1. **Conditions of this application;**

By completing this PSL57C form the candidate confirms that he or she understands the consequences of failing to meet its requirements, and is aware that no complaint or appeal in this event will be accepted by 

- Applications must be complete and correct when submitting to BINDT.
- Applications must be submitted within 2 years of the examination date
- Applications received after the 2 year deadline will not be accepted
- Certification will not be validated if the application has incorrect/missing information or non-payment after the 2 year deadline
- Applicants exceeding the 2 year deadline shall follow the procedure for initial candidate
2. Terms and Definitions

Authorised Qualifying Body (AQB) - A body, independent of any single predominant interest, satisfying the criteria detailed in PCN document reference CP9 and authorised by the British Institute of NDT to prepare and administer PCN examinations to qualify NDT personnel.

Industrial NDT Experience – the experience needed to acquire the skill and knowledge to fulfil the provisions of qualification in the appropriate sector, and which is gained under the supervision of Appropriately Qualified Personnel, in the application of the NDT method in the sector concerned.

Qualified supervision – supervision of candidates gaining experience by NDT personnel certificated under the PCN Scheme or by non-certificated personnel who, in the opinion of BINDT, possess the knowledge, skill, training and experience required to properly perform such supervision.

Appropriately Qualified Personnel – Individuals carrying out supervision of candidates for PCN certification holding relevant certification issued by a BINDT recognised certification body meeting the requirements of ISO/IEC 17024.

3. Required Experience: Levels 1 & 2 ONLY

The minimum periods of experience for eligibility, which may include the required period of training, are specified below:

<table>
<thead>
<tr>
<th>NDT METHOD</th>
<th>LEVEL 1 (months)</th>
<th>LEVEL 2 (months)</th>
<th>*DIRECT LEVEL 2 (months)</th>

3.1. The candidate will have had regular practical experience in the application of the NDT method and this will include a specified period of recorded practical work on site or in works under certificated supervision.

3.2. For level 2 certification, work experience normally consists of time as a level 1. However, if the candidate is to qualify *directly at level 2 with no time at level 1, the experience will consist of the sum of the periods required for levels 1 and 2.

3.3. Work experience, which is based on a nominal 40 hour working week, may be gained simultaneously in two or more of the NDT methods for which PCN certification is sought, with the reduction of total experience as follows:

- Two testing methods – reduction of total time required by 25%
- Three testing methods – reduction of total time required by 33%
- Four testing methods – reduction of total time required by 50%

NOTE: Level 3 candidates – must have the required amount of NDT experience prior to taking any examination.

4. Procedure for applications of post experience

One application form is to be submitted in respect of each certificate applied for, and applications and supporting information must be legibly completed.

The following must be submitted with this application;

- Documented proof, authenticated by an employer or responsible agency (PCN may contact the employer/agency for verification purposes before an application for work experience for certification can be accepted)
• List of all employers during the period in which experience was gained
• Verifiable evidence of satisfying experience criteria by completing the form below
• Eye Test (Documentary evidence of a satisfactory test of visual acuity (meeting the published requirements of PCN document PSL44) conducted within 12 months of this application)

The Supervisors’ certificate(s) must be verified as the same level, sector and method and must be valid at the time the experience was gained.
This may include certification schemes other than ISO 9712, such as EN 4179 and SNT-TC-1A providing that this certification has been gained using external training/examination support provided by a BINDT approved organisation. The organisation must be a BINDT approved ATO, AQB and/or OA status. Please contact pcn@bindt.org if clarification on this is required.

5. **Candidate’s statement confirming eligibility for Certification**

I have read and understand PCN General Requirements for the certification of personnel engaged in NDT, particularly the criteria for eligibility, and hereby confirm that I satisfy those criteria covering vision, training and experience applicable to the level and NDT method for which I am seeking certification. In the event that I should be awarded PCN certification. I agree to comply with the PCN Code of Ethics (published as PCN document CP27).

I understand that, in the event of a false statement being discovered, any certification awarded as a result of such a declaration will be null and void.

LOG OF EXPERIENCE

PSL/30 Issue 9 dated 1st October 2016

IMPLEMENTATION DATE: 1st November 2016

Industrial NDT experience in the applicable NDT method, field of application or inspection application which leads to the acquisition by a PCN candidate of the required skill and knowledge, is to be gained and recorded prior to the award of certification by PCN. In the event that a false statement is made concerning pre-certification experience, any certification awarded as a result will be null and void.

PSL/30 - RECORD OF PRE-CERTIFICATION EXPERIENCE ........................................................................................................... 3

1. Terms and Definitions:

Inspection Experience – the experience needed to acquire the skill and knowledge to fulfil the provisions of qualification in the appropriate inspection method, and which is gained under the supervision of Appropriately Qualified Personnel, in the application of the inspection method in the sector concerned.

Industrial NDT Experience – the experience needed to acquire the skill and knowledge to fulfil the provisions of qualification in the appropriate sector, and which is gained under the supervision of Appropriately Qualified Personnel, in the application of the NDT method in the sector concerned.

Qualified supervision – supervision of candidates gaining experience by NDT personnel certificated under the PCN Scheme or by non-certificated personnel who, in the opinion of BINDT, possesses the knowledge, skill, training and experience required to properly perform such supervision.

Appropriately Qualified Personnel – Individuals carrying out supervision of candidates for PCN certification holding relevant certification issued by a BINDT recognised certification body meeting the requirements of ISO/IEC 17024.

NOTE: The Supervisor's certificate(s) must be verified as the same level, sector and method and must be valid at the time the experience was gained.

This may include certification schemes other than ISO 9712, such as EN 4179 and SNT-TC-1A providing that this certification has been gained using external training/examination support provided by a BINDT approved organisation. The organisation must be a BINDT approved ATO, AQB and/or OA status. Please contact pcn@bindt.org if clarification on this is required. **THIS NOTE DOES NOT APPLY TO WELD INSPECTION RECERTIFICATIONS/RENEWALS**
2. **Required experience: Levels 1, 2 and 3**

The candidate shall have had regular practical experience in the application of the NDT method and this will include a specified period of recorded practical work on site or in works under certificated supervision. The minimum periods of experience for eligibility, which may include the required period of training, are specified below:

</table>

For level 2 certification, work experience normally consists of time as a level 1. However, if the candidate is to qualify directly at level 2 with no time at level 1, the experience will consist of the sum of the periods required for levels 1 and 2.

**Level 3**

Level 3 responsibilities require knowledge beyond the technical scope of any specific NDT method. This broad knowledge may be acquired through a variety of combinations of education, training and experience. The table above details minimum experience for level 3 candidates.

For level 3 candidates who have successfully completed a degree or diploma at a technical school or completed at least two years of engineering or science study at an accredited college or university, proof of qualifications will be required, may be eligible for a reduction in the amount of experience required by 50%.

For Level 3 certification, the intent is that work experience consists of time as a Level 2. If the individual is being qualified directly from Level 1 to Level 3, with no time at Level 2, the experience shall consist of the sum of the times required for Level 2 and Level 3. No reduction in the period of experience shall be allowed.

Work experience, which is based on a nominal 40 hour working week, may be gained simultaneously in two or more of the NDT methods for which PCN certification is sought, with the reduction of total experience as follows:

- * Two testing methods - reduction of total time required by 25%
- * Three testing methods - reduction of total time required by 33%
- * Four testing methods - reduction of total time required by 50%

**NOTE:** Level 3 candidates must have the required amount of NDT experience prior to taking any examination.

3. **Recording experience**

Candidates will be required to provide documented proof, authenticated by an employer or responsible agency (who PCN may contact for verification purposes), of the above work experience before an application for certification can be accepted by PCN. Please list all employers during the period in which experience was gained:

The forms overleaf, which may be freely copied, are intended to assist the PCN candidate in recording employment whilst gaining experience for certification.

PSL/44 VISION REQUIREMENTS – Issue 1

Dated 1st January 2018
Implementation date 1st February 2018

All PCN candidates and holders of PCN certification shall have natural or corrected vision satisfying the following minimum requirement:

PCN will recognise the Tumbling E Chart as a satisfactory near vision test please refer to BS EN ISO 18490 previously NANDTB 24 which has been superseded http://www.eminspection.co.uk/visiontests/. (Existing documentation or Tumbling E vision test charts that continue to state NANDTB/24 remain valid but ISO 18490 is the standard that must be adhered to.)

The candidate shall provide documented evidence of satisfactory vision in accordance with the following requirements:

A. Corrected or uncorrected near-vision acuity shall permit reading a minimum of Times Roman N4.5 or equivalent letters (having a vertical height of not more than 1.6 mm – see note 1) at not less than 30 cm.

B. Colour vision (see note 2) shall be sufficient that the candidate can distinguish contrast between the colours or shades of grey used in the NDT method concerned as specified by the employer see PSL/44 ANNEX A for employer guidance.

Subsequently to certification, the tests of visual acuity shall be carried out at least annually. Records of tests shall be retained by the employer or responsible agency and provided to PCN upon request. Failure to do so will invalidate all PCN certification.

NOTE 1. Laminated hand held vision test charts are available from a number of suppliers, including the Institute of Optometry*. Further information may be obtained from the Certification Services Division of the British Institute of NDT. *http://www.ioosales.co.uk/html/practice/eye06B.html

NOTE 2. All candidates and holders of PCN certification will be required to have had colour perception assessed by the Ishihara 24 plate test. For VT and CRT the candidate is usually required to undergo both the Ishihara and Grey scale tests, however, the employer will need to confirm with the AQB. For Film RT and Film RI the grey scale may be sufficient without the need for the Ishihara plate test, this shall be confirmed by the employer. The test is required every five years. In the event that a colour perception deficiency, indicated by misreading any of the first 17 plates, is detected during the Ishihara test, a further ‘trade test’ is to be carried out by the employer to ascertain whether the detected colour perception deficiency affects the individual’s ability to perform the NDT for which he is certified. This trade test is to be documented and the record of the test made available to BINDT upon request.

In such cases as a new medical issue arises candidates are required to undergo further eye examinations as some medical conditions such as diabetes or a major medical condition can affect both near vision and colour perception.

Forms overleaf may be used to record the results of near vision, colour perception and contrast tests.

BINDT accepts that a *nominated official of an Authorised Qualifying Body, a PCN Level 3 certificate holder or other medical professional, having documented proof of satisfactory training in the administration of the test, and is medically recognised as competent to conduct such tests for candidates and holders of PCN certification.

*nominated officials must provide proof of appropriate training upon request by BINDT.
