SUMMARY OF CHANGES ........................................................................................................ 29
Scope

1. Terms and definitions
For the purposes of this document, the following terms and definitions apply.

2.1 audit
Assessment carried out by an auditing organization independent of the client, the supplier or sub-contractor, for the purpose of verifying the client's management system

NOTE 1: In the definitions which follow, the term ‘audit’ has been used for simplicity to refer to third-party audit and to supplier or sub-contractor audits, and is interchangeable with the term ‘assessment’.

NOTE 2: Audits include initial, follow-up, surveillance, re-certification, and special audits.

NOTE 3: A combined audit is when a client, supplier or subcontractor is being audited against two or more normative documents together, e.g., ISO 9001 and PCN CP9.

2.2 auditor
An individual, appointed by BINDT on the basis of possessing the requisite competence demonstrated during a formal programme of supervision and authorisation, who carries out audits of management systems leading to certification, authorisation or approval by BINDT.

NOTE 1 the terms ‘auditor’ and ‘auditor’ are, for the purpose of this document, considered to be interchangeable.

NOTE 2 possession of the requisite competence can be assumed if the individual has conducted or led audits under observation by an authorised evaluator and recorded as detailed at Annex C, including:

a) completed one or more appropriate courses of formal training, which include examinations to verify the assimilation of the required knowledge;

b) demonstrated possession of the required knowledge and skills detailed at Annex A and evaluated in accordance with Annex B;

c) possess the desired personal behaviours detailed at Annex D;

d) During audits conducted or led by the individual under observation by an authorised evaluator and recorded as detailed at Annex C.

NOTE 3: an auditor may be authorised by BINDT to carry out or to lead assessments after demonstrating the requisite competence during not less than two satisfactory audits carried out or led by the individual under the supervision of an authorised evaluator.

NOTE 4: Auditor Competence is addressed in detail in BINDT Internal Procedure PIP25: Assessor Authorisation and Competence Process

2.3 client
Organisation whose management system is being audited for certification purposes

NOTE reference within the text of this document to ‘certified client’ can also be understood to mean any auditee, including suppliers and sub-contractors to BINDT

2.4 competence
Ability to apply knowledge and skills to achieve intended results

2.6 evaluator
Individual appointed by BINDT on the basis of qualifications and experience to evaluate and report on the competence of auditors

2.6 guide
Person appointed by the client, supplier or sub-contractor to assist the audit team
2.7 impartiality
Actual and perceived presence of objectivity

NOTE 1 Objectivity means that conflicts of interest do not exist or are resolved so as not to adversely influence subsequent activities of BINDT.

NOTE 2 Other terms that are useful in conveying the element of impartiality are: objectivity, independence, freedom from conflict of interests, freedom from bias, lack of prejudice, neutrality, fairness, open-mindedness, even-handedness, detachment, balance.

2.8 observer
Person who accompanies the audit team but does not audit

2.9 sub-contractor
An organisation to which BINDT sub-contracts the assessment or examination of candidates seeking certification of competence under one or more of the PCN Schemes.

NOTE sub-contractors are referred to within the PCN Schemes as Authorised Qualifying Bodies (AQB)

2.10 supplier
An organisation which supplies training services to clients or their employees seeking qualification and certification under one or more of the PCN Schemes

NOTE suppliers are referred to within the PCN Schemes as Approved Training Organisations (ATO)

2.11 Verification (of management system compliance)
Process of conformity assessment leading to BINDT approval as a supplier or sub-contractor

2. Competence of management and personnel

3.1 Determination of competence criteria
[Carry out a Job/Task analysis, identifying key responsibilities and leading to the development of a Job Description detailing Required Competences and how they are developed (in terms of training, qualifications, experience) for each individual assigned the role]

BINDT has a documented process, elaborated in Annex C, for determining the competence criteria for personnel involved in the management and performance of audits and certification.

Competence criteria is determined with regard to the requirements for each technical area, e.g. Condition Monitoring (CM) and Non-destructive Testing (NDT) and for each function in the certification process.

The output of the process is the documented criteria of required knowledge and skills necessary to effectively perform audit and certification tasks to be fulfilled to achieve the intended results.

Annex A specifies the knowledge and skills for specific functions and processes.

Auditor Competence is addressed in detail in BINDT Internal Procedure PIP25: Assessor Authorisation and Competence Process

3.2 Evaluation processes
BINDT has documented processes for the initial competence evaluation, and on-going monitoring of competence and performance of all personnel involved in the management and performance of audits and certification, applying the determined competence criteria.

The output from these processes shall be to identify personnel who have demonstrated the level of competence required for the different functions of the audit and certification process.

The evaluation methods used to evaluate knowledge and skills are described in Annex B

BINDT ensures that its evaluation methods are effective through the submission to Management Review of evaluator reports and subsequent improvement actions.

3.3 Personnel involved in the certification activities
BINDT employs, or has access to, a sufficient number of auditors, including audit team leaders, and technical experts, to cover all of its activities and to handle the volume of audit work performed. BINDT's capability is continually
monitored by Certification Services management, which reports to and takes direction from the Certification Management Committee (CMC).

BINDT communicates to each person concerned their duties, responsibilities and authority through the issue of job descriptions and/or terms of reference, and has processes for selecting, training, evaluating and formally authorizing auditors and for selecting technical experts used in the certification and verification activity. Documented procedures provide audit instructions and all relevant information on the certification activities.

The initial competence evaluation of an auditor includes the ability to apply required knowledge and skills during audits, as determined by a competent evaluator observing the auditor conducting an audit.

NOTE During the selection and training process described above desired personal behaviours are considered. These are characteristics that affect an individual’s ability to perform specific functions. Therefore, knowledge about the behaviours of individuals enables BINDT to take advantage of their strengths and to minimize the impact of their weaknesses. Desired personal behaviours that are important for personnel involved in certification activities are described in Annex D.

BINDT uses an initial induction training process (see PIP/29), followed by an auditor-in-training period to achieve and demonstrate effective auditing, including the use of auditors and audit team leaders possessing generic auditing skills and knowledge, as well as skills and knowledge appropriate for auditing in specific technical areas. BINDT allows only those auditors and technical experts that have demonstrated competence to carry out audits unsupervised.

BINDT ensures that auditors (and, where needed, technical experts) are knowledgeable of its audit processes, certification requirements and other relevant requirements through the conduct of a periodic auditor workshop intended to provide continuation training and ensure consistency between auditors. The annual workshop identifies training needs and provides specific training to ensure its auditors, technical experts and other personnel involved in certification activities maintain competency for the functions they perform.

Those personnel that take the decision on granting, maintaining, renewing, extending, reducing, suspending or withdrawing certification shall demonstrate an understanding of the applicable standard and certification requirements, and shall have demonstrated competence to evaluate the audit processes and related recommendations of the audit team.

BINDT ensures the satisfactory performance of all personnel involved in the audit and certification activities through monitoring and measurement of the performance of all persons involved, based on the frequency of their usage and the level of risk linked to their activities. In particular, BINDT reviews the competence of its personnel in the light of their performance in order to identify training needs.

The documented monitoring procedures for auditors includes a combination of periodic on-site observation, review of audit reports and feedback from clients. The frequency of on-site observations is based on need determined from all monitoring information available.

3.4 Outsourcing

External sub-contract auditors are engaged under a legally enforceable agreement covering the arrangements, including confidentiality and conflict of interests, with each individual or body that provides outsourced services.

BINDT requires external auditors and external technical experts to have a written agreement (see Annex C table C2) by which they commit themselves to comply with applicable policies and procedures as defined by BINDT. The agreement addresses aspects relating to confidentiality and to independence from commercial and other interests, and requires the external auditors and external technical experts to notify BINDT of any existing or prior association with any organization they may be assigned to audit. The use of individual auditors and technical experts under such agreements does not constitute outsourcing.

Decisions for granting, maintaining, renewing, extending, reducing, suspending or withdrawing certification are never outsourced.

BINDT:

- Takes responsibility for all activities outsourced to another body,
- Ensures that the body that provides outsourced services, and the individuals that it uses, conform to requirements of BINDT and also to the applicable provisions of ISO IEC 17021, including competence, impartiality and confidentiality, and
Ensures that the body that provides outsourced services, and the individuals that it uses, are not involved, either directly or through any other employer, with an organization to be audited, in such a way that impartiality could be compromised.

BINDT has documented procedures for the qualification and monitoring of all bodies or individuals that provide outsourced services used for certification activities, and ensures that records of the competence of auditors and technical experts are maintained (Annex C table C1).

3.5 Personnel records

BINDT shall maintain up-to-date personnel records, including relevant qualifications, training, experience, affiliations, professional status, competence and any relevant consultancy services that may have been provided. This includes management and administrative personnel in addition to those performing certification activities.

3.6 Confidentiality

BINDT has, through legally enforceable agreements (see Annex C table C2), a policy and arrangements to safeguard the confidentiality of the information obtained or created during the performance of certification activities at all levels of its structure, including committees and external bodies or individuals acting on its behalf.

BINDT informs the client, in published documents, of the information it intends to place in the public domain. All other information, except for information that is made publicly accessible by the client, is considered confidential.

Except as required in ISO IEC 17021 [2], information about a particular client or individual shall not be disclosed to a third party without the written consent of the client or individual concerned. Where BINDT is required by law to release confidential information to a third party, the client or individual concerned shall, unless regulated by law, be notified in advance of the information provided.

Information about the client from sources other than the client (e.g. complainant, regulators) shall be treated as confidential, consistent with BINDT’s policy.

Personnel, including any committee members, contractors, personnel of external bodies or individuals acting on BINDT’s behalf, shall keep confidential all information obtained or created during the performance of BINDT’s activities.

BINDT uses equipment and facilities that ensure the secure handling of confidential information (e.g. documents, records).

When confidential information is made available to other bodies (e.g. an accreditation body), BINDT informs its client of this action.

3. Processes

4.1 Application

4.1.1 Submission

BINDT require an authorized representative of the applicant organization to provide the necessary information to enable BINDT CSD management to establish the following:

- The desired scope of the certification;
- The general features of the applicant organization, including its name and the address(es) of its physical location(s), significant aspects of its process and operations, and any relevant legal obligations;
- General information, relevant for the field of certification applied for, concerning the applicant organization, such as its activities, human and technical resources, functions and relationship in a larger corporation, if any;
- Information concerning all outsourced processes used by the organization that will affect conformity to requirements;
- The standards or other requirements for which the applicant organization is seeking certification;
- Information concerning the use of consultancy relating to the management system.

4.1.2 Review

Before proceeding with the audit, BINDT shall conduct a review of the application and supplementary information for certification to ensure that
The information about the applicant organization and its management system is sufficient for the conduct of the audit;

The requirements for certification are clearly defined and documented, and have been provided to the applicant organization;

Any known difference in understanding between BINDT and the applicant organization is resolved;

BINDT has the competence and ability to perform the certification activity;

The scope of certification sought, the location(s) of the applicant organization’s operations, time required to complete audits and any other points influencing the certification activity are taken into account (language, safety conditions, threats to impartiality, etc.);

Records of the justification for the decision to undertake the audit are maintained.

Review of new applications shall be recorded on form CP14/A

4.1.3 Acceptance (or rejection)

Following the review of the initial application, BINDT either accepts or declines an application for certification. When BINDT declines an application for certification as a result of the review of application, the reasons for declining an application are documented and made clear to the client.

4.1.4 Determine competences

Based on this review, BINDT determines the competences it needs to include in its audit team and for the certification decision.

The audit team is comprised of auditors (and technical experts, as necessary) who, between them, have the totality of the competences identified by BINDT as set out above for the certification of the applicant organization. The selection of the team is performed with reference to the designations of competence of auditors and technical experts (ISO/IEC 17021-3 [3]), and may include the use of both internal and external human resources.

The individual(s) who will be conducting the certification decision shall be competent for the task.

4.1.5 Information exchange between BINDT and its clients

BINDT provides and updates clients on the following:

- a detailed description of the initial and continuing certification activity, including the application, initial audits, surveillance audits, and the process for granting, maintaining, reducing, extending, suspending, withdrawing certification and recertification;
- the normative requirements for certification;
- information about the fees for application, initial certification and continuing certification;
- BINDT’s requirements for prospective clients to
  - comply with certification requirements,
  - make all necessary arrangements for the conduct of the audits, including provision for examining documentation and the access to all processes and areas, records and personnel for the purposes of initial certification, surveillance, recertification and resolution of complaints, and
  - make provisions, where applicable, to accommodate the presence of observers (e.g. accreditation auditors or trainee auditors);
- documents describing the rights and duties of certified clients, including requirements, when making reference to its certification in communication of any kind in line with the requirements in 8.4;
- Information on procedures for handling complaints and appeals.

4.1.6 Audit programme

An audit programme for the full certification cycle is developed to clearly identify the audit activity required to demonstrate that the client’s management system fulfils the requirements for certification or verification to the selected standard(s) or other normative document(s).

The audit programme includes a two-stage initial audit, surveillance audits in the first and second years, and a recertification audit in the third year prior to expiration of certification. The three-year certification cycle begins with the date of the certification or recertification decision.
At the discretion of BINDT and dependent upon favourable audit outcomes during the 3 year certification cycle process, Organisations may be awarded a two-year (biennial) approval and certificate. In such instances full reassessment audits will be conducted on a biennial basis which shall negate the need for interim surveillance assessments. BINDT reserves the right to return Organisations to the full 3 year certification cycle should circumstance change.

The determination of the audit programme and any subsequent adjustments shall consider the size of the client organization, the scope and complexity of its management system, products and processes as well as demonstrated level of management system effectiveness and the results of any previous audits.

Annex E refers to cross functional flowcharts of BINDT’s audit and certification process.

Annex F lists additional items that can be considered when developing or revising an audit programme.

Annex G provides a sequential representation of the assessment process and includes a form (checklist) for recording the completion of each item.

Where BINDT takes account of certification or other audits already granted to the client, e.g., verification audits of sub-contractor or suppliers, it shall collect sufficient, verifiable information to justify and record any adjustments to the audit programme.

4.1.7 Notice of changes by BINDT

BINDT provides its certified clients due notice of any changes to its requirements for certification, and verifies that each certified client complies with the new requirements within a specified period.

4.1.8 Notice of changes by a client

BINDT has legally enforceable arrangements to ensure that the certified client informs BINDT, without delay, of matters that may affect the capability of the management system to continue to fulfil the requirements of the standard used for certification. These include, for example, changes relating to

- the legal, commercial, organizational status or ownership,
- organization and management (e.g. key managerial, decision-making or technical staff),
- contact address and sites,
- scope of operations under the certified management system, and
- Major changes to the management system and processes.

4.2 Audit team selection and assignments

BINDT implements a process for selecting and appointing the audit team, including the audit team leader, taking into account the competence needed to achieve the objectives of the audit. If there is only one auditor, the auditor shall have the competence to perform the duties of an audit team leader applicable for that audit.

In deciding the size and composition of the audit team, consideration is given to the following:

- audit objectives, scope, criteria and estimated time of the audit;
- the overall competence of the audit team needed to achieve the objectives of the audit;
- certification requirements (including any applicable statutory, regulatory or contractual requirements);
- language and culture;
- Whether the members of the audit team have previously audited the client's management system.

The necessary knowledge and skills of the audit team leader and auditors may be supplemented by technical experts, translators and interpreters who operate under the direction of an auditor. Where translators or interpreters are used, they are selected such that they do not unduly influence the audit.

Auditors-in-training may be included in the audit team as participants, provided an auditor is appointed as an evaluator. The evaluator shall be competent to take over the duties and have final responsibility for the activities and findings of the auditor-in-training.

The audit team leader, in consultation with the audit team, shall assign to each team member responsibility for auditing specific processes, functions, sites, areas or activities. Such assignments shall take into account the need for competence, and the effective and efficient use of the audit team, as well as different roles and responsibilities of auditors, auditors-in-training and technical experts. Changes to the work assignments may be made as the audit progresses to ensure achievement of the audit objectives.
BINDT Certification Services Division shall furnish the Lead Auditor (once selected) shall be with the pre-audit review documents detailed below, as applicable:

- CP14A: Application Review (New Applicants)
- CP14B: Application Review (Existing Approval holders)

4.3 Audit time

4.3.1 Determine audit time

BINDT has documented procedures for determining audit time (PSL/21), and for each client BINDT shall determine the time needed to plan and accomplish a complete and effective audit of the client’s management system. The audit time determined by BINDT, and the justification for the determination, shall be recorded. In determining the audit time, BINDT CSD Management considers, among other things, the following aspects:

- the requirements of the relevant management system standard;
- size and complexity;
- technological and regulatory context;
- any outsourcing of any activities included in the scope of the management system;
- the results of any prior audits;
- number of sites and multi-site considerations;
- the risks associated with the products, processes or activities of the organization;
- When audits are combined or integrated, i.e., supplier (ATO) and/or sub-contractor (AQB).

The time spent by any team member that is not assigned as an auditor (i.e. technical experts, translators, interpreters, observers and auditors-in-training) shall not count in the above established audit time. The use of translators, interpreters or the inclusion/presence of auditors in training can necessitate additional audit time.

4.3.2 Multi-site sampling

Where multi-site sampling is utilized for the audit of a client’s management system covering the same activity in various locations, BINDT lead auditors shall develop a sampling programme to ensure proper audit of the management system. The rationale for the sampling plan shall be documented for each client.

4.4 Audit plan

An audit plan is established for each audit identified in the audit programme to provide the basis for agreement regarding the conduct and scheduling of the audit activities. This audit plan is based on documented requirements of BINDT. The Lead auditor is responsible for the development and communication of the audit plan.

4.4.1 Determining audit objectives, scope and criteria

Audit objectives are determined by BINDT. The audit scope and criteria, including any changes, is established by BINDT after discussion with the client.

The audit objectives describe what is to be accomplished by the audit and include:

- determination of the conformity of the client’s management system, or parts of it, with audit criteria;
- evaluation of the ability of the management system to ensure the client organization meets applicable statutory, regulatory and contractual requirements;
- evaluation of the effectiveness of the management system to ensure the client organization is continually meeting its specified objectives;
- Identification of areas for potential improvement of the management system.

The audit scope describes the extent and boundaries of the audit, such as physical locations, organizational units, activities and processes to be audited. Where the initial or re-certification process consists of more than one audit (e.g. covering different locations), the scope of an individual audit may not cover the full certification scope, but the totality of audits shall be consistent with the scope in the certification document.
Annex F lists additional items that can be considered when preparing or revising the audit scope.

The audit criteria are used as a reference against which conformity is determined, and shall include:

- the requirements of a defined normative document on management systems;
- The defined processes and documentation of the management system developed by the client.

4.4.2 Preparing the audit plan

The audit plan shall be appropriate to the objectives and the scope of the audit, and shall include or refer to at least:

- audit objectives;
- audit criteria;
- audit scope, including identification of the organizational and functional units or processes to be audited;
- dates and sites where the on-site audit activities are to be conducted, including visits to temporary sites, as appropriate;
- expected time and duration of on-site audit activities;
- Roles and responsibilities of the audit team members and accompanying persons.

The audit plan information can be contained in more than one document.

Annex F lists additional items that can be considered when preparing or revising the audit plan.

4.5 Communication

4.5.1 Communication of audit team tasks

The tasks given to the audit team shall be defined and shall be made known to the client organization, and shall require the audit team to

- examine and verify the structure, policies, processes, procedures, records and related documents of the client organization relevant to the management system,
- determine that these meet all the requirements relevant to the intended scope of certification,
- determine that the processes and procedures are established, implemented and maintained effectively, to provide a basis for confidence in the client's management system, and
- Communicate to the client, for its action, any inconsistencies between the client's policy, objectives and targets (consistent with the expectations in the relevant management system standard or other normative document) and the results.

4.5.2 Communication concerning audit team members

BINDT shall provide the name of and, when requested, make available background information on each member of the audit team, with sufficient time for the client organization to object to the appointment of any particular auditor or technical expert and for BINDT to reconstitute the team in response to any valid objection.

NOTE: sub-contractors and suppliers shall not be given an opportunity to object to the appointment of an auditor. If necessary, certification and sub-contractor or supplier audits shall be separated if objections to the appointment of a particular auditor arise.

4.5.3 Communication of audit plan

The audit plan shall be communicated and the dates of the audit shall be agreed upon, in advance, with the client organization.

4.5.4 Communication during the audit

During the audit, the audit team shall periodically assess audit progress and exchange information. The audit team leader shall reassign work as needed between the audit team members and periodically communicate the progress of the audit and any concerns to the client.

Where the available audit evidence indicates that the audit objectives are unattainable or suggests the presence of an immediate and significant risk (e.g. safety), the audit team leader shall report this to the client and, if possible, to BINDT to determine appropriate action. Such action may include reconfirmation or modification of the audit plan, changes to the audit objectives or audit scope, or termination of the audit. The audit team leader shall report the outcome of the action taken to BINDT.
The audit team leader shall review with the client any need for changes to the audit scope which becomes apparent as on-site auditing activities progress and report this to BINDT.

4.6 Conduct of on-site audits

BINDT implements a process for conducting on-site audits which includes an opening meeting at the start of the audit and a closing meeting at the conclusion of the audit. On-site audits shall normally include the use of approved BINDT checklists that are prepared to address the requirements of the applicable governing documents.

NOTE: In addition to visiting physical location(s) (e.g. factory), “on-site” can include remote access to electronic site(s) that contain(s) information that is relevant to the audit of the management system.

4.6.1 Initial certification audit

The initial certification audit of a management system shall be conducted in two stages: stage 1 and stage 2.

4.6.1.1 Stage 1 audit

The stage 1 audit shall be performed to

- audit the client's management system documentation;
- evaluate the client's location and site-specific conditions and to undertake discussions with the client’s personnel to determine the preparedness for the stage 2 audit;
- review the client's status and understanding regarding requirements of the standard, in particular with respect to the identification of key performance or significant aspects, processes, objectives and operation of the management system;
- Collect necessary information regarding the scope of the management system, processes and location(s) of the client, and related statutory and regulatory aspects and compliance (e.g. quality, environmental, legal aspects of the client's operation, associated risks, etc.);
- review the allocation of resources for stage 2 audit and agree with the client on the details of the stage 2 audit;
- provide a focus for planning the stage 2 audit by gaining a sufficient understanding of the client’s management system and site operations in the context of possible significant aspects;
- Evaluate if the internal audits and management review are being planned and performed, and that the level of implementation of the management system substantiates that the client is ready for the stage 2 audit.

For most management systems, it is recommended that at least part of the stage 1 audit be carried out at the client's premises in order to achieve the objectives stated above.

Stage 1 audit findings shall be documented and communicated to the client, including identification of any areas of concern that could be classified as nonconformity during the stage 2 audit.

In determining the interval between stage 1 and stage 2 audits, consideration shall be given to the needs of the client to resolve areas of concern identified during the stage 1 audit. BINDT may also need to revise its arrangements for stage 2 - dependent upon the recommendations from the stage 1 report.

4.6.1.2 Stage 2 audit

The purpose of the stage 2 audit is to evaluate the implementation, including effectiveness, of the client’s management system. The stage 2 audit shall take place at the site(s) of the client. It shall include at least the following:

- information and evidence about conformity to all requirements of the applicable management system standard or other normative document;
- performance monitoring, measuring, reporting and reviewing against key performance objectives and targets (consistent with the expectations in the applicable management system standard or other normative document);
- the client’s management system and performance as regards legal compliance;
- operational control of the client’s processes;
- internal auditing and management review;
- management responsibility for the client’s policies;
Links between the normative requirements, policy, performance objectives and targets (consistent with the expectations in the applicable management system standard or other normative document), any applicable legal requirements, responsibilities, competence of personnel, operations, procedures, performance data and internal audit findings and conclusions.

4.6.2 Conducting the opening meeting

A formal opening meeting, where attendance shall be recorded, shall be held with the client’s management and, where appropriate, those responsible for the functions or processes to be audited. The purpose of the opening meeting, which shall usually be conducted by the audit team leader, is to provide a short explanation of how the audit activities will be undertaken and shall include the following elements:

- introduction of the participants, including an outline of their roles;
- confirmation of the scope of certification;
- confirmation of the audit plan (including type and scope of audit, objectives and criteria), any changes, and other relevant arrangements with the client, such as the date and time for the closing meeting, interim meetings between the audit team and the client’s management;
- confirmation of formal communication channels between the audit team and the client;
- confirmation that the resources and facilities needed by the audit team are available;
- confirmation of matters relating to confidentiality;
- confirmation of relevant work safety, emergency and security procedures for the audit team;
- confirmation of the availability, roles and identities of any guides and observers;
- the method of reporting, including any grading of audit findings;
- information about the conditions under which the audit may be prematurely terminated;
- confirmation that the audit team leader and audit team representing BINDT is responsible for the audit and shall be in control of executing the audit plan including audit activities and audit trails;
- confirmation of the status of findings of the previous review or audit, if applicable;
- methods and procedures to be used to conduct the audit based on sampling;
- confirmation of the language to be used during the audit;
- confirmation that, during the audit, the client will be kept informed of audit progress and any concerns;
- Opportunity for the client to ask questions.

The degree of detail shall be consistent with the familiarity of the client with the audit process.

4.6.3 Assignment of observers and guides

4.6.3.1 Observers

The presence and justification of observers during an audit activity shall be agreed to by BINDT and client prior to the conduct of the audit. The audit team shall ensure that observers do not influence or interfere in the audit process or outcome of the audit.

NOTE Observers can be members of the client’s organization, consultants, witnessing accreditation body personnel, regulators or other justified persons.

4.6.3.2 Guides

Each auditor shall be accompanied by a guide unless otherwise agreed to by the audit team leader and the client. Guide(s) are assigned to the audit team to facilitate the audit. The audit team shall ensure that guides do not influence or interfere in the audit process or outcome of the audit.

NOTE: The responsibilities of a guide can include:

- establishing contacts and timing for interviews;
- arranging visits to specific parts of the site or organization;
- ensuring that rules concerning site safety and security procedures are known and respected by the audit team members;
- witnessing the audit on behalf of the client;
- Providing clarification or information as requested by an auditor.

4.6.4 Collecting and verifying information

During the audit, information relevant to the audit objectives, scope and criteria (including information relating to interfaces between functions, activities and processes) shall be collected by appropriate sampling and verified to become audit evidence.

Methods to collect information shall include, but are not limited to:

- interviews;
- observation of processes and activities;
- Review of documentation and records.

4.6.5 Identifying and recording audit findings

Audit findings summarizing conformity and detailing nonconformity and its supporting audit evidence shall be recorded and reported (on reports forms designed for the purpose) to enable an informed certification decision to be made or the certification to be maintained.

Opportunities for improvement may be identified and recorded as observations. Audit findings which are nonconformities shall not be recorded as opportunities for improvement (observations).

A finding of nonconformity shall be recorded against a specific requirement of the audit criteria, contain a clear statement of the nonconformity and identify in detail the objective evidence on which the nonconformity is based. Nonconformities shall be discussed with the client to ensure that the evidence is accurate and that the nonconformities are understood. The auditor shall refrain from suggesting the cause of nonconformities or their solution.

The audit team leader shall attempt to resolve any diverging opinions between the audit team and the client concerning audit evidence or findings, and unresolved points shall be recorded.

4.6.6 Initial audit conclusions

The audit team shall analyse all information and audit evidence gathered during the stage 1 and stage 2 audits to review the audit findings and agree on the audit conclusions.

Information for granting initial certification

The information provided by the audit team to BINDT for the certification decision shall include, as a minimum,

- the audit reports,
- comments on the nonconformities and, where applicable, the correction and corrective actions taken by the client,
- confirmation of the information provided to BINDT used in the application review (see 9.2.2), and
- A recommendation whether or not to grant certification, together with any conditions or observations.

BINDT shall make the certification decision on the basis of an evaluation of the audit findings and conclusions and any other relevant information (e.g. public information, comments on the audit report from the client).

4.6.7 Preparing audit conclusions

Prior to the closing meeting, the audit team shall:

- review the audit findings, and any other appropriate information collected during the audit, against the audit objectives;
- agree upon the audit conclusions, taking into account the uncertainty inherent in the audit process;
- identify any necessary follow-up actions;
- Confirm the appropriateness of the audit programme or identify any modification required (e.g. scope, audit time or dates, surveillance frequency, competence).
4.6.8 Conducting the closing meeting

A formal closing meeting, where attendance shall be recorded, shall be held with the client’s management and, where appropriate, those responsible for the functions or processes audited. The purpose of the closing meeting, which shall normally be conducted by the audit team leader, is to present the audit conclusions, including the recommendation regarding certification. Any nonconformities shall be presented in such a manner that they are understood, and the timeframe for responding shall be agreed.

The closing meeting shall also include the following elements:

- advising the client that the audit evidence collected was based on a sample of the information; thereby introducing an element of uncertainty;
- the method and timeframe of reporting, including any grading of audit findings;
- BINDT’s process for handling nonconformities including any consequences relating to the status of the client’s certification;
- the timeframe for the client to present a plan for correction and corrective action for any nonconformities identified during the audit;
- BINDT’s post audit activities;
- Information about the complaint handling and appeal processes.

The degree of detail shall be consistent with the familiarity of the client with the audit process.

Any diverging opinions regarding the audit findings or conclusions between the audit team and the client shall be discussed and resolved where possible. Any diverging opinions that are not resolved shall be recorded and referred to BINDT.

4.7 Audit report

4.7.1 Report preparation

BINDT assessors shall provide fully documented reports for each audit. Audit Reports may be compiled electronically or by hand. The audit report shall normally be provided to the auditee at the closing meeting or as soon as possible afterwards (by agreement). The following audit forms shall be used.

- CP14C: Audit Report Form
- CP14D: Audit Findings Report and Resolution Record

The audit team may identify opportunities for improvement but shall not recommend specific solutions. Ownership of the audit report shall be retained by BINDT.

The audit team leader shall ensure that the audit report is prepared and shall be responsible for its content. The audit report shall provide an accurate, concise and clear record of the audit to enable an informed certification decision to be made and shall include or refer to the following:

- identification of BINDT as the certifying or verifying authority;
- the name and address of the client and the client’s management representative;
- the type of audit (e.g. initial, surveillance or recertification audit);
- the audit criteria;
- the audit objectives;
- the audit scope, particularly identification of the organizational or functional units or processes audited and the time of the audit;
- identification of the audit team leader, audit team members and any accompanying persons;
- the dates and places where the audit activities (on site or offsite) were conducted;
- audit findings, evidence and conclusions, consistent with the requirements of the type of audit;
- Any unresolved issues, if identified.
4.7.2 Lead Auditor Recommendations

At the conclusion of the assessment, during the closing meeting, the Lead Auditor, in conjunction with support assessors if applicable, shall present the audit findings together with a final recommendation on the outcome of the assessment. The Lead auditor only makes recommendations. The final decision on Approval remains with BINDT Certification panels who may or may not agree with the Lead Auditor recommendation.

The lead auditor recommendation will normally be in the form of one of the four guidance clauses given below or a variation thereof. These conclusions are given for Lead Auditor guidance only. The Lead auditor may record other approval recommendations at his/her discretion.

Guidance audit approval recommendations are given below:

A) Unconditional approval.

B) Conditionally approved provided corrective actions to clear non-compliances are satisfactorily implemented within an agreed period. Evidence of implementation may be submitted to the Lead Auditor by email

C) Conditionally approved provided corrective actions to clear non-compliances are satisfactorily implemented within an agreed period. Implementation will be confirmed during a follow-up audit at a date to be decided by BINDT.

D) Approval withheld, suspended or withdrawn. The audited organisation will not be approved without a further full audit.

4.7.3 Cause analysis of nonconformities

BINDT requires the client to analyse the cause and describe the specific correction and corrective actions taken, or planned to be taken, to eliminate detected nonconformities, within a defined time.

4.7.4 Effectiveness of corrections and corrective actions

The BINDT Lead Assessor shall review the corrections, identified causes and corrective actions submitted by the client to determine if these are acceptable, and shall verify the effectiveness of any correction and corrective actions taken. The evidence obtained to support the resolution of nonconformities shall be recorded. The client shall be informed of the result of the review and verification.

NOTE Verification of effectiveness of correction and corrective action can be carried out based on a review of documentation provided by the client, or where necessary, through verification on-site at the next assessment or specially arranged intermediate assessment.

4.7.5 Additional audits

The client shall be informed if an additional full audit, an additional limited audit, or documented evidence (to be confirmed during future surveillance audits) will be needed to verify effective correction and corrective actions.

4.8 Certification decision

BINDT shall ensure that the persons or committees that make the certification or recertification decisions are different from those who carried out the audits.

4.8.1 Actions prior to making a decision

BINDT shall confirm, prior to making a decision, that

- the information provided by the audit team is sufficient with respect to the certification requirements and the scope for certification;
- it has reviewed, accepted and verified the effectiveness of correction and corrective actions, for all nonconformities that represent
  - failure to fulfil one or more requirements of the management system standard, or
  - a situation that raises significant doubt about the ability of the client’s management system to achieve its intended outputs;
- it has reviewed and accepted the client’s planned correction and corrective action for any other nonconformities.
4.9 Surveillance activities

4.9.1 General

BINDT shall develop its surveillance activities so that representative areas and functions covered by the scope of the management system are monitored on a regular basis, and take into account changes to its certified client and its management system.

Surveillance activities shall include on-site audits assessing the auditee's certified or verified management system's fulfilment of specified requirements with respect to the standard to which the certification is granted.

Other surveillance activities may include

- enquiries from BINDT to the certified client on aspects of certification,
- reviewing any client's statements with respect to its operations (e.g. promotional material, website),
- requests to the client to provide documents and records (on paper or electronic media), and
- Other means of monitoring the certified client's performance.

4.9.2 Surveillance audit

Surveillance audits are on-site audits, but are not necessarily full system audits, and shall be planned together with the other surveillance activities so that BINDT can maintain confidence that the certified management system continues to fulfil requirements between recertification audits. The surveillance audit programme shall include, at least

- internal audits and management review,
- a review of actions taken on nonconformities identified during the previous audit,
- treatment of complaints,
- effectiveness of the management system with regard to achieving the certified client's objectives,
- progress of planned activities aimed at continual improvement,
- continuing operational control,
- review of any changes, and
- Use of marks and/or any other reference to certification.

Surveillance audits shall be conducted at least once a year. The date of the first surveillance audit following initial certification shall not be more than 12 months from the last day of the stage 2 audit.

4.10 Maintaining certification

BINDT will maintain certification based on demonstration that the client continues to satisfy the requirements of the management system standard. It may maintain a client's certification based on a positive conclusion by the audit team leader without further independent review, provided

- For any nonconformity or other situation that may lead to suspension or withdrawal of certification, BINDT has a system that requires the audit team leader to report to BINDT the need to initiate a review by appropriately competent personnel, different from those who carried out the audit, to determine whether certification can be maintained, and
- Competent personnel of BINDT monitor its surveillance activities, including monitoring the reporting by its auditors, to confirm that the certification activity is operating effectively.

4.11 Recertification

4.11.1 Recertification audit planning

A recertification audit shall be planned and conducted to evaluate the continued fulfilment of all of the requirements of the relevant management system standard or other normative document. The purpose of the recertification audit is to confirm the continued conformity and effectiveness of the management system as a whole, and its continued relevance and applicability for the scope of certification.

The recertification audit shall consider the performance of the management system over the period of certification, and include the review of previous surveillance audit reports.
Recertification audit activities may need to have a stage 1 audit in situations where there have been significant changes to the management system, the client, or the context in which the management system is operating (e.g. changes to legislation).

In the case of multiple sites or certification to multiple management system standards being provided by BINDT, the planning for the audit shall ensure adequate on-site audit coverage to provide confidence in the certification.

4.11.2 Recertification audit

The recertification audit shall include an on-site audit that addresses the following:

- the effectiveness of the management system in its entirety in the light of internal and external changes and its continued relevance and applicability to the scope of certification;
- demonstrated commitment to maintain the effectiveness and improvement of the management system in order to enhance overall performance;
- Whether the operation of the certified management system contributes to the achievement of the organization's policy and objectives.

When, during a recertification audit, instances of nonconformity or lack of evidence of conformity are identified, BINDT shall define time limits for correction and corrective actions to be implemented prior to the expiration of certification.

4.11.3 Information for granting recertification

BINDT shall make decisions on renewing certification based on the results of the recertification audit, as well as the results of the review of the system over the period of certification and complaints received from users of certification.

4.12 Special audits

4.12.1 Extensions to scope

BINDT shall, in response to an application for extension to the scope of a certification already granted, undertake a review of the application and determine any audit activities necessary to decide whether or not the extension may be granted. This may be conducted in conjunction with a surveillance audit.

4.12.2 Short-notice audits

It may be necessary for BINDT to conduct audits of certified clients at short notice to investigate complaints, or in response to changes, or as follow up on suspended clients. In such cases

- BINDT shall describe and make known in advance to the certified clients the conditions under which these short notice visits are to be conducted, and
- BINDT shall exercise additional care in the assignment of the audit team because of the lack of opportunity for the client to object to audit team members.

4.13 Suspending, withdrawing or reducing the scope of certification

BINDT has a policy and documented procedure (PIP/18) for suspension, withdrawal or reduction of the scope of certification, and shall specify the subsequent actions by BINDT.

BINDT will suspend certification in cases when, for example,

- the client's certified management system has persistently or seriously failed to meet certification requirements, including requirements for the effectiveness of the management system,
- the certified client does not allow surveillance or recertification audits to be conducted at the required frequencies, or
- The certified client has voluntarily requested a suspension.

Under suspension, the client's management system certification is temporarily invalid. BINDT shall have enforceable arrangements with its clients to ensure that in case of suspension the client refrains from further promotion of its certification. BINDT shall make the suspended status of the certification publicly accessible and shall take any other measures it deems appropriate.

Failure to resolve the issues that have resulted in the suspension in a time established by BINDT shall result in withdrawal or reduction of the scope of certification.
NOTE In most cases the suspension would not exceed 6 months.

BINDT shall reduce the client's scope of certification to exclude the parts not meeting the requirements, when the client has persistently or seriously failed to meet the certification requirements for those parts of the scope of certification. Any such reduction shall be in line with the requirements of the standard used for certification.

BINDT has enforceable arrangements with the certified client concerning conditions of withdrawal [see PIP/18] ensuring upon notice of withdrawal of certification that the client discontinues its use of all advertising matter that contains any reference to a certified status.

Upon request by any party, BINDT shall correctly state the status of certification of a client's management system as being suspended, withdrawn or reduced.

4.14 Complaints and appeals

4.14.1 Complaints

A description of the complaints-handling process (PIP/27) is publicly accessible (CP/21).

Upon receipt of a complaint, BINDT shall confirm whether the complaint relates to certification activities that it is responsible for and, if so, shall deal with it. If the complaint relates to a certified client, then examination of the complaint shall consider the effectiveness of the certified management system.

Any complaint about a certified client shall also be referred by BINDT to the certified client in question at an appropriate time.

BINDT shall have a documented process to receive, evaluate and make decisions on complaints. This process shall be subject to requirements for confidentiality, as it relates to the complainant and to the subject of the complaint.

The complaints-handling process includes the following elements and methods:

- an outline of the process for receiving, validating, investigating the complaint, and for deciding what actions are to be taken in response to it;
- tracking and recording complaints, including actions undertaken in response to them;
- Ensuring that any appropriate correction and corrective action are taken.

The BINDT manager receiving the complaint shall be responsible for gathering and verifying all necessary information to validate the complaint.

Whenever possible, BINDT shall acknowledge receipt of the complaint, and shall provide the complainant with progress reports and the outcome.

The decision to be communicated to the complainant shall be made by, or reviewed and approved by, individual(s) not previously involved in the subject of the complaint.

Whenever possible, BINDT shall give formal notice of the end of the complaints-handling process to the complainant.

BINDT shall determine, together with the client and the complainant, whether and, if so to what extent, the subject of the complaint and its resolution shall be made public.

4.14.2 Appeals

BINDT has a documented process to receive, evaluate and make decisions on appeals. A description of the appeals-handling process is publicly accessible (CP21).

BINDT shall be responsible for all decisions at all levels of the appeals-handling process, and shall ensure that the persons engaged in the appeals-handling process are different from those who carried out the audits and made the certification decisions.

Submission, investigation and decision on appeals shall not result in any discriminatory actions against the appellant.

The appeals-handling process shall include at least the following elements and methods:

- an outline of the process for receiving, validating and investigating the appeal, and for deciding what actions are to be taken in response to it, taking into account the results of previous similar appeals;
- tracking and recording appeals, including actions undertaken to resolve them;
- Ensuring that any appropriate correction and corrective action are taken.

BINDT shall acknowledge receipt of the appeal and shall provide the appellant with progress reports and the outcome.
The decision to be communicated to the appellant shall be made by, or reviewed and approved by, individual(s) not previously involved in the subject of the appeal.

BINDT shall give formal notice to the appellant of the end of the appeals-handling process.

### 4.15 Records of applicants and clients

BINDT maintains records on the audit and other certification activities for all clients, including all organizations that submitted applications, and all organizations audited, certified, or with certification suspended or withdrawn.

Records on certified clients include the following:

a) Application information and initial, surveillance and recertification audit reports;

b) Certification agreement;

c) Justification of the methodology used for sampling;

d) Justification for audit time determination;

e) Verification of correction and corrective actions;

f) Records of complaints and appeals, and any subsequent correction or corrective actions;

g) Committee deliberations and decisions, if applicable;

h) Documentation of the certification decisions;

i) Certification documents, including the scope of certification with respect to product, process or service, as applicable;

j) related records necessary to establish the credibility of the certification, such as evidence of the competence of auditors and technical experts.

**NOTE** Methodology of sampling includes the sampling employed to assess the specific management system and/or to select sites in the context of multi-site assessment.

BINDT maintains the records on applicants and clients secure to ensure that the information is kept confidential. Records are transported, transmitted or transferred in a way that ensures that confidentiality is maintained.

BINDT has a documented policy and documented procedures on the retention of records. Records are retained for at least the duration of the current cycle plus one full certification cycle.
Annex A - Required knowledge and skills

The following table specifies the knowledge and skills for specific certification functions.

Table A — Required knowledge and skills (for various personnel)

A1 - Competence requirements for QMS auditors

A1.1 Quality Management terminology, principles, practices and techniques

Knowledge of:

a) Terms and definitions related to quality management
b) Quality management principles and their application
c) The application of PDCA (plan do check act) and the process approach
d) The hierarchy and interrelationship of QMS documentation structures
e) Scopes and the applicability of exclusions
f) Quality related tools, methods, techniques and their application, which can include:
   i) Principles for economics of quality
   ii) Quality policy implementation methodology
   iii) Process mapping techniques;
   iv) Methods for identifying and monitoring customer perception and satisfaction;
   v) Improvement tools (e.g., Lean, Six Sigma, Kaizen, etc.);
   vi) Statistical techniques;
   vii) Risk management approach;
   viii) Problem solving techniques;
   ix) Measuring of processes;
   x) Root cause analysis.

A1.2 Quality management system standards and normative documents

Knowledge of:

a) Relevant quality management system standards and other normative documents used in the certification process and their application;
b) The interaction between the elements of the quality management system standards and other documents.
A1.3 Business management practices

Knowledge of:

a) General business management concepts, practices and the inter-relationship between policy and objectives;

b) The impact of organization types, size, governance, structure, functions and relationships on development and implementation of the quality management system and certification activities;

c) Management processes and related terminology.

NOTE: These processes also include human resources management, internal and external communication, and other relevant support processes.

A1.4 Client business sector

Knowledge of:

a) Generic terminology, processes and technologies related to the client business sector;

b) The relevant business sector practices;

NOTE: A business sector is understood to be the economic activities covering a broad range of related technical areas.

A1.5 Client products, processes and organization

Knowledge of:

a) Terminology, processes and technology specific to clients' technical area (see ISO/IEC 17021, clause 7.1.2)

b) Statutory and regulatory requirements applicable to the product or service.

NOTE: Statutory and regulatory requirements can be expressed as legal requirements.

c) Technical characteristics of processes, products and services;

d) The infrastructure and work environment affecting product quality;

e) The concept of outsourcing.

Note: Auditor Competence is addressed in detail in BINDT Internal Procedure PIP25: Assessor Authorisation and Competence Process

A2 - Competence requirements for other personnel

A2.1 Competence of personnel conducting the application review to determine the audit team competence required, to select the audit team members and to determine the audit time

2.1.1 Quality management system standards and normative documents

Knowledge of relevant quality management system standards and other normative documents used in the certification process to verify the details of the application from the client to ensure that an audit team with the necessary competence and audit time is selected for the audit assignment.

2.1.2 Client business sector

Knowledge of generic terminology and processes related the relevant business sector practices to verify the details of the application from the client to ensure that an audit team with the necessary competence and audit time is selected for the audit assignment.

2.1.3 Client products, processes and organization

Knowledge of client products, processes and organization to be aware of the requirements that apply to the client and the technological and organizational context of the client to verify the details of the application from the client to ensure that an audit team with the necessary competence and audit time is selected for the audit assignment.

A2.2 Competence of personnel reviewing audit reports and making certification decisions

2.2.1 Quality management terminology, principles, practices and techniques

Knowledge of:

a) Terms and definitions related to quality management;

b) Quality management principles and their application;
c) The application of PDCA (plan do check act) and the process approach;

d) The hierarchy and interrelationship of QMS documentation structures;

e) Scopes and the applicability of exclusions;

f) Quality related tools, methods, techniques and their application

2.2.2 Quality management system standards and normative documents

Knowledge of relevant quality management system standards and other normative documents used in the certification process.

2.2.3 Client business sector

Knowledge of generic terminology and processes related the relevant business sector practices to verify the audit reports compiled by the audit team leader and to ensure sector specific practices have been considered during the audit process
Annex B - Evaluation methods

B.1 General

Methods for evaluating individuals’ competence can be grouped into five major categories: review of records, feedback, interviews, observations and examinations. These can be further subdivided. The following is a brief description of each method and its usefulness and limitations for evaluating knowledge and skills. It is unlikely that any one method on its own will confirm competence.

The (following) methods in B.2 to B.6 can provide useful information of knowledge and skills; they are more effective when they are designed to be used with specified competence criteria resulting from the competence determination process specified in 7.1.2 and 7.1.3.

This is followed by an example of a process flow for determining and maintaining competence in Annex C.

B.2 Review of records

Records alone are not likely to be sufficient evidence of competence, but some records are indicators of knowledge, such as a résumé or curriculum vitae showing work experience, audit experience, education and training.

Some records are indicators of skills, such as audit reports, records of work experience, audit experience, education and training.

Other records are direct evidence of demonstration of competence such as a report of a performance appraisal of an auditor conducting an audit.

B.3 Feedback

Feedback alone is not satisfactory evidence of competence, but feedback by peers can be an indicator of knowledge and skills (bear in mind that such feedback can be influenced by the relationship between the peers, and feedback from clients can also be an indicator of knowledge and skills (for an auditor, the feedback can be influenced by the results of the audit).

B.4 Interviews

Interviews may be used to assess language, communication and interpersonal skills.

Employment interviews can be useful for elaborating on information from résumés and past work experience, and interviews as part of performance reviews can provide specific information on knowledge and skills.

An interview of an audit team for a post audit review can provide useful information about an auditor’s knowledge and skills. It provides an opportunity to understand why an auditor made specific decisions, selected specific audit trails, etc. This technique may be used after an observed audit and may also be used later when considering the written audit report. This technique may be particularly useful in determining competence relative to a specific technical area.

Direct evidence of demonstration of competence can be achieved by a structured interview with appropriate records against specified competence criteria.

B.5 Observations

Observing a person periodically is useful to confirm continued competence, and observing a person performing a specific task can provide direct evidence of the application of knowledge and skills to achieve a desired result. This method of evaluation is useful for all functions, administrative and management staff as well as for auditors and certification decision-makers.
Annex C - Determining and recording auditor competence

Quality Systems Auditors (permanent staff and contract personnel) act in accordance with a prescribed brief contained within documented procedures. Auditors are appointed on behalf of the appropriate committee on the recommendation of the Certification Manager / Scheme Manager, who assesses the adequacy of the resource needed to accomplish the assessment task in hand or proposed.

The appointment is made following due consideration of the relevance of the qualifications, background and experience of the individual concerned, and after at least two satisfactory assessments (in the role of support or lead auditor as appropriate) carried out under the supervision of an evaluator,

Prior to appointment, auditors are provided with specific training specified by the Scheme Manager / Certification Manager (see below for subjects to be covered).

The function of appointed Lead Auditor is to audit existing and applicant organisations as directed by the Scheme Manager / Certification Manager. Support auditors, where appointed, work under the direction of a Lead Auditor.

The performance of auditors is reviewed by the Scheme Manager or Certification Manager who will assign an impartial evaluator to observe the conduct of at least one assessment in each calendar year, except for overseas based auditors who will be re-evaluated on a three yearly basis. Any observation of inappropriate behaviour or poor audit technique is to result in further training.

Auditors are required to:

- Notify the Scheme Manager / Certification Manager of any change in their auditor status, training or experience.
- Initially provide and continually update a curriculum vitae in the light of any training received or qualifications awarded.
- Undergo periodic assessment which is recorded on the form below.

Note: auditors must reject all offers of gifts and only accept hospitality that:

(a) Would be charged to the customer in any case, such as a lunch, dinner, refreshments and
(b) Would be considered reasonable. If an auditor has any doubt as to whether a gift or hospitality given or received is in breach with the above, then they must seek the advice of the Certification Manager.

Note: Auditor Competence is addressed in detail in BINDT Internal Procedure PIP25: Assessor Authorisation and Competence Process
Annex D - Desired personal behaviours

Examples of personal behaviours that are important for personnel involved in certification activities for any type of management system are described as follows:

a) Ethical, i.e. fair, truthful, sincere, honest and discreet;
b) Open-minded, i.e. willing to consider alternative ideas or points of view;
c) Diplomatic, i.e. tactful in dealing with people;
d) Collaborative, i.e. effectively interacting with others;
e) Observant, i.e. actively aware of physical surroundings and activities;
f) Perceptive, i.e. instinctively aware of and able to understand situations;
g) Versatile, i.e. adjusts readily to different situations;
h) Tenacious, i.e. persistent and focused on achieving objectives;
i) Decisive, i.e. reaches timely conclusions based on logical reasoning and analysis;
j) Self-reliant, i.e. acts and functions independently;
k) Professional, i.e. exhibiting a courteous, conscientious and generally business-like demeanour in the workplace;
l) Morally courageous, i.e. willing to act responsibly and ethically even though these actions may not always be popular and may sometimes result in disagreement or confrontation;
m) Organized, i.e. exhibiting effective time management, prioritization, planning, and efficiency.

Determination of behaviours is situational, and weaknesses may only become apparent in a specific context. BINDT shall take appropriate action for any identified weakness that adversely affects the certification activity.
Annex E – Audit & verification and certification processes

(See detailed cross functional flowcharts)

Annex F - Considerations for the audit programme, scope or plan

F.1 General
This annex includes a list of items that a certification body can consider when developing or revising an audit programme, scope or plan.

F.2 List of items for consideration
The list includes the following:

a) The scope and complexity of the client’s management system;
b) Products and processes (including services);
c) Size of the client organization;
d) Sites to be audited;
e) Language of the client organization and languages spoken and written;
f) The requirements of sector or regulatory schemes;
g) Client and their customers' requirements and expectations;
h) The number and timing of shifts;
i) Audit time required for each audit activity;
j) Competence of each member of the audit team;
k) The need to audit temporary sites;
l) Results of the stage 1 audit or of any other previous audits;
m) Results of other surveillance activities;
n) Demonstrated level of management system effectiveness;
o) Eligibility for sampling;
p) Customer complaints;
q) Complaints received by BINDT about the client;
r) Combined, integrated or joint audits;
s) Changes to the client's organization, products, processes or its management system;
t) Changes to the certification requirements;	u) Changes to legal requirements;
v) Changes to accreditation requirements;
w) Risk and complexity;
x) Organizational performance data [e.g. defect levels, key performance indicators (KPI) data, etc.];
y) Interested parties' concerns;
z) Information gained during previous audits.
Annex G – Assessment and certification processes

Assessment & Certification Process Sequence (see detailed cross functional flowcharts)

The following is a sequential list of the stages of assessment and certification (or verification) of management systems, and applies equally to assessment of suppliers, sub-contractors and clients’ management systems.

- Contract review - Certification Body (CB)
- Development of an audit programme (CB)
- Assignment of lead and support auditors (CB)
  - Audit Stage 1
    - Selection and appointment by CB of lead auditor (LA)
    - off-site quality system compliance audit (LA)
    - on-site review of resources and infrastructure (LA)
    - submit report and recommendations regarding stage 2 (LA)
  - Determination of charged time required for stage 2 (CB)
  - Audit Stage 2
    - selection and appointment of audit team - Certification Body (CB)
    - preparation and publication of audit plan - Lead Auditor (LA)
    - travel to site - audit team (AT)
    - on-site audit and agreement of improvement actions/timescales (AT)
    - post audit reporting (LA)
    - follow-on review and acceptance of improvement action evidence (LA)
- Certification* (CB)
  - review and acceptance of reports and recommendations (CB)
  - submission to and review by an impartial panel
- Surveillance (CB)
  - Repeat stage 2 (AT)
- Recertification (CB)
  - Repeat stage 1 if scope change is significant (LA)
  - Repeat stage 2 (AT)

*1 Not applicable in the case of supplier or sub-contractor assessment and approval.
