias	410
---	-----

<u>Research on drilling mud pump fault diagnosis based on fusion of acoustic emission and vibration technology,</u> by Shouceng Deng, Junfeng Pei, Yu Wang and Baolin Liu	415
--	-----

<u>Genetic algorithms and decision trees for condition monitoring and prognosis of A320 aircraft air conditioning,</u> by M Gerdes, D Galar and D Scholz	424
---	-----

<u>Novel adaptation of the spectral kurtosis for vibration diagnosis of gearboxes in non-stationary conditions,</u> by L Gelman, S Kolbe, B Shaw and M Vaidhianathasamy	434
--	-----

<u>Vibration diagnosis of a gearbox by wavelet bicoherence technology,</u> by L Gelman, K Solinski, B Shaw and M Vaidhianathasamy	440
--	-----

<u>ANN-based tensile force estimation for pre-stressed tendons of PSC girders using FBG/EM hybrid sensing,</u> by Junkyeong Kim, Jaemin Kim, Kyung-Joon Shin, Hwanwoo Lee and Seunghee Park	544
---	-----

<u>A new fault diagnosis model for rotary machines based on MWPE and ELM,</u> by Guoqian Jiang, Ping Xie, Shuo Du, Yuangeng Guo and Qun He	644
---	-----

<u>Adoption of MEMS technology in e-maintenance systems for rotating machinery,</u> by S H Teay and A Albarbar	659
---	-----

<u>Pump cavitation detection through fusion of support vector machine classifier data associated with vibration and motor current signature,</u> by M S Safizadeh and B Yari	669
---	-----

ELECTROMAGNETIC AND MAGNETIC METHODS

<u>Magnetic detection technique for double-layer steel tubing and casing damage,</u> by Hu Bo, Meng Yongle and Yu Runqiao	81
--	----

<u>Analysis of signals for inclined crack detection through alternating current field measurement with a U-shaped probe,</u> by Jiuhan Ge, Wei Li, Guoming Chen, Xiaokang Yin, Yanyun Wu, Jian Liu and Xinan Yuan	121
---	-----

<u>A sensor model for defect detection in mine hoisting wire ropes based on magnetic focusing,</u> by Wang Hongyao, Tian Jie and Meng Guoying	143
--	-----

<u>Review and analysis of three representative electromagnetic NDT methods,</u> by Shiwei Liu, Yanhua Sun, Min Gu, Changde Liu, Lingsong He and Yihua Kang	176
--	-----

<u>A new magnetic testing technology based on magnetic gradient tensor theory,</u> by Qiang Song, Weixia Ding, He Peng, Jian Shuai and Bo Wang	325
---	-----

<u>Frequency optimisation of circumferential current field testing system for highly-sensitive detection of longitudinal cracks on a pipe string,</u> by Xinan Yuan, Wei Li, Guoming Chen, Xiaokang Yin and Jiuhan Ge	378
--	-----

GENERAL & REVIEWS

<u>Non-destructive evaluation and characterisation of high-temperature hydrogen attack in carbon steel pressure vessels,</u> by M E McGovern, D K Balch and H Reis	11
---	----

<u>Improving the reliability of industrial multi-MW wind turbines,</u> by J Zhou, S Roshanmanesh, F Hayati, V Jantara Junior, T Wang, S Hajibady, X Y Li, H Basoalto, H Dong and M Papaelias	189
--	-----

<u>Using non-invasive non-destructive techniques to monitor cultural heritage objects,</u> by D Thickett, C S Cheung, H Liang, J Twydale, R Gr Maev and D Gavrilov	230	<u>Design and experimental study of a novel excitation coil based on pulsed eddy current thermography,</u> by Liu Zhiping, Fang Guihua, Jiang Lei, Jiang Xiaoli and Gabrol Lodewijks.....	491
<u>Mobile art analysis: evolution of the concept and new perspectives,</u> by J Twydale, D Gavrilov, D Thickett and R Gr Maev	235	<u>Subsurface detail fusion for anomaly detection in non-stationary thermal wave imaging,</u> by B Suresh, Sk Subhani, V S Ghali and R Mulaveesala	553
<u>Infrared vision for artwork and cultural heritage NDE studies: principles and case studies,</u> by C Ibarra-Castanedo, F Khodayar, M Klein, S Sfarrà, X Maldaque, H Helal, M Tayoubi, B Marini and J C Barré.....	243	ULTRASONIC TESTING	
<u>In situ characterisation of readhesion treatments for ceiling paintings using unilateral NMR,</u> by E Richardson, E Woolley, K Corda, S Julien-Lees, S Pinchin and Z Roberts	249	<u>Design of a miniaturised ultrasonic guided wave inspection instrument for steel strand flaw detection,</u> by Feng Huan, Liu Xiucheng, Wu Bin, Han Qiang and He Cunfu	17
<u>Visibilita ex invisibilibus: seeing at the nanoscale for improved preservation of parchment,</u> by A Bartoletti, M Odlyha, S Hudziak, K Mühlen Axelsson, J de Groot and L Bozec	265	<u>Crack growth monitoring using low-frequency guided waves,</u> by C A Chua, D N Alleyne and M Calva	64
<u>Portable EDXRF in a multi-technique approach for the analyses of paintings,</u> by S Ridolfi	273	<u>Monitoring of welded seams on the foundations of offshore wind turbines,</u> by B Weihnaht, B Frankenstein, T Gaul, R Neubeck and L Schubert	72
<u>Non-destructive characterisation of laser hardened steels.</u> <u>Part 2: Metallography and residual stresses,</u> by M Ruch, G Cosarinsky, M Kopp, M Rabung, D Vega, M Amiri and J Fava	311	<u>Guided wave testing of a structural component by multipoint sensing with wireless accelerometers,</u> by K Nakahata, T Takamoto and N Saitoh	77
<u>NDE Research: Enabling the Fourth Industrial Revolution (4IR) and the role of NDE and monitoring,</u> by P Thayer	469	<u>Wavelet transform-based approach for processing ultrasonic B-scan images,</u> by G K Sharma, S Bhagi, S Thirunavukkarasu and B P Rao	93
IMAGE AND SIGNAL PROCESSING			
<u>Tracking of non-linearity growth caused by imbalance using Hilbert transform,</u> by N Munir, A U Rehman and F D Qazi	32	<u>Sound beam focusing using phased array – SAFT technique,</u> by P Nanekar, N Jothilakshmi, A Kumar and T Jayakumar	129
<u>An improved approach to evaluating pile length using complex continuous wavelet transform analysis,</u> by Sheng-Huoo Ni, Ji-Lung Li, Yu-Zhang Yang and Zih-Tong Yang	318	<u>Application of chirplet transform for detecting axial cracks in pipes using torsional guided modes,</u> by Y-W Kim and K-J Park	138
<u>3D detection of internal defects for gas turbine blades,</u> by Bing Li, Lei Chen, Yuegen Wang and Mengqiu Gao	364	<u>Lamb wave mode and frequency selection for assessment of creep damage in titanium alloy plates,</u> by Yanxun Xiang, Congyun Ma, Mingxi Deng, Fu-Zhen Xuan and Jianfeng Zhang	196
<u>Theoretical and experimental studies on the detection of high-temperature metal surface imperfections using a scanning laser point source method,</u> by Guo Ruipeng, Wang Haitao and Zhang Jianyan	371	<u>Development of methodology for the inspection of welds in lined pipes using array ultrasonic techniques,</u> by R Baiotto, C Nageswaran and T Clarke	299
<u>Profile imaging of actual defects in steel plate based on electromagnetic ultrasonic SH guided wave scattering,</u> by Yu Zhang, Shen Wang, Qing Wang, Songling Huang and Wei Zhao	383	<u>Study of an acoustic field simulation of a temperature field excited by ultrasonic waves through a concrete specimen,</u> by Tang Lei, Li Hong, Jia Yu and Guo Ling	305
<u>Internal damage detection of three-dimensional four-step six-directional braided composites based on carbon nanotube thread sensor,</u> by Z Wan, Z Zhang, M Jia, W Bao and Q Dong	537	<u>An ultrasonic testing method for homogeneous anisotropic materials,</u> by Hirohisa Mizota, Yoshiaki Nagashima and Kazuyuki Nakahata	351
RADIOGRAPHY including DIGITAL RADIOGRAPHY			
<u>Object recognition in X-ray testing using an efficient search algorithm in multiple views,</u> by D Mery, V Riffó, I Zuccar and C Pieringer	85	<u>Ultrasonic waveguide-based distributed temperature measurement on a solid surface,</u> by R Nishanth, K Lingadurai, S Periyannan and K Balasubramaniam	358
<u>Detection of thin structure defects in radiographic images using an improved Gabor filter,</u> by HongMei Zhang, HuiE Zhang, HuiPing Yin, JunFeng Wu and ShuangSheng Gao	531	<u>Non-destructive evaluation of ultrasonic under-sodium scanner (USUSS) shield plug of prototype fast breeder reactor by gamma radiometry,</u> by S Viswanathan, S Chandrasekaran, R Mathiyarasu, M T Jose and B Venkatraman	527
THERMOGRAPHY AND THERMAL METHODS			
<u>A case for NDT expert systems based on the development of the Thermographic NDE Advisory and Guidance System,</u> by D P Almond, S L Angioni and S G Pickering	473	<u>Preprocessing of the full matrix capture data for time-reversal-based super-resolution imaging,</u> by Chengguang Fan, Lei Yang and Yong Zhao	586
<u>Thermography combined with thickness testing in order to characterise subsurface defects,</u> by J Gryzgoridis and D Findeis	479	<u>Signal conditioning for the recursive least-squares filter in ultrasonic testing of materials,</u> by M S Mohammed and Kim Ki-Seong	591
<u>Hot-rod thermography for defect detection,</u> by C M Basheer, C V Krishnamurthy and K Balasubramaniam	484	<u>Virtual source aperture imaging and calibration for ultrasonic inspections through dual-layered media for non-destructive testing,</u> by M Sutcliffe, P Charlton, M Weston and S Mosey	596
		<u>Flaw sizing using ultrasonic C-scan imaging with dynamic thresholds,</u> by Xiongbing Li, Yilin Wang, Peijun Ni, Hongwei Hu and Yongfeng Song	603
		<u>Study of the relationship between ultrasonic properties and microstructure of nickel-based superalloy GH706,</u> by Xi Chen, Guanhua Wu, Zhenggan Zhou and Qingan Tai	609
		<u>Ultrasonic evaluation of the combined effect of corrosion and overheating in grade 20 steel water-wall boiler tubes,</u> by S Kapayeva, M J Bergander, A Vakhguel and S I Khairaliyev	637

Guidelines for authors submitting technical articles to Insight – Non-Destructive Testing & Condition Monitoring (The Journal of the British Institute of Non-Destructive Testing)

Editorial Policy

The editorial policy of the Journal ensures that each issue contains matter that is highly relevant to a wide range of readers, including engineers, technicians, academics and scientists, appealing to practitioners and young graduates alike.

The Institute invites contributions of quality and originality that will interest the readership of the Journal. Technical papers submitted are peer-reviewed by at least two referees. The decision to publish rests solely with the Technical Committee.

Copyright

Authors of papers accepted for publication are requested to assign copyright to the British Institute of Non-Destructive Testing.

Full responsibility for the paper rests with the author(s), who, where appropriate, must have obtained permission to publish the material, including permission to use any material that may be protected by copyright.

The Manuscript

The manuscript should be typed in English, in an A4-size document, double-spaced with a margin of at least 25 mm all round. Pages should be numbered consecutively. Papers should be limited in length to 5000 words and 15 illustrations.

Language and Grammar

The manuscript should be written clearly in English. Insight does not have the resource to re-write articles that have been poorly written or translated, or that contain major deficiencies in English grammar. It is recommended that authors who are not fluent in English should have their manuscript checked by a translator or native English speaker prior to submission, or use a language editing service. If the language of the paper submitted does not meet the requirements of Insight's editorial staff in this regard, the manuscript will be rejected outright.

The Abstract

The abstract should introduce the paper succinctly. It should mention the techniques used without going into methodological detail and mention the most important results. The abstract should be written as a single paragraph and should cover the background, principal findings and conclusions of the paper. Please do not include any citations in the abstract. Avoid specialist abbreviations. Please note that in the online version (see below) the Abstract is viewable to all without charge so it represents a potentially valuable opportunity to 'market' your paper.

Equations

Excessive mathematical detail and formulae that are widely available in the literature should be avoided.

If your manuscript is, or will be, in Microsoft Word and contains equations, please follow these instructions to make sure that your equations are editable when the file enters production:

- Format display equations in MathType (<http://www.dessci.com/products/mathtype/>)
- Inline equations should be input completely via MathType.
- Do not include an equation that is part text, part MathType
- Do not use graphic objects.

Abbreviations

Please keep abbreviations to a minimum. Define them upon first use in the text, for example Magnetic Flux Leakage (MFL). Non-standard abbreviations should not be used unless they appear at least three times in the text.

References

References should be written in the order in which they appear in the text in the following format:

1. L Udpa and S S Udpa, 'Neural networks for the classification of non-destructive evaluation signals', IEE Proceedings-F, Vol 138, No 1, pp 201-205, February 1991.

The reference point in the text should be formatted thus [1].

Biographic Footnote

A short paragraph of 60-70 words in length containing brief education and career details about each author/co-author should be set out on a separate sheet, accompanied by a head and shoulders photograph. For presentation reasons, the biography and photographs will only be used where there are up to two co-authors. For three or more authors, a brief statement of qualifications, current employment and, where applicable, Institute membership will be published for each.

Acceptable File Types

Papers can be submitted using any standard word processing software, although MS Word is preferred. In addition, a PDF version may be uploaded, though the online system converts the submitted Word version to PDF for the review process.

Figures should be submitted as separate files in TIFF, EPS or JPEG format. Colour images should be formatted as high-quality JPEGs. Figures submitted in colour will be published in colour at no charge to the authors at the discretion of Insight's editorial staff.

LaTeX submissions

The main body of the TeX or LaTeX document (ie a file ending with '.tex') should be uploaded as above and designated as a Main Document. All files referenced by a main TeX/LaTeX document should be designated as a 'TeX/LaTeX Suppl File' (including other '.tex' files).

Awards

The John Grimwade Medal

Contributors to Insight who are members of the British Institute of Non-Destructive Testing (of any grade) qualify for consideration for the John Grimwade Medal. This is awarded to author(s) of the best paper written by a member to appear in that Journal each year. Assessment is carried out annually by the Institute's Technical Committee.

The Ron Halmshaw Award

Established in 1994 through the generosity of Dr R Halmshaw MBE, The Ron Halmshaw Award is for the best paper published in Insight on any aspect of industrial radiography or radiology. Assessment is carried out annually by the Institute's Technical Committee.

How to submit a paper

Insight offers an online paper submission and peer-review system to help balance the need for comprehensive and efficient data gathering with authors' modern-day desires to publish quickly.

Authors wishing to submit a paper for consideration should visit the website:

<http://mc.manuscriptcentral.com/insi>

or via the link on the Institute's home page at www.bindt.org

Here, authors are clearly guided through the submission process. They are also able to track the status and view the details of all their manuscripts in the Insight peer-review system.

Logging in

Access to the Insight submission site is provided in one of two ways:

1. Regular contributors and reviewers may have had an account already created for them. If this is the case they will have received an email with instructions on how to log in and set a user ID and password.
2. You may create your own account. Simply click on the 'Create Account' link at the top right-hand corner of the page and follow the step-by-step instructions.

Passwords

Please retain your password information. For security reasons, we will not email you your current password. If you forget your password you must enter your email address in the Password Help field and click 'Go'. The system will send you an email containing instructions for resetting your password.

The Welcome Page

When you log in you are taken to the Welcome page. Here you see links to all of the role centres for which you have permissions. Typically, authors are given both Author and Reviewer permissions.

To access your author dashboard page, click the 'Author Center' link.

Instructions and Forms

Click the tab at the top right corner of any site page to access the Guidelines for Authors, Copyright form and Insight's Publishing Agreement.

The Author Dashboard

This is where you begin the manuscript submission process. Also, at a glance, you can track the status and view the details of all your manuscripts. Click the appropriate queue in the My Manuscripts section. The information will display at the bottom of the page.

The Manuscript Submission Process

To begin the submission process, use the 'Click here to submit a new manuscript' button.

Follow the step-by-step instructions carefully.

The final review step before submitting your manuscript is to review your submission. All sections must display the green tick before you can click 'Submit' to complete the submission process.

After the paper is successfully submitted you will receive confirmation along with your manuscript ID number.

The manuscript will display in the 'Submitted Manuscripts' column of your dashboard.

Step-by-step instructions for the submission process and further details for LaTeX submissions may be found on the BINDT website at: <http://www.bindt.org/publications/insight-journal/online-paper-submission>

THE BRITISH INSTITUTE OF NON-DESTRUCTIVE TESTING

Midsummer House, Riverside Way, Bedford Road, Northampton NN1 5NX, UK. Tel: +44 (0)1604 438300; Fax: +44 (0)1604 438301; Email: insight@bindt.org

INSIGHT

INSIGHT – Non-Destructive Testing and Condition Monitoring is the journal of the British Institute of Non-Destructive Testing.

INSIGHT was launched in April 1994, replacing the former *British Journal of Non-Destructive Testing* and incorporating, in quarterly issues, the former *European Journal of Non-Destructive Testing*.

INSIGHT is published monthly and circulated worldwide to more than 65 countries.

FEATURES PROGRAMME 2018

Month	Theme	DEADLINES		
		Editorial Copy	Ad Copy Instruction	Ad Material
Jan	Novel Applications	13.11.2017	20.11.2017	27.11.2017
Feb	Electromagnetics	11.12.2017	18.12.2017	03.01.2018
Mar *	Composites Inspection	15.01.2018	22.01.2018	29.01.2018
Apr	Ultrasonics	15.02.2018	22.02.2018	01.03.2018
May	Optical and Thermal Methods	15.03.2018	22.03.2018	29.03.2018
Jun *	The Energy Industries	13.04.2018	20.04.2018	27.04.2018
Jul	The Rail Industry	15.05.2018	22.05.2018	29.05.2018
Aug	Condition Monitoring	15.06.2018	22.06.2018	29.06.2018
Sep *	The Aerospace Industry	13.07.2018	20.07.2018	27.07.2018
Oct	Radiography	15.08.2018	22.08.2018	29.08.2018
Nov	Ultrasonics	15.09.2018	22.09.2018	29.09.2018
Dec *	NDT in Art & Cultural Heritage	15.10.2018	22.10.2018	29.10.2018

* Euro issue

In addition to the above features, each issue includes general news stories affecting the whole industry and technical articles on a broad range of subjects.

INSIGHT contains:

- Technical and scientific reviews
- Original research and development papers
- Practical case studies and surveys
- Details of products and services
- Newsdesk – contract and marketing news from the industry
- NDT Info – the world's most comprehensive serially published survey of NDT literature
- Technical literature – a comprehensive review of relevant literature, including the latest international standards and safety information
- International Diary – a comprehensive listing of information and calls for papers concerning relevant events, conferences, symposia and exhibitions
- Profiles on personalities and organisations associated with the industry

Each issue embraces matter that is highly relevant to a wide range of readers, including engineers, technicians, academics and scientists, appealing to practitioners and young graduates alike.
