

# BINDT Workshop 2023: NDT of composites through life

22-23 March 2023

Royal National Lifeboat Institution (RNLI), Poole, UK

Following on from the previous successful composite event, we return to the RNLI, Poole, UK, as the host. This year will be a showcase of NDT practices across all stages of composite structures, whilst bringing together industry specialists from a varied background of engineered components. This year hopes to open the workshop to a variety of industries.

The two-day event aims to highlight the many varied NDT practices that composite components undergo through their stages of life in the automotive, aerospace, motorsport, marine, construction, rail, nuclear and renewable energy.

The workshop hopes to take the attendees along the life of composite components by hearing from leading industries working in composite structures, on how they work through difficult inspections through life to ensure that components are inspected with the required coverage to satisfy that they continue to meet their design intent.

This workshop looks to bring together various industrial specialists, to share their solutions to the constraints/limitations which they have overcome within their own businesses, this will help generate new contacts within other industries to help share best practice opportunities to the greater community within the composite world.

Topics to cover in the two-day event are: design, raw materials, NDT at concept, manufacture, install, inspection validation, standards, training, in-service inspection and repair, additive manufacture, end of life and re-use/recycling.

## Member of BINDT

£80.00 + VAT for one day

£130.00 + VAT for two days

## Non-member of BINDT

£95.00 + VAT for one day

£160.00 + VAT for two days

PCN and CPD points apply
