BINDT use only

BINDT membership number

Application for Fellow

Entry is limited to candidates who have long experience of a high calibre and responsibility. No specific qualifications are laid down and each application is assessed on the overall merits of the candidate. Typically, candidates would be of at least five years standing as a member, with at least ten years high calibre experience and achieved a position of high responsibility.

Chartered Engineers of at least five years standing and scientists of comparable status and seniority may also qualify. In addition candidates would normally have made (or be making) a significant contribution to the NDT, condition monitoring or associated industry and/or the Institute (for example, involvement with BINDT committees or branches, participation on external committees/working groups).

It is the candidate's responsibility to supply sufficient information to allow BINDT to arrive at a decision on the application.

Please complete all sections as comprehensively as possible (**'See CV' or similar wording or an incomplete application is not acceptable and will result in rejection of this application**).

All candidates must provide names and addresses of two referees (page 6)

Check list (tick when enclosed)

CV ☐ Photo ID ☐ Training/CPD Record ☐ Copies of academic and training certificates ☐

Please tick if already registered as CEng ☐ IEng ☐

Please state the institution if not registered through BINDT: Registration number (if applicable):

1. Personal details

Title (Mr, Mrs, Miss, other):	Date of birth:	Age:	
Full name (underline surname):			
Home address (including postcode):		Name and address of organisation (including postcode):

5. Other evidence in support of application

Give details, with dates, of any other relevant evidence that will support your application, for example lectures given, papers published in technical journals or any research or development for which you have been responsible.

Details	First referee's initials
<p><i>Continue on separate sheet if necessary.</i></p>	

6. Institute groups

The Institute has a number of groups, which cater for the specialist needs of its members. Membership of these groups, which are listed below, is available to you at no extra cost.

Please indicate if you wish to join any of the groups below.

Aerospace Group: ☐

The Aerospace Group is open to anyone with an interest in NDT as applicable to the aerospace industry.

COMADIT: ☐

The Condition Monitoring and Diagnostic Technology Group is for those members interested in determining the condition of machinery systems and structures in order to provide data for diagnostics and prognostics.

Referee's support form

All candidates **must** provide names and addresses of two referees. Referees must know you personally and be capable of verifying the statements in your application. One referee should be your current immediate superior.

It is **preferable** that referees should be voting members of this or a related institution and registered with the Engineering Council. They must not be subordinates of the applicant or direct family members. Referees are required to initial the areas of your application for which they have personal knowledge.

Referee details (to be completed by first referee)

1. If you are a member of BINDT, please state member grade and membership number

BINDT membership number:

BINDT membership grade:

2. If you are a member of any other UK or other professional institutions, please state member grade and name of institution.

Institution name:

Institution membership grade:

3. Current Engineering Registration.

CEng ☐ IEng ☐ EngTech ☐ N/A ☐

EC registration number:

4. Please state how you know the applicant

5. How long have you known the applicant?

Declaration by referee

I have read and initialled those sections of this application and its supporting documents covering the applicant's career information of which I have knowledge and confirm that the initialled statements are to the best of my belief correct.

9. Applicant's declaration

I, the undersigned, agree that as a Fellow of the institute, I will conduct myself honourably in the practice of my profession and to the utmost of my power will maintain the dignity and the welfare of the institute and will observe the Code of Conduct and Ethical Principals of the institute for the time being in force.

I undertake, if admitted, to pay the fees in connection with my membership and also to be bound by the Memorandum and Articles of Association of the institute and the Bye-Laws in force from time to time.

Entrance survey

Application for **Fellow**

Name:

Email:

Why have you applied to join the Institute?

Has your employer sponsored your application? Yes ☐ No ☐

How did you hear about BINDT?

What benefits do you see in becoming a BINDT member? (Tick all that apply)

Access to the jobs market ☐ Networking ☐
Journals/newsletters, etc ☐ Engineering registration ☐
Events/conferences ☐ Professional development opportunities ☐
Post-nominals ☐ Recognition ☐
Other – please define _____

Do you hold NDT/CM certification? (Tick all that apply)

ASNT ☐ BGAS/CSWIP ☐
CSWIP ☐ PCN – NDT ☐
EN 4179 ☐ PCN – CM ☐
None ☐ Other – please define _____

Which of the following types of information provided on our website (in order of importance) are most likely to assist you? (Please score 1-6)

Job search ☐ Technical information on equipment ☐
Technical articles at an advanced level ☐ To record your continuing professional development ☐
Technical articles at a basic level ☐ Access via the web to companies related to the NDT industry, such as equipment manufacturers and training, certification and consultancy companies ☐

Do you feel that joining one of BINDT's regional Branches will be of interest to you?

Yes ☐ No ☐

Would you be interested to know more about further qualifications in NDT (distance learning or residential)?

Yes ☐ No ☐

Would you be interested in offering a presentation or a venue for a Branch meeting?

Yes ☐ No ☐

If BINDT could provide table-top exhibitions/seminars in your locality, would this interest you?

Yes ☐ No ☐

Which of the services currently offered by BINDT are you likely to use? (Tick all that apply)

BINDT apps ☐ Book store ☐ Free legal services helpline* ☐
Medical insurance* ☐ Personal insurance* ☐ Professional insurance* ☐

* These services are offered through HMCA at a discounted rate to BINDT members.

Are there any other services you would like BINDT to offer?

BINDT Benevolent Fund

The objective of the Benevolent Fund is to raise and maintain by donations and voluntary subscriptions a fund that shall be devoted to the relief of poverty of persons in need, whether or not members of or subscribers to the Benevolent Fund, who are or have been members of the Institute and spouses, widows, widowers, children of such persons or dependants or, in exceptional circumstances, persons who are involved in NDT but have no connection to the Institute. (For the purpose of the Benevolent Fund, NDT includes all disciplines that are within the scope of the Institute, such as condition monitoring.)

Do you see any benefit related to the BINDT Benevolent Fund by being a member of BINDT? Yes ☐ No ☐

Would you be interested in joining a BINDT committee in order to have some involvement with the work of the Institute?*

Yes ☐ No ☐

If yes, which committee(s) (listed below)? _____

Would you be interested in being an NDT Ambassador for science, technology, engineering and mathematics (STEM) and outreach activities?

Yes ☐ No ☐

Thank you for your input so far. If you feel there are other issues with which BINDT might assist you and your future in NDT/CM, please give details:

***Joining the Main BINDT Committees**

If you have expressed an interest in joining a committee we will get back to you to discuss this further. We encourage those from all sectors, all career stages and all levels of engineering registration to become committee members. We particularly welcome interest from people belonging to under-represented groups in engineering or who are under-represented on our current committees. If you cannot join a BINDT committee yourself, please consider if anyone who reports to you would be suitable and whether you could facilitate their attendance at meetings as a professional development opportunity. More details are available on the BINDT website: <https://www.bindt.org/branches-and-committees/Institute-Committees/>

Technical Committee (TC)

If you join the Technical Committee you will help to plan and develop BINDT's technical publications, conferences, meetings and website. The TC takes responsibility for annual NDT and CM conferences and exhibitions which disseminate the scientific and technical knowledge that exists in the NDT, CM and SHM communities. As a member of TC, you can help BINDT to identify significant new technologies or industries where future activities are needed.

Membership, Qualification and Education Committee (MQ&E)

By joining BINDT's Membership, Qualification and Education committee you will gain an overview of the infrastructure for engineering careers in the NDT community, including membership applications, training and certification, education, apprenticeships, engineering registration, and diversity and inclusion. MQ&E has a special responsibility to represent the full range of our members and to reach out to everyone involved in NDT. We would particularly like to increase the representation from IEng and EngTech levels.

Education and Professional Development Committee

This subcommittee of MQ&E has a focus on the development and maintenance of apprenticeship standards and educational provision for NDT in universities, colleges and schools. The committee brings together industrial, educational and training partners in initiatives to promote the well-being and advancement of engineers, technicians and operators.

Certification Management Committee (CMC)

In the Certification Management Committee you will assist the Institute in maintaining confidence in its certification activities, with a particular focus on impartiality and objectivity, including openness and public perception. At least once annually, the committee conducts a review of the impartiality of the audit, certification and related decision-making processes of the Institute.

Trade & Industry Executive Committee

The Trade & Industry Executive Committee provides a voice for all Corporate Members of the Institute. Membership of this committee is open to one person nominated by each Corporate Member company. The Committee has two main subgroups: the Materials Testing Working Group and the Service Inspection Group.

Statement of Ethical Principles and Code of Conduct

The Engineering Council and the Royal Academy of Engineering have jointly created a Statement of Ethical Principles for all engineering professionals. The British Institute of Non-Destructive Testing (BINDT) has adopted these principles and has also included values that are specific to BINDT.

Engineering professionals work to enhance the wellbeing of society. In doing so, they are required to maintain and promote high ethical standards and challenge unethical behaviour. There are four fundamental principles for ethical behaviour and decision-making. These are set out below, together with examples of how each should be applied.

Members of the British Institute of Non-Destructive Testing, in recognition of the importance of the engineering profession in affecting the quality of life, should accept personal obligations to act with integrity in the public interest and maintain and improve their competence.

For PCN certificate holders, additional ethical principles are specified in the document CP27, which can be located at <http://www.bindt.org/downloads/CP27.pdf>. Members of BINDT who are also PCN certificate holders should therefore comply with this document and CP27 'Code of Ethics for PCN Certificate Holders'.

Honesty and Integrity:

Engineering professionals have a duty to uphold the highest standards of professional conduct, including openness, fairness, honesty and integrity. They should:

- Act in a reliable and trustworthy manner
- Be alert to the ways in which their work and behaviour might affect others and respect the privacy, rights and reputations of other parties and individuals
- Respect confidentiality
- Declare conflicts of interest
- Avoid deception and take steps to prevent or report corrupt practices or professional misconduct
- Reject bribery and improper influence
- Notify the CEO of the British Institute of Non-Destructive Testing on receiving a civil or criminal conviction, becoming bankrupt or disqualified under the Company Directors' Disqualification Act, 1986
- Notify the CEO of the British Institute of Non-Destructive Testing if membership has been terminated at another professional body as a result of a disciplinary action.

Respect for Life, Law, the Environment and Public Good:

Engineering professionals have a duty to obey all applicable laws and regulations and give due weight to facts, published standards and guidance in the wider public interest. They should:

- Hold paramount the health and safety of others and draw attention to hazards
- Ensure their work is lawful and justified
- Recognise the importance of physical and cyber security and data protection
- Respect and protect personal information and intellectual property
- Protect, and where possible improve, the quality of the built and natural environments
- Maximise the public good and minimise both actual and potential adverse effects for their own and succeeding generations
- Take due account of the limited availability of natural resources
- Uphold the reputation and standing of the profession.

Title	Ref no	Issue no	Issue date	Authorised by
Application for Fellow	MF003	4	13.02.24	D Gilbert

Accuracy and rigour:

Engineering professionals have a duty to acquire and use wisely the understanding, knowledge and skills needed to perform their role. They should:

- Always act with care
- Perform services only in areas in which they are currently competent or under competent supervision
- Keep their knowledge and skills up-to-date
- Assist the development of engineering knowledge and skills in others
- Undertake continuing professional development to maintain professional standards
- Present and review theory, evidence and interpretation honestly, accurately, objectively and without bias, while respecting reasoned alternative views
- Identify, evaluate, quantify, mitigate and manage risks
- Not knowingly mislead or allow others to be misled
- Report any violations of this code by another member to the CEO of the British Institute of Non-Destructive Testing.

Leadership and Communication:

Engineering professionals have a duty to abide by and promote high standards of leadership and communication. They should:

- Be aware of the issues that engineering and technology raise for society and listen to the aspirations and concerns of others
- Accept responsibility for work carried out under their supervision, treat subordinates fairly and without bias and advance their learning and competence
- Encourage others to advance their learning and competence
- Promote equality, diversity and inclusion
- Promote public awareness and understanding of the impact and benefits of engineering achievements
- Be objective and truthful in any statement made in their professional capacity
- Raise concerns about danger, risk, malpractice or wrongdoing that affects others ('blow the whistle') and support a colleague or any other person to whom they have a duty of care who, in good faith, raises any such concern
- Challenge statements or policies that cause them professional concern.

The decisions and actions of NDT and CM personnel have a profound impact on the world we live in and society at large. Making a clear and public commitment to operating with integrity and honesty is essential to create a greater level of trust and confidence and a positive perception of the non-destructive testing and condition monitoring professions.

All members, across all grades of membership, undertake to advance the objects of the Institute and to be governed by the Bye-Laws. The above is the Code of Conduct, which members are required to embrace. Any failure to do so can be dealt with by expulsion from Institute membership and consequent loss of Engineering Registration, if applicable.
