

# Insight, Non-Destructive Testing and Condition Monitoring incorporating the European Journal of NDT formerly the British Journal of Non-Destructive Testing

ISSN: 1354-2575

## VOLUME 64 2022 – INDEXES

### Key to issues

|      |          |         |       |           |         |
|------|----------|---------|-------|-----------|---------|
| No 1 | January  | 1-64    | No 7  | July      | 369-424 |
| No 2 | February | 65-120  | No 8  | August    | 425-480 |
| No 3 | March    | 121-184 | No 9  | September | 481-552 |
| No 4 | April    | 185-244 | No 10 | October   | 553-612 |
| No 5 | May      | 245-308 | No 11 | November  | 613-672 |
| No 6 | June     | 309-368 | No 12 | December  | 673-732 |

### REGULAR FEATURES AND SHORT TITLES

|   |   |
|---|---|
| Comment   | 2, 66, 122, 186, 246, 310, 370, 426, 482, 554, 614, 674   |
| Conference Report   |   |
| The 59th Annual Conference of the British Institute of NDT – NDT 2022 | 620   |
| Corporate Members   | 64, 120, 184, 244, 308, 368, 424, 480, 552, 612, 672, 732 |
| Institute Awards  | 8, 488  |
| Institute Membership  | 128, 314, 486, 678  |
| Institute Notices   | 315   |
| International Diary   | 50, 106, 170, 229, 295, 354, 411, 465, 537, 598, 659, 719 |
| NDT Info  | 54, 110, 174, 233, 298, 357, 414, 469, 540, 601, 661, 722 |
| Newsdesk  | 4, 69, 125, 189, 248, 312, 373, 429, 485, 557, 616, 676   |
| Obituaries  |   |
| Mr M J Bailey   | 559   |
| Product Showcase  | 61, 117, 181, 241, 305, 365, 422, 477, 549, 609, 669, 729 |
| Special Features  |   |
| CM 2022 Conference Papers   | 425   |
| Condition Monitoring  | 1   |
| Electromagnetics  | 65  |
| Magnetic Methods  | 185   |

## SUBJECT INDEX

### ACFM

|  |     |
|--|-----|
| Welding defect detection in nuclear power plant spent fuel pool panels based on<br>alternating current field measurement: experimental and finite element analysis,<br><i>by Zhaoming Zhou, Chunfu Yang, Liyan Liu, Donghong Zhao and Kai Li</i> ..... | 695 |
|--|-----|

### ACOUSTIC EMISSION METHODS

|  |     |
|--|-----|
| Acoustic mechanism and characteristics of corrosion bubble rupture,<br><i>by Qiu Feng, Bai Yongzhong, Qu Dingrong and Chen Wenwu</i> .....   | 99  |
| Damage identification of wind turbine blades based on acoustic emission,<br><i>by Zihan Wang, Kaidi Xu, Zhichun Luo, Jia Zhang and Yanzhao Bi</i> .....  | 279 |
| Acoustic emission-based monitoring of fatigue damage in CFRP-CFRP<br>adhesively bonded joints,<br><i>by M Carboni and A Bernasconi</i> .....   | 393 |
| Quantitative analysis of the structural health of railway turnouts using the<br>acoustic emission technique,<br><i>by M Kongpuang, R Culwick, N Cheputeh, A Marsh, V L Jantara Junior,<br/>P Vallely, S Kaewunruen and M Papaalias</i> ..... | 398 |
| Study of the acoustic emission characteristics of weld cracks in carbon<br>steel pressure vessels,<br><i>by Gongtian Shen, Yongna Shen and Yilin Yuan</i> .....  | 496 |
| Acoustic emission signal-based non-destructive testing of carbon content of<br>Pr-Nd alloys,<br><i>by Xin-yu Chen, Xin-yu Wu, Fei-fei Liu, Bo-hua Zeng, Yuan-min Tu and<br/>Le-le Cao</i> .....  | 503 |
| <i>In-situ</i> fatigue damage monitoring of rolled Al-Zn-Mg alloy using an advanced<br>acoustic emission technique,<br><i>by Rong Hua Zhu, Da Zhao Chi and Xiao Hong Zhan</i> .....  | 702 |

### COMPUTED TOMOGRAPHY

|  |     |
|--|-----|
| Efficient algebraic image reconstruction technique for computed tomography,<br><i>by R Hanna, M Sutcliffe, P Charlton and S Mosey</i> .....  | 326 |
| <i>In-situ</i> phase analysis of large inclusions by combining computed tomography<br>and energy-selective X-ray diffraction,<br><i>by Ji-qing Cai, Huan Wang, Kun Wang, Ling Qin and Peng-cheng Zhang</i> ..... | 349 |
| Deep learning-based defect detection in industrial CT volumes of castings,<br><i>by A R Dakak, V Kaftandjian, P Duvauchelle and P Bouvet</i> .....   | 647 |

### CONDITION MONITORING AND SHM

|   |     |
|---|-----|
| Research on gearbox impact feature extraction method based on improved<br>ESMD,<br><i>by Fengfeng Bie, Sheng Gu, Yue Guo, Gang Yang and Jian Peng</i> .....   | 20  |
| Wind turbine blades fault detection using system identification-based<br>transmissibility analysis,<br><i>by Xuefei Wang, Long Zhang and W P Heath</i> .....  | 164 |
| A relative torsional vibration monitoring method for intelligent ships and<br>associated error analysis,<br><i>by Yunsheng An, Chaoming Huang, Zhanhua Wu, Qingtao Li, Jie Li,<br/>Kexin Sheng, Wenhan Hao and Shuangyin Chen</i> ..... | 285 |
| Both radial and axial load distribution measurement on a V-band clamp by<br>a new load cell design,<br><i>by G Capobianco, N Bohun, M Gratton, R Serra, A Zinbi and N Rigollet</i> .....  | 432 |
| Advanced turbine generator torsional vibration evaluation method using<br>Kalman filtering,<br><i>by J Liska, J Jakl and S Kunkel</i> .....   | 437 |
| Loaded and unloaded tooth contact analysis of spiral bevel gears in<br>consideration of misalignments,<br><i>by M Moslem, A Zippo, G Iarriccio, L Bergamini and F Pellicano</i> .....   | 442 |
| A generalised machine learning model based on multinomial logistic<br>regression and frequency features for rolling bearing fault classification,<br><i>by A Kiakojouri, Z Lu, P Mirring, H Powrie and Ling Wang</i> .....              | 447 |
| Anomaly detection-based condition monitoring,<br><i>by M Káš and F F Wamba</i> .....  | 453 |
| Deep learning recognition of bolt looseness and axial force compensation of<br>shape memory alloy,<br><i>by Genshang Wu, Xinyao Sun, Shuanghui Hao, XianFeng Yan and YiTao Zhao</i> .....   | 528 |

### EDDY CURRENT

|   |     |
|---|-----|
| Simulation of eddy current testing of steam generator tubes with wear and<br>secondary side magnetite deposits,<br><i>by T Sollier, J-M Decitre, A Vigneron and E Demaldent</i> .....       | 73  |
| Thickness measurement for spherical balls based on a frequency difference<br>feature,<br><i>by Gang Hu, Ruochen Huang, Yuchun Shao and Wuliang Yin</i> .....                                | 84  |
| Simulation and experimental research on 316L liner of bimetal composite<br>pipe with eddy current testing,<br><i>by YiLai Ma, JinZhong Chen, Yang Jin and RenYang He</i> .....              | 131 |
| Quantitative evaluation of defects based on the characteristics of the induced<br>eddy current field,<br><i>by Wenqing Yao, Yuan Yang, Feng Jiang, Xinyu Di, Li Tao and Long Geng</i> ..... | 201 |

### ELECTROMAGNETIC AND MAGNETIC METHODS

|  |    |
|--|----|
| Study on stress testing of ferromagnetic materials based on magnetic<br>anisotropy,<br><i>by Ruilei Zhang, Ziyang Gong, Zhongchao Qiu, Yuntian Teng and Zhe Wang</i> .....             | 45 |
| Experimental substantiation of diagnostic parameters used in metal magnetic<br>memory method,<br><i>by A A Dubov, Al A Dubov, P Ladanyi, A Y Marchenkov and S M Kolokolnikov</i> ..... | 79 |

|   |     |   |     |
|---|-----|---|-----|
| Comparison of longitudinal critically refracted ultrasonic waves and magnetic Barkhausen noise for tensile stress measurement,<br><i>by Yuhong Zhu, Yang Zheng, Jidong Tan and Junfeng Zhou</i> .....                               | 192 | ROBOTIC NDT   |     |
| Comprehensive evaluation of damages in ferromagnetic materials based on integrated magnetic detection,<br><i>by Yuntian Teng, Ruilei Zhang, Jingsong Yang, Zhongchao Qiu and Xun Chen</i> .....                                     | 206 | Object recognition using tactile sensing in a robotic gripper,<br><i>by V Rizzo, C Pieringer, S Flores and C Carrasco</i> .....   | 383 |
| Imaging and quantitative detection of complex defects with a flexible electromagnetic array sensor,<br><i>by Hao Ma, Xiangbin Ye, Dixiang Chen, Lihui Liu and Yuan Ren</i> .....  | 213 | SIGNAL AND DATA PROCESSING  |     |
| A novel identification approach for corrosion and gouging of oil and gas pipelines based on low magnetisation level MFL inspection,<br><i>by Jinzhong Chen, Xiaowei Kang, Xuewei Zhang, Renyang He, Tao Meng and Kai Song</i> ..... | 270 | Milling chatter monitoring based on sparse representation and image similarity measurement,<br><i>by Kai Yang, Guofeng Wang and Junyu Cong</i> .....  | 146 |
| Experimental research on a pipeline through-wall communication system based on extremely low frequency,<br><i>by Ming Li, Weihong Li, Xiaolin Wang, Shimin Zhang and Xiaoxiao Zhu</i> .....   | 317 | Detecting corrugation defects in harbour railway networks using axle-box acceleration data,<br><i>by J Heusel, B Baasch, W Riedler, M Roth, S Shankar and J C Groos</i> .....                                   | 404 |
| Experimental analysis of the piezomagnetic properties of ferromagnetic steels subjected to cyclic tensile stress,<br><i>by Sheng Bao, Yan Li, Zhengye Zhao, Tao Jiang and Huangjie Lou</i> .....                                    | 334 | Detection and correction of equipment biases during engine tests,<br><i>by A Mourer and J Lacaille</i> .....  | 459 |
| Research on pipe in-line inspection technology based on the rotating electromagnetic field,<br><i>by Feng Yijing, Zhang Laibin, Zheng Wenpei and Liu Haitao</i> .....   | 377 | Application of empirical mode decomposition to determine pile lengths subject to lateral impact,<br><i>by Thanh-Vinh Nguyen, Helsin Wang and Chung-Yue Wang</i> .....   | 589 |
| A prediction model for oil and gas pipeline deformation based on ACM inspection signal waveforms,<br><i>by Jiaxing Xin, Jinzhong Chen, Xiaolong Li, Renyang He and Hongwu Zhu</i> .....   | 573 | THERMOGRAPHY AND THERMAL METHODS  |     |
| Metal-loss defect depth inversion in oil and gas pipelines based on Bayesian regularisation neural network,<br><i>by Fengmiao Tu, Minghui Wei, Jun Liu, LiXia Jiang and Jia Zhang</i> .....   | 680 | Research and application of infrared thermography testing technology for large-scale amusement rides,<br><i>by Gongtian Shen, Yuan Liu, Zunxiang Wang and Yue Yu</i> .....                                      | 12  |
| Study on surface crack detection of ferromagnetic materials based on remanence,<br><i>by Jiarui Feng, Entao Yao, Ping Wang and Yu Shi</i> .....   | 688 | THICKNESS MEASUREMENT   |     |
| FAULT AND FAILURE DIAGNOSIS   |     | Thickness measurement method for the thermal protection layer of a solid rocket motor based on a laser point cloud,<br><i>by Qizhou Wu, Jingjing Liu, Yong Jin, Youxing Chen, Lianxu Du and L M Waqas</i> ..... | 219 |
| Oil health index calculation and incipient fault diagnosis in power transformers using fuzzy logic,<br><i>by T Manoj and C Ranga</i> .....  | 28  | ULTRASONIC AND ACOUSTIC METHODS   |     |
| Real-time fault diagnosis and trend prediction of rolling bearings based on resampling dynamic time warping and time-domain indicator analysis,<br><i>by Maosheng Gao, Zhiwu Shang, Wanxiang Li, Shiqi Qian and Yan Yu</i> .....    | 38  | Study and comparison of pulse compression techniques with three types of excitation for high-temperature EMAT detection,<br><i>by Jinjie Cheng, Wenzhe Shi, Chao Lu, Yao Chen and Huiyu Bian</i> .....          | 138 |
| An effective centre frequency selection scheme based on variational mode extraction and its application to gear fault diagnosis,<br><i>by Xianyou Zhong, Tianyi Xia and Quan Mei</i> .....  | 155 | Comparison of longitudinal critically refracted ultrasonic waves and magnetic Barkhausen noise for tensile stress measurement,<br><i>by Yuhong Zhu, Yang Zheng, Jidong Tan and Junfeng Zhou</i> .....           | 192 |
| Fault diagnosis methods based on a time-series convolution and the comparison of multiple methods,<br><i>by Kaiyuan Lin, Zhiran Zhou, Dongbo Pan and Yu Zhang</i> .....   | 520 | Simulation and experiment of ultrasonic phased array for additive manufacturing titanium alloy with columnar crystal structure,<br><i>by Wentao Li, Bingguo Zhu, Zhenggan Zhou and Wuyin Jin</i> .....          | 262 |
| A feature extraction method based on moving multi-scale reconstruction and interactive energy entropy for gear fault diagnosis,<br><i>by Zhihui Hu, Zhihai Xu, Gongxian Wang and Lei Xiang</i> .....                                | 709 | Re-examination of critical-angle reflectometry used in ultrasonic non-destructive testing for estimating material anisotropy,<br><i>by Jia-Wei Liu and Young-Fo Chang</i> .....                                 | 341 |
| OPTICAL METHODS   |     | Application of a chord transducer for ultrasonic detection and characterisation of defects in MDPE butt fusion joints,<br><i>by M Shafiei Alavijeh, R Scott, F Seviaryn and R Gr Maev</i> .....                 | 560 |
| Combined application of an optical sensor and a common non-destructive instrument for corrosion monitoring in reinforced concrete members,<br><i>by S Thapa and R P Sharma</i> .....  | 252 | Roughness correction method for the measurement of attenuation coefficient using contact transducers,<br><i>by Tong Fu, Ping Chen and Huaqiang Liu</i> .....  | 582 |
| RADIOGRAPHY including DIGITAL RADIOGRAPHY   |     | Development of digital tools to enable remote ultrasonic inspection of fusion reactor in-vessel components,<br><i>by R Sanderson, A Sanderson, K Akowua and H Livesey</i> .....                                 | 633 |
| Radiographic image enhancement based on a triple constraint U-Net network,<br><i>by Deyan Yang, Hongquan Jiang, Zhen Liu, Yonghong Wang and Huyue Cheng</i> .....   | 511 | Correlation of non-destructive and destructive testing of concrete modified with rice husk ash and brick aggregate,<br><i>by R N Bhowmik and J Pal</i> .....  | 639 |
| RESEARCH  |     | WIRE ROPE TESTING   |     |
| The RCNDE industrial members' 2022 vision for the future requirements of NDE,<br><i>by C R Brett and P Thayer</i> .....   | 625 | Theoretical and experimental research on wire rope magnetic memory testing under weak magnetic excitation,<br><i>by Bing Li, Juwei Zhang and Qihang Chen</i> .....  | 91  |
|   |     | Application of a convolutional neural network in wire rope magnetic memory testing,<br><i>by Juwei Zhang, Bing Li, Zengguang Zhang and Qihang Chen</i> .....  | 566 |

# Guidelines for authors submitting technical articles to Insight – Non-Destructive Testing & Condition Monitoring (The Journal of the British Institute of Non-Destructive Testing)

## Editorial Policy

The editorial policy of the Journal ensures that each issue contains matter that is highly relevant to a wide range of readers, including engineers, technicians, academics and scientists, appealing to practitioners and young graduates alike.

The Institute invites contributions of quality and originality that will interest the readership of the Journal. Technical papers submitted are peer-reviewed by at least two referees. The decision to publish rests solely with the Technical Committee.

## Copyright

Authors of papers accepted for publication are requested to assign copyright to the British Institute of Non-Destructive Testing.

Full responsibility for the paper rests with the author(s), who, where appropriate, must have obtained permission to publish the material, including permission to use any material that may be protected by copyright.

## The Manuscript

The manuscript should be typed in English, in an A4-size document, in a single column with double line spacing and a margin of at least 25 mm all round. Pages should be numbered consecutively. Papers should be limited in length to 5000 words and 15 illustrations.

## Language and Grammar

The manuscript should be written clearly in English. Insight does not have the resource to re-write articles that have been poorly written or translated, or that contain major deficiencies in English grammar. It is recommended that authors who are not fluent in English should have their manuscript checked by a translator or native English speaker prior to submission, or use a language editing service. If the language of the paper submitted does not meet the requirements of Insight's editorial staff in this regard, the manuscript will be rejected outright.

## The Abstract

The abstract should introduce the paper succinctly. It should mention the techniques used without going into methodological detail and mention the most important results. The abstract should be written as a single paragraph and should cover the background, principal findings and conclusions of the paper. Please do not include any citations in the abstract. Avoid specialist abbreviations. Please note that in the online version (see below) the Abstract is viewable to all without charge so it represents a potentially valuable opportunity to 'market' your paper.

## Equations

Excessive mathematical detail and formulae that are widely available in the literature should be avoided.

If your manuscript is, or will be, in Microsoft Word and contains equations, please follow these instructions to make sure that your equations are editable when the file enters production:

- Format display equations in MathType (<https://www.wiris.com/en/mathtype>)
- Inline equations should be input completely via MathType
- Do not include an equation that is part text, part MathType
- Do not use graphic objects.

## Abbreviations

Please keep abbreviations to a minimum. Define them upon first use in the text, for example: magnetic flux leakage (MFL). Non-standard abbreviations should not be used unless they appear at least three times in the text.

## References

References should be written in the order in which they appear in the text in the following format:

1. L Udpa and S S Udpa, 'Neural networks for the classification of non-destructive evaluation signals', IEE Proceedings-F, Vol 138, No 1, pp 201-205, February 1991.

The reference point in the text should be formatted thus [1].

## Biographic Footnote

A short paragraph of 60-70 words in length containing brief education and career details about each author/co-author should be set out on a separate sheet, accompanied by a head and shoulders photograph. For presentation reasons, the biography and photographs will only be used where there are up to two co-authors. For three or more authors, a brief statement of qualifications, current employment and, where applicable, Institute membership will be published for each.

## Acceptable File Types

Papers can be submitted using any standard word processing software, although MS Word is preferred. In addition, a PDF version may be uploaded, though the online system converts the submitted Word version to PDF for the review process.

Figures should be submitted as separate files in TIFF, EPS or JPEG format. Colour images should be formatted as high-quality JPEGs. Figures submitted in colour will be published in colour at no charge to the authors at the discretion of Insight's editorial staff.

## LaTeX submissions

The main body of the TeX or LaTeX document (ie a file ending with '.tex') should be uploaded as above and designated as a Main Document. All files referenced by a main TeX/LaTeX document should be designated as a 'TeX/LaTeX Suppl File' (including other '.tex' files).

## Awards

### The John Grimwade Medal

Contributors to Insight who are members of the British Institute of Non-Destructive Testing (of any grade) qualify for consideration for the John Grimwade Medal. This is awarded to author(s) of the best paper written by a member to appear in that Journal each year. Assessment is carried out annually by the Institute's Technical Committee.

### The Ron Halmshaw Award

Established in 1994 through the generosity of Dr R Halmshaw MBE, The Ron Halmshaw Award is for the best paper published in Insight on any aspect of industrial radiography or radiology. Assessment is carried out annually by the Institute's Technical Committee.

## How to submit a paper

Insight offers an online paper submission and peer-review system to help balance the need for comprehensive and efficient data gathering with authors' modern-day desires to publish quickly.

Authors wishing to submit a paper for consideration should visit the website:

<https://mc.manuscriptcentral.com/insi>

or via the link on the Institute's home page at [www.bindt.org](http://www.bindt.org)

Here, authors are clearly guided through the submission process. They are also able to track the status and view the details of all their manuscripts in the Insight peer-review system.

## Logging in

Access to the Insight submission site is provided in one of two ways:

1. Regular contributors and reviewers may have had an account already created for them. If this is the case they will have received an email with instructions on how to log in and set a user ID and password.
2. You may create your own account. Simply click on the 'Create Account' link at the top right-hand corner of the page and follow the step-by-step instructions.

## Passwords

Please retain your password information. For security reasons, we will not email you your current password. If you forget your password you must enter your email address in the Password Help field and click 'Go'. The system will send you an email containing instructions for resetting your password.

## The Welcome Page

When you log in you are taken to the Welcome page. Here you see links to all of the role centres for which you have permissions. Typically, authors are given both Author and Reviewer permissions.

To access your author dashboard page, click the 'Author Center' link.

## Instructions and Forms

Click the tab at the top right corner of any site page to access the Guidelines for Authors, Copyright form and Insight's Publishing Agreement.

## The Author Dashboard

This is where you begin the manuscript submission process. Also, at a glance, you can track the status and view the details of all your manuscripts. Click the appropriate queue in the My Manuscripts section. The information will display at the bottom of the page.

## The Manuscript Submission Process

To begin the submission process, use the 'Click here to submit a new manuscript' button.

Follow the step-by-step instructions carefully.

The final review step before submitting your manuscript is to review your submission. All sections must display the green tick before you can click 'Submit' to complete the submission process.

After the paper is successfully submitted you will receive confirmation along with your manuscript ID number.

The manuscript will display in the 'Submitted Manuscripts' column of your dashboard.

Step-by-step instructions for the submission process and further details for LaTeX submissions may be found on the BINDT website at: <https://www.bindt.org/publications/insight-journal/online-paper-submission>

## THE BRITISH INSTITUTE OF NON-DESTRUCTIVE TESTING

Midsummer House, Riverside Way, Bedford Road, Northampton NN1 5NX, UK. Tel: +44 (0)1604 438300; Email: [insight@bindt.org](mailto:insight@bindt.org)

# INSIGHT

**INSIGHT – Non-Destructive Testing and Condition Monitoring** is the journal of the British Institute of Non-Destructive Testing.

**INSIGHT** was launched in April 1994, replacing the former *British Journal of Non-Destructive Testing* and incorporating, in quarterly issues, the former *European Journal of Non-Destructive Testing*.

**INSIGHT** is published monthly and circulated worldwide to more than 65 countries.

## FEATURES PROGRAMME 2023

|       |                             | DEADLINES      |                     |             |
|-------|-----------------------------|----------------|---------------------|-------------|
| Month | Theme                       | Editorial Copy | Ad Copy Instruction | Ad Material |
| Jan   | Novel Applications          | 15.11.2022     | 22.11.2022          | 29.11.2022  |
| Feb   | Electromagnetics            | 12.12.2022     | 19.12.2022          | 04.01.2023  |
| Mar * | Composites Inspection       | 16.01.2023     | 23.01.2023          | 30.01.2023  |

### \* Euro issue

In addition to the above features, each issue includes general news stories affecting the whole industry and technical articles on a broad range of subjects.

### INSIGHT contains:

- Technical and scientific reviews
- Original research and development papers
- Practical case studies and surveys
- Details of products and services
- Newsdesk – contract and marketing news from the industry
- NDT Info – the world's most comprehensive serially published survey of NDT literature
- Technical literature – a comprehensive review of relevant literature, including the latest international standards and safety information
- International Diary – a comprehensive listing of information and calls for papers concerning relevant events, conferences, symposia and exhibitions
- Profiles on personalities and organisations associated with the industry

Each issue embraces matter that is highly relevant to a wide range of readers, including engineers, technicians, academics and scientists, appealing to practitioners and young graduates alike.
