Additive Manufacturing for Aerospace
10 April 2018
BAWA Centre, Bristol, UK

Details of the workshop
This workshop, organised by the Aerospace Committee of BINDT, will present current research and developments in NDT for additive manufactured (AM) parts that is being undertaken to support their introduction and use in the aerospace sector.

The aim of the workshop is to inform delegates of some of the NDT activities on-going in this area, from in-situ process monitoring through to as-built components, and provide an insight into the direction of future research.

This workshop will also include a panel session providing the opportunity to discuss and debate some of the key research challenges that AM parts pose to NDT and what success in this area may look like for the aerospace NDT sector.

Event Information
DATE AND TIME
Tuesday 10 April 2018
08.30-09.00 Registration
09.00-09.15 Welcome
