

The Scottish Branch of the British Institute of Non-Destructive Testing

The role of NDT in the assessment of asset integrity seminar

Friday 31 January 2025 at the Golden Jubilee Conference Hotel, Glasgow, UK

This one-day seminar, will take place from 10h00-15h00 at the Golden Jubilee Conference Hotel, Beardmore Street, Clydebank, Glasgow G81 4SA, on Friday 31 January 2025.

Asset integrity management (AIM) has evolved as an economic but targeted methodology that is designed to optimise the operational life and safety of ageing power and process plant. The process requires close collaboration between a range of inspection and assessment disciplines:

- Risk based inspection (RBI)
- Written schemes of examination (WSE)
- Plant (visual) inspection
- Condition monitoring (CM)
- NDT (encompassing non-invasive inspection (NII))
- Fitness for service (FFS) assessments
- Run/repair/replace decision-making.

This seminar will explain the various stages and describe the role and importance of NDT in the AIM process. It will include several presentations by field experts and a panel discussion supported by an exhibition of NDT providers and equipment suppliers.

The seminar will be of interest to anyone with a role or interest in plant integrity. It is an exceptional CPD opportunity for all and for NDT personnel to gain PCN points.

The Golden Jubilee Conference Hotel is located on the banks of the River Clyde in Glasgow, only a ten-minute walk from Dalmuir Station and a 20-minute drive from the city centre and airport.

In the evening, following a networking period, the venue will host the **Annual Burns Supper**, a celebration of the life and works of Robert Burns, with music, songs and dancing.

To register for this event, please complete the registration form below and return by email to: conf@bindt.org (an additional charge of £45.00 + VAT per head applies for the Burns Supper).
